## M-real's operating profit excluding non-recurring items for the first quarter EUR 3 million

Result for the first quarter of 2008

- Sales were EUR 1,099 million (Q4/2007: 1,085).
- Operating profit excluding non-recurring items was EUR 3 million (-6). Operating profit including non-recurring items was EUR 24 million (-245).
- Result before taxes, excluding non-recurring items, was EUR -37 million (-49). Result before taxes including non-recurring items, was EUR -16 million (-288).

Events during the first quarter

- M-real divested as part of its EUR 200 million divestment programme announced in February, its office paper mill located in the UK to DS Smith Plc. In relation to the sale, a separate agreement was made on the UK industrial operation's pension liabilities. The combined positive result effect was approximately EUR 24 million and correspondingly the cash flow effect approximately EUR 82 million.
- M-real closed Kangas paper machine 2 in February and Lielahti BCTMP mill in March. The closures were carried out ahead of the original schedule.

#### Abstract

"Simplifying M-real's business concepts has started well. Our magazine paper customers have welcomed the new concepts, and our plans have also been moving ahead in other business areas. The situation regarding wood raw material continues to be challenging and the pulp production has been curtailed at the Metsä-Botnia's mills in Finland. The use of wood raw material is planned to be curtailed for the time being by 2 million cubic metres per annum which affects the pulp production at M real's and Metsä-Botnia's mills in Finland and in Sweden. Despite the planned curtailments in pulp production, M-real's possibilities to maintain normal paperboard and paper production are good. Due to increased wood raw material costs the overall cost inflation can not be fully covered with our own profit improvement measures in 2008. New profit improvement programmes will be launched this year. The strength of the euro against the US dollar and the British pound has offset part of the earlier achieved paperboard and paper price increases in local currencies. Actions to increase paperboard and paper prices continue actively."

Mikko Helander, CEO, M-real Corporation

M-real is one of Europe's leading producers of paperboard and paper. It offers premium solutions for consumer packaging and communications and advertising end-uses. M-real's global sales network serves publishers, printing houses, well-known brand owners and folding carton printers, merchants and offices.

## Result January-March compared with the previous quarter

M-real's sales totalled EUR 1,099 million (Q4/07: 1,085). Comparable sales increased by 2 per cent. The operating result was EUR 24 million (-245) and the operating result excluding non-recurring items stood at EUR 3 million (-6). The net non-recurring items in the operating result for January-March totalled EUR 21 and were:

- EUR 24 million positive effect on the result for the Graphic Papers business area for the sale of New Thames mill and the agreement of pension liabilities from UK industrial operations and other liabilities related to the closure of the Sittingbourne mill.
- EUR 2 million cost provision in the Graphic Papers business area for the completion of the closure of the Kangas paper machine 2 for coated magazine paper.
- EUR 1 million cost provision in the Consumer Packaging business area for the completion of the closure of the Lielahti BCTMP mill.

In the previous quarter, the operating profit included non-recurring items of net EUR -239 million of which the most significant ones were:

- Net impairment loss of EUR 182 million which includes a EUR 185 million writedown of goodwill in the Office Papers business area and a EUR 3 million reversal of an impairment loss on the fixed assets of the Kyro paper mill in the Consumer Packaging business area
- EUR 13 million reduction in cost provision for the closure of the Wifsta mill in Office Papers business area
- EUR 68 million cost provision and write-down in the business areas; Consumer Packaging (11), Graphic Papers (49) and Office Papers (8).
In addition to the items recognised in the operating profit in the previous quarter, an estimated capital gain of EUR 76 million was recognised as a non-recurring item from discontinued operations from the sale of Map Merchant. The exact sales price will be determined later. Depending on the final amendment calculation, the exact sales price may, at maximum, be lowered by EUR 30 million. Lowering of the sales price, if realised, would have a negative effect on the result for the discontinued operations in 2008. Finalising the transaction will, anyhow, have a positive effect on M-real's cash flow in 2008.

The operating result excluding non-recurring items was improved compared with the previous quarter due to an increase in production volume of Metsä-Botnia's Uruguay pulp mill. The increased energy costs, the strength of the euro against the US dollar and the British pound and the production curtailments implemented at the Metsä-Botnia mills in Finland had a negative effect on the operating profit. The result from other operations was weakened by several factors, the most significant being the results from hedging related to energy and currency.

The paper delivery volume in January-March totalled 986,000 tonnes $(980,000)$. Production was curtailed by 29,000 tonnes in line with demand (50,000). Paperboard deliveries amounted to 298,000 tonnes $(291,000)$ and production curtailments to 1,000 tonnes $(18,000)$.

Financing income and expenses totalled EUR -40 million (-40). Foreign exchange gains and losses from accounts receivable, accounts payable, financial income and expenses and the valuation of currency hedging were EUR 0 million (2). Net interest and other financing expenses stood at EUR -40 million (-42). Other financing expenses include a loss of EUR 3 million (3) from the valuation of interest rate hedging.

In January-March, the result from continuing operations before taxes was EUR -16 million (-288). The result from continuing operations before taxes, excluding non-recurring items, totalled EUR -37 million (-49). The effect of income taxes, including the change in deferred tax liabilities, was EUR -2 million (39).

Earnings per share were EUR -0.06 (-0.58). Excluding non-recurring items, earnings per share from continuing operations were EUR -0.12 (-0.07). Return on equity was -4.4 per cent (-53.0), and -9.4 per cent ( -0.4 ) excluding non-recurring items. The return on capital employed was 2.9 per cent ( -24.4 ), and 0.8 per cent ( -0.3 ) excluding non-recurring items.

## m•real

M-real Corporation
April 23, 2008
Interim report January-March 2008
4 (23)
Result for January-March compared with the corresponding period previous year
M-real's sales were EUR 1,099 million (Q1/07: 1,157). Comparable sales decreased by 3 per cent. The operating profit was EUR 24 million (97) and the operating profit excluding non-recurring items was EUR 3 million (21).

Net non-recurring items recognised in operating profit were EUR 76 million. The nonrecurring income totalled EUR 135 million and the non-recurring costs stood at EUR 59 million of which the most significant items were:

- Capital gain of EUR 135 million on the sale of Metsä-Botnia's shares to Metsäliitto Cooperative
- EUR 14 million cost provision for the closure of the Sittingbourne mill and EUR 29 million for the closure of the Wifsta mill
- Impairment loss of EUR 16 million due to the valuation of assets held for sale at the expected selling price in compliance with IFRS 5.

The operating result excluding non-recurring items compared with the corresponding period was negatively affected by the increased wood raw material and energy costs, the strength of the euro against the US dollar and the British pound as well as the production curtailments at the Metsä-Botnia mills in Finland. The implemented profit improvement actions and price increases as well as the start-up of Metsä-Botnia's Uruguay mill in November 2007 improved the result.

The paper delivery volume in January-March totalled 986,000 tonnes (1,029,000). Production was curtailed by 29,000 tonnes in line with demand (41,000). Paperboard deliveries amounted to 298,000 tonnes $(302,000)$ and production curtailments to 1,000 tonnes $(17,000)$.

Financing income and expenses in the review period totalled EUR -40 million (-42).
Foreign exchange gains and losses from accounts receivable, accounts payable, financial income and expenses and the valuation of currency hedging were EUR 0 million ( -5 ). Net interest and other financing expenses stood at EUR -40 million (-37). Other financing expenses include a loss from the valuation of interest rate hedging of EUR 3 million (1).

The result from continuing operations before taxes was EUR -16 million (55). The result from continuing operations before taxes, excluding non-recurring items, totalled EUR -37 million (-21). Income taxes, including the change in deferred tax liabilities, were EUR -2 million (-3).

Earnings per share were EUR -0.06 (0.16). Excluding non-recurring items, earnings per share from continuing operations were EUR -0.12 (-0.09). Return on equity was -4.4 per cent (9.9), and -9.4 per cent (-7.3) excluding non-recurring items. The return on capital employed was 2.9 per cent (9.7), and 0.8 per cent (2.5) excluding non-recurring items.

## Personnel

On 31 March, 2008 the company had 9,122 employees (31 December 2007: 9,508), of which $3,333(3,994)$ worked in Finland. On average, in January-March 2008, M-real had 9,265 employees (Q1/07: 13,664). The personnel figures include 30 per cent of MetsäBotnia's personnel.

## Investments

Gross capital expenditure in January-March totalled EUR 21 million (Q1/07: 50). This includes a EUR 7 million share of Metsä-Botnia's capital expenditure (35), based on Mreal's ownership, which amounted to 30 per cent.

## Structural change

M-real's profit improvement and business concept simplification programme launched in November 2007 has proceeded according to the targets. As part of the programme, the Lielahti BCTMP mill and Kangas mill's coated magazine paper machine 2 were closed. The Publishing and Commercial Printing business areas were combined under the Graphic Papers business area. At the same time, projects were launched to streamline the coated magazine paper business operations and the sales and marketing organisation. As part of the programme, M-real announced it is also prepared to take other measures, such as capacity cuts, if required by changes in the business environment. The aggregate annual profit improvement target of the programme is EUR 100 million by the end of 2009.

In February 2008, M-real announced an additional target of EUR 200 million from asset divestments, which should be achieved by the end of the first quarter of 2009. The target of EUR 200 million includes the sale of the New Thames mill in February. This transaction had a positive cash flow effect of EUR 82 million together with the arrangement on the pension liabilities of the UK industrial operations and a profit of approximately EUR 24 million was booked. Following this, M-real has no significant unfunded pension liabilities in the UK. Other asset items belonging to the divestment programme will be published later.

## Financing

At the end of March, M-real's equity ratio stood at 32.2 per cent (31.12.2007: 32.1), and gearing at 117 per cent (112). In some of M-real's financing arrangements, a limit of 120 per cent has been set for gearing and a limit of 30 per cent for the equity ratio. At the end of March, gearing calculated in the manner defined in the financing agreements was approximately 98 per cent (95) and the equity ratio about 36 per cent (36).

Interest-bearing net debt stood at EUR 1,892 million at the end of March (1,867). Foreign-currency-denominated loans accounted for 10 per cent of long-term loans. Of these, 90 per cent were variable rate loans, and the rest were fixed-rate loans. At the end of March, the average interest rate on loans was 7.3 per cent and the average maturity of long-term loans was 3.3 years. At the end of March, the interest rate maturity of the loans was 4 months. During the period, the interest rate maturity has varied between 4 and 6 months.

Cash flow from operating activities amounted to EUR 40 million in January-March (Q4/07: 97). Working capital increased by EUR 33 million (decreased EUR 74 million).

At the end of the review period, an average of 5 months of net foreign exchange exposure was hedged. The level of hedging has varied between 5 and 6 months during the period. Approximately 98 per cent of non-euro-denominated equity was hedged at the end of the review period.

Liquidity is at a good level. At the end of the period under review, liquidity was EUR 1,053 million, of which EUR 856 million consisted of committed long-term credit facilities and

## m•real

M-real Corporation
April 23, 2008
Interim report January-March 2008
EUR 197 million of liquid assets and investments. To meet its short-term financing needs, the company also had at its disposal uncommitted domestic and foreign commercial paper programmes and credit facilities amounting to about EUR 500 million.

## Shares

In January-March, the highest price of M-real's B share on the OMX Nordic Stock Exchange Helsinki was EUR 3.28, the lowest price EUR 1.66, and the average price EUR 2.24. At the end of March, the price of the B share was EUR 2.12.

The trading volume of the B share was EUR 357 million, or 59 per cent of the shares. The market value of the A and B shares totalled EUR 710 million at the end of March. At the end of the review period, Metsäliitto Cooperative owned 38.6 per cent of the shares, and the voting rights conferred by these shares was 60.5 per cent. The foreign shareholders' share of the shares fell to 31.5 per cent.

On 15 January, 2008 M-real was informed that the shareholding of Norges Bank (Central Bank of Norway) in the company had on 9 January9, 2008 increased to 5.3 percent of the share capital and to 1.7 percent of the voting rights.

The Annual General Meeting on 13 March 2008 resolved to delete from the company's Articles of Association the stipulation on the minimum and maximum share capital, the record date provisions of the book-entry system and the section concerning the par value of company's share.

## Dividend

The Annual General Meeting decided that a dividend of EUR 0.06 per share, approximately EUR 19.7 million in total is to be paid for the financial year ending on 31 December 2007. The dividend was paid on 27 March 2008.

## Board of Directors and Auditors

The Annual General Meeting elected the following persons to M-real's Board of Directors: Mr Heikki Asunmaa, Counsellor of Forest Economy; Mr Martti Asunta, M.Sc. (Forestry); Mr Kari Jordan, President and CEO of Metsäliitto Group; Mr Erkki Karmila, LL.M.; Mr Kai Korhonen, M.Sc. (Eng.); Mr Runar Lillandt, Counsellor of Agriculture; Mr Juha Niemelä, Honorary Counsellor; and Mr Antti Tanskanen, Minister. The term of office of board members continues until the end of the next Annual General Meeting. At its organising meeting, the Board of Directors elected Mr Kari Jordan as Chairman and Mr Martti Asunta as Vice Chairman.

The Annual General Meeting decided to change the maximum number of board members from eight to ten.

PricewaterhouseCoopers Oy, a firm of authorised public accountants, was elected as M-real's auditor, and Mr Göran Lindell, APA, as principal auditor. The term of office of auditors continues until the end of the next Annual General Meeting.

M-real Corporation
Interim report January-March 2008

April 23, 2008
7 (23)

## Near-term outlook

Demand for M-real's paperboard and paper products is expected to be reasonably good in the second quarter of 2008 but will experience slight seasonal weakening. Thus, the average operating rates of the M-real machines are expected to decrease slightly.

Measures to raise product prices continue in all business areas. In the second quarter, price increases for the paperboard spot deliveries are being sought primarily in the UK and in markets outside Europe. Another objective is to increase the spot prices of coated magazine paper, thus creating the preconditions for the increase of contract prices in the latter half of the year. Closed capacities will support positive uncoated fine paper price development during the rest of the year, with increases being sought already in the second quarter. The most challenging situation is for coated fine paper, as excess capacity and the strong euro is making the situation more difficult.

M-real's objective is to cover the cost increases as much as possible with own profit improvement actions. Due to the increased wood raw material costs, the cost inflation can not be fully covered with its own profit improvement actions in 2008. New profit improvement programmes will be launched this year. The exceptionally mild winter in Northern Europe and the increases in export duties on wood from Russia have created difficulties in wood supply, and the price of wood has remained high. For the time being, the use of wood raw material is planned to be curtailed per annum by 2 million cubic metres, which affects production at M-real's and Metsä-Botnia's pulp mills in Finland and in Sweden. Despite the planned pulp production curtailments, M-real's possibilities to maintain normal paperboard and paper production are good.

The start-up of Metsä-Botnia's pulp mill in Uruguay in November 2007 was successful. The pulp from the Uruguay mill will significantly improve M-real's profitability this year. M-real's share of the output of the Uruguay mill will be used at M-real's own fine paper mills in Central Europe.

M-real's strategic review continues. The profit improvement and business concept simplification programme launched in November 2007 as the fourth phase of the strategy review is progressing according to plan, as is the divestment programme launched in February 2008.

The operating profit, excluding non-recurring items, for the second quarter of 2008 is forecast to remain approximately at the same level as in the second quarter of 2007.

## Near-term business risks

If the uncertainty in the US economy continues for a longer period, it could spread worldwide and affect the operational preconditions of European paper and paperboard industry. As yet, no significant reduction in the demand for paper and paperboard has been observed in M-real's main markets in Europe. The risk of the euro becoming even stronger was realised during the first part of the year. Production input costs have also continued to increase. The risk of a need to implement more than currently planned production curtailments due to challenging wood supply situation, as well as the risk of the euro strengthening further, exists.

## m•real

M-real Corporation
Interim report January-March 2008

April 23, 2008
8 (23)

The eventual sales price of Map Merchant will be determined later. Depending on the final adjustment calculation, the exact sales price may, at maximum, be lowered by EUR 30 million. Lowering the sales price, if realised, would have a negative effect on the result for the discontinued operations in 2008. Finalising the transaction will, anyhow, have a positive effect on M-real's cash flow in 2008.

Because the forward-looking estimates and statements of this financial statements release are based on current plans and estimates, they contain risks and other uncertain factors which may lead the results to differ from the statements concerning them. In the short term, M-real's result will be influenced in particular by the price of, and demand for, finished products, the availability and price of wood, other raw material costs, the price of energy, and the exchange rate of the US dollar. More information about longer-term risk factors can be found on pages 28-29 of M-real's 2007 Annual Report.

Result for January-March compared to the previous quarter
The operating profit of the Consumer Packaging business area excluding non-recurring items of the Consumer Packaging business area improved and stood at EUR 19 million (Q4/07: 8). The profit improvement resulted from higher average sales price and increased delivery volumes while the production curtailments at the Metsä-Botnia mills in Finland had a negative impact.

A non-recurring item of EUR 1 million was recognised in the operating profit for completion of the closure of the Lielahti BCTMP mill.

In the previous quarter, non-recurring items of EUR -8 million were recognised in the operating profit.

Deliveries by Western European folding boxboard producers increased by 4 per cent, and M-real's deliveries by 10 per cent compared to the previous quarter.

The delivery volume of linerboard was at a lower level compared to the previous quarter. The average euro-denominated price increased slightly. The sales prices of wallpaper base paper have increased clearly.

Result for January-March compared with the corresponding period previous year
Consumer Packaging's operating profit excluding non-recurring items stood at EUR 19 million (Q1/07: 21). The result was weakened by clearly increased wood raw material costs, the weakened US dollar and British pound as well as production curtailments at the Metsä-Botnia mills in Finland. The average euro-denominated price of folding boxboard was at a higher lever despite the weakened US dollar and British pound.

Deliveries by Western European folding boxboard producers decreased by 2 per cent compared with the corresponding period previous year. M-real's folding boxboard deliveries increased by 2 per cent.

The delivery volume of linerboard was lower than in the corresponding period previous year. The sales prices of wallpaper base paper increased clearly from previous year.

EBITDA = Earnings before interest, taxes, depreciation and amortization

## Result for January-March compared with the previous quarter

In the first quarter, the operating profit of the Graphic business area, excluding nonrecurring items was EUR -8 million (Q4/07: -22). The operating profit was improved by the substantially increased production volume of Metsä-Botnia's Uruguay pulp mill and the increased price of magazine paper. The increase in energy costs and as well as strengthened euro against the US dollar and British pound and production curtailments at the Metsä-Botnia mills in Finland had a negative effect on the profitability.

Net non-recurring items of EUR 22 million were recognised in operating profit for the first quarter:

- A positive effect of EUR 24 million on the result for the sale of New Thames mill and the agreement of pension liabilities from UK industrial operations and other liabilities related to the closure of the Sittingbourne mill.
- EUR 2 million cost provision for the completion of the closure of the Kangas mill's paper machine 2 , which produced coated magazine paper.

In the operating profit for the previous quarter net non-recurring items of EUR -49 million were recognised, comprising of EUR 10 million in cost provision connected to profit improvement programmes and EUR 39 million in write-downs of fixed assets.

Total deliveries by European producers of coated fine paper increased by 2 per cent from the previous quarter, and total deliveries by European producers of coated magazine paper decreased by 12 per cent. Total deliveries of M-real's Graphic Papers business area decreased by 2 per cent and included the impacts of capacity closures.

## Result for January-March compared with the corresponding period previous year

Graphic Papers business area's operating profit excluding non-recurring items was EUR -8 million (Q1/07: 0). Profitability was weakened by increased wood raw material costs, the strengthened euro against US dollar and British pound as well as production curtailments at the Metsä-Botnia mills in Finland. Profitability was improved by the implemented profit improvement actions and the start-up of Uruguay pulp mill in November 2007.

EBITDA = Earnings before interest, taxes, depreciation and amortization
Result for January-March compared with the previous quarter
In the first quarter the operating profit excluding non-recurring items of the Office Paper business area was EUR 3 million (Q4/07: 7). The operating profit was weakened by the declined average sales price mainly due to exchange rate changes as well as higher production costs. The operating profit did not include non-recurring items.

In the previous quarter, net non-recurring items of EUR -180 million were recognised in operating profit of which EUR 185 million was in impairment losses, EUR 8 million in cost provisions connected to profit improvement programmes and EUR 13 million reduction in cost provision for the closure of the Wifsta mill.

Total deliveries by European producers of uncoated fine paper were up 9 per cent, and deliveries of the Office Papers business area increased by 9 per cent.

Result for January-March compared with the corresponding period previous year
The business area's operating profit excluding non-recurring items was EUR 3 million in the fourth quarter (Q1/07: 8). The operating profit did not include non-recurring items. Profitability was weakened by increased costs, especially wood raw material costs. The increase in average sales price increased profitability.

A non-recurring cost provision of EUR 29 million was recognised in the operating profit in the corresponding period previous year for the closure of the Wifsta mill.
