## Financial calendar

The Bank of Åland will publish the following Interim Reports during the 2021 financial year:

- January–March Interim Report April 27, 2021
- January–June Half-Year Financial Report July 20, 2021
- January–September Interim Report October 26, 2021

The Annual Report and all Interim Reports will be published on the Bank's website: [www.alandsbanken.fi](http://www.alandsbanken.fi)

They can be ordered from: [info@alandsbanken.fi](mailto:info@alandsbanken.fi) or from Secretariat, Bank of Åland Plc, PB 3, AX-22101 Mariehamn, Åland, Finland.

The Head Office of the Bank of Åland is in Mariehamn, capital of the autonomous Finnish province of Åland. Located in the Baltic Sea midway between Sweden and Finland, the 6,700-island Åland archipelago has more than 30,000 inhabitants. Its official language is Swedish.

This translation of the Swedish-language Annual Report uses the international currency codes for the European Central Bank euro (EUR) and the Swedish krona (SEK). At year-end 2020, the middle rate for EUR 1 was USD 1.2271 and SEK 10.0343.

"The Bank" refers to the Bank of Åland Plc (Ålandsbanken Abp), Parent Company of the Bank of Åland Group. Amounts have generally been rounded off to millions or thousands, but percentage figures, totals, ratios etc. are calculated on the exact amounts. The abbreviation M refers to million(s), and K means thousand(s).

## About the Bank of Åland

- The Bank of Åland (Ålandsbanken) was founded in 1919 as Ålands Aktiebank and has been listed on the Helsinki Stock Exchange (now the Nasdaq Helsinki Oy) since 1942.
- The Head Office is located in Mariehamn, Åland. The Bank of Åland has a total of two offices in the Åland Islands and five offices on the Finnish mainland: in Helsinki, Tampere, Vaasa, Turku and Parainen. In Sweden, the Bank of Åland has three offices: Stockholm, Gothenburg and Malmö.
- The Bank of Åland Group has two subsidiaries: the fund management company Ålandsbanken Fondbolag Ab and the information technology company Crosskey Banking Solutions Ab Ltd.
- In the Åland Islands, the Bank of Åland is a bank for all residents and is both in a position and with a desire to help develop the Åland of the future.
- On the Finnish mainland and in Sweden, the Bank of Åland has a niche strategy targeted to entrepreneurs, wealthy families and individual customers with sound finances. We offer two concepts: Private Banking and Premium Banking®.
- Over the years, the Bank of Åland has been an innovative pioneer in the financial services industry. The Bank of Åland's Premium Banking®, launched in 2004, has served as a model for competitors in the Nordic countries. The Åland Index, launched in 2016, has become established as an international standard for measuring the climate impact of consumption.
- The Bank of Åland has business partnerships with several financial technology ("fintech") companies and supplies services to companies operating in the financial services sector. The Bank is also a shareholder in a number of strategic partners.
- The Bank of Åland has proactively chosen to offer products that benefit the customer at various levels: first and foremost financially, but also by contributing to sustainable development. Including the 2020 amount, over the years the Bank's Baltic Sea Account (formerly the Environmental Account) has contributed almost EUR 2.8 M to projects that improve and protect the environment.

# The year 2020 in brief

## Financial summary of 2020

- Net operating profit increased by 20 per cent to EUR 39.7 M (33.2).
- Earnings per share increased by 19 per cent to EUR 2.02 (1.69).
- Return on equity after taxes (ROE) increased to 11.6 per cent (10.7).
- Net interest income increased by 9 per cent to EUR 58.9 M (53.9).
- Net commission income increased by 14 per cent to EUR 66.3 M (58.0).
- Total expenses increased by 8 per cent to EUR 105.6 M (97.5).
- Net impairment losses (including recoveries) amounted to EUR 4.9 M (3.2), equivalent to a loan loss level of 0.11 (0.08) per cent.
- Actively managed assets increased by 17 per cent to EUR 7,436 M (6,343).
- Lending increased by 7 per cent to EUR 4,378 M (4,110).
- Deposits increased by 7 per cent to EUR 3,605 M (3,368).
- The common equity Tier 1 capital ratio increased to 14.3 per cent (13.4).
- The Board of Directors proposed a dividend of EUR 1.00 per share (a regular dividend of EUR 0.80 plus an anniversary dividend of EUR 0.20) for the 2019 financial year.

## Important events in 2020

### FIRST QUARTER

- The coronavirus (COVID-19) pandemic struck Finland and Sweden. Due to great uncertainty about how the Bank and its customers would be affected, the Bank of Åland announced that until further notice it would refrain from issuing any future outlook about its net operating profit.
- For the seventh consecutive year, the Bank of Åland (Ålandsbanken) Euro Bond Fund was named the best Nordic fund in its category and received the prestigious Lipper Fund Award Nordic. The fund won the award for all management periods that were analysed: 3, 5 and 10 years.
- Together with its customers, the Bank of Åland continued its commitment to a cleaner Baltic Sea. The Baltic Sea Project contributed EUR 445,000 to various projects that promote the health of the Baltic Sea.

### SECOND QUARTER

- The Annual General Meeting on April 2, 2020 re-elected the Board of Directors consisting of Nils Lampi, Christoffer Taxell, Åsa Ceder, Anders Å. Karlsson, Ulrika Valassi and Anders Wiklöf. At the statutory meeting of the Board the same day, Nils Lampi was elected as Chairman and Christoffer Taxell as Vice Chairman.
- In compliance with the recommendation of the Finnish Financial Supervisory Authority (FIN-FSA) due to the coronavirus pandemic, the Bank postponed payment of the dividend for 2019 until an undetermined future date.

- The Bank of Åland launched a new equity fund called Ålandsbanken Nordiska Småbolag. The fund invests in Nordic small and medium sized enterprises that we classify as “quality companies” – firms with stable balance sheets, strong cash flows, high profitability and good growth potential.
- Net operating profit during the quarter was the highest ever in the Bank’s history.

### THIRD QUARTER

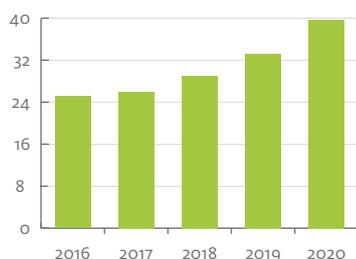

- The Bank of Åland’s global equity fund became the second fund in the Bank’s asset management range to be granted the Nordic Swan Ecolabel.
- Net operating profit during the quarter was again the highest ever in the Bank’s history.

### FOURTH QUARTER

- The Bank of Åland further strengthened its position in sustainable investments by launching Finland’s first special placement fund for investing in wind power – Ålandsbanken Vindkraft (the Ålandsbanken Wind Power Fund).
- For the third straight quarter, net operating profit was the highest ever in the Bank’s history. For the second straight year, full-year net operating profit was the highest ever.

## We will not soon forget 2020

Photographer: Viktor Fremling

Peter Wiklöf, Managing Director

**If you read our income statement for 2020 and note its associated volume trend, you can confirm that the Bank of Åland had a successful year. Add the realisation that we achieved this during a pandemic, and the outcome looks even better.**

Our hopes for 2020 were high after we closed out 2019 – our 100th financial year – with record earnings. Little did we suspect the drama that we and the rest of the world would experience as the novel coronavirus spread like wildfire around the globe. Stock markets plunged during March, and fixed income markets largely ceased to function.

### RAPID ADJUSTMENT AND CALM CUSTOMERS

Let me offer some personal reflections about the initial shock phase of the pandemic. I am grateful that we have highly responsive and adaptable employees. When the need for social distancing increased, we were quickly able to adjust and continue our work from home without any major complications.

Our customers also showed great understanding and acceptance when we began to deliver a much larger proportion of our advisory services via digital channels. We saw some of our competitors facing challenges, with large outflows of investment assets when markets collapsed, but we did not see that. Our customers chose almost exclusively to listen to our advice and stay in

the markets until the worst drama subsided. That advice proved to be correct.

We also saw the authorities respond much faster than during the global financial crisis of 2008–2009. Central banks, national governments and the Åland provincial government quickly came out with comprehensive relief measures to help sustain the economic sectors that were hardest hit when people were asked to stop travelling and meeting. These measures probably contributed to the fact that at the Bank of Åland, we did not see our non-performing loans grow during 2020. Another result of the relief measures was that there was no reason to use the larger impairment loss provisions we set aside during the first quarter of 2020. They will instead remain as reserves for future years.

#### **ASSET PURCHASES PUSHED DOWN INTEREST RATES AND YIELDS**

The capital markets that have the greatest influence on our performance are the fixed income and stock markets. Few people could have guessed that after stock markets fell by 20–30 per cent last spring, then would close the year at higher levels than they started. Yet by the end of 2020, it was clear that most stock markets had more than recovered. The Stockholm exchange gained 13 per cent during the year and the Helsinki exchange rose by 10 per cent. Extensive asset purchases by central banks pushed down both short-term interest rates and long-term yields. At the end of 2020, we consequently saw our most important market interest rates in Finland and Sweden move into negative territory: 3-month Euribor to –0.52 per cent and 3-month Stibor to –0.08 per cent.

At the Bank of Åland, we have continued to give our customers the option of physical meetings. We must offer high-quality digital services, but giving people a chance to meet their personal advisor face to face is still important to us. The pandemic hampered our ability to provide our full range of services. In spite of this, we managed to continue growing our business volumes in a very satisfactory way. During 2020, actively managed assets grew by 17 per cent to EUR 7,436 million, driven by an influx of new capital from new and existing customers and by valuation growth.

#### **NEW MUTUAL FUNDS WERE WARMLY RECEIVED**

During the year, we launched two new investment funds: the Nordiska Småbolag equity fund, specialising in Nordic small and medium sized enterprises, and the Nordic region's first investment fund specialising exclusively in wind power. Both funds were very well received. In December, the Wind Power Fund announced that it had reached an agreement with the construction company YIT to build a wind farm with fifteen turbines in Murtohäki, north-western Finland, and a total capacity of 90 megawatts. Our largest mutual fund, Ålandsbanken Global – with over EUR 1 billion in investment assets – was granted the Nordic

Swan Ecolabel during the year. This is in line with our long-term sustainability strategy, which includes phasing out fossil fuel-related investments from our product range.

Given our continued good rapport with customers, our deposits and our lending each grew by 7 per cent during the year, reaching EUR 3,605 M and EUR 4,378 M, respectively. Lending growth was supported by our collaboration with Sweden's ICA Bank – managing their mortgages in our balance sheet until our new jointly owned mortgage company, Borgo, is launched in 2021. The Bank of Åland will provide this newly established mortgage company with everything from IT services to normal back office and accounting services.

#### **LAUNCHING OUR SUSTAINABILITY EFFORTS ON A GLOBAL SCALE**

The Bank of Åland's ambition is to continuously improve our operations from a sustainability perspective. In some areas, the Bank is at the forefront. For example, every quarter we transparently report our carbon footprint from electricity use, business travel and paper consumption. This footprint shrank by a full 60 per cent in 2020 thanks to active decisions, but also because the coronavirus pandemic made many business trips impossible. A few years ago we created the Åland Index, which enables card customers to calculate to calculate their own carbon footprint. Together with the Swedish-based fintech company Doconomy, we are now successfully launching it on a global scale.

In 2019, the Bank of Åland signed the United Nations Principles for Responsible Banking. During 2020, we did our homework by conducting a materiality analysis based on the UN's 17 Sustainable Development Goals. This analysis focused on areas where we have a negative or positive impact on our environment. We are now setting new targets in these areas in order to systematically reduce our impact and to monitor the progress of our own sustainability work. The long-term objective is that we should be completely climate-neutral, and during 2021 we will define this objective more clearly.

#### **A STRONG TALENT FOR ADAPTING TO CHANGE**

The world around us is constantly changing. Companies that can adapt to changes in their surroundings will survive, while others will disappear. For many decades, the Bank of Åland has shown a strong talent for adapting to the prevailing operating conditions. Last year was no exception – on the contrary. Rarely has our organisation demonstrated such an impressive ability to adapt quickly as during the 2020 financial year. We passed this test with good marks.

The Bank of Åland is financially stronger than we have ever been before. With a return on equity that reached 11.6 per cent last year, we are one of the most profitable full-service banks in Europe. If we combine this knowledge with the positive trend we have shown in recent years, we can undoubtedly look forward to the coming years with confidence.

I would like to thank our customers and all our employees for their great flexibility and their ability to take on the challenges they faced during 2020. Hopefully during 2021 we can return to a more normalised world.

## Daring to go our own way

**As large banks become ever larger and their customers feel ever smaller, a clear need arises – the need for a bank where each customer feels seen, heard and appreciated. The Bank of Åland has nearly a century behind it as an independent, innovative and customer-oriented bank. This is why it is self-evident that we will continue along a path where the needs of our customers are the guiding principle for our development.**

### OUR VISION

Our aim is to be the self-evident bank for individuals with ambitions and companies that value relationships.

### OUR POSITION

The Bank of Åland is a bank for investors, with financing know-how. The Bank of Åland generates value for individuals and companies by delivering a large bank's range of services with a smaller bank's thoughtfulness and sense of dedication.

At the Bank of Åland, we focus on what problems we solve, what opportunities we create and how we deliver different types of value to our customers. We always go our own way, and that is how we persuade more and more friends to join us on this path. Our choice of position is ambitious and it is a position where the Bank of Åland foresees a clear customer need and a growing market. We are growing within selected target groups, putting special emphasis on financial investment operations at the same time as we deliver financing solutions and other banking services in an outstanding way.

### A BANK FOR INVESTORS, WITH FINANCING KNOW-HOW

The Bank of Åland's proficiency as a bank for investors has been confirmed in all its markets over the past few years. This is demonstrated by its increasing number of customers, along with various industry awards. Our financing know-how has long traditions and will continue to play a central role.

### CUSTOMER RELATIONSHIPS AND TRUST

All sound banking business is based on trust. This is especially evident in the way that customers handle their financial investments. We know that it requires time and dedication to build trust among new customers. The Bank of Åland offers a bank as it should be – a bank that wants individuals, companies and the community to have fertile ground for development.

We are convinced that strong, long-term relationships are built through good performance by ambitious people.

### GOOD SERVICE VIA ALL CHANNELS

The Bank of Åland has always welcomed new technology that makes everyday life easier for our customers. Our Internet Bank has thus been a forerunner in the industry since its inception. In our development work, we draw no distinctions between personal

and digital encounters. Regardless of the channel, our customers shall always feel that they are receiving good service. Our relationships shall be equally strong in every channel. But we also take advantage of the special strengths of the various channels.

Personal meetings are the most suitable channel for advisory services, while our Internet Office – delivered via the Web – and our banking app using mobile devices enable customers to gain a clear overview and seamlessly manage their everyday finances.

### AN EVER-BROADENING RANGE OF PARTNERSHIPS

For many years, the Bank of Åland has collaborated with other market players within the IT field via its subsidiary Crosskey Banking Solutions. In the world that is now emerging, we are seeing that the Bank of Åland has the ability and the potential to offer products and services to other market players within a substantially broader field than IT services alone. In fintech, today the Bank of Åland is already a versatile and capable partner with the capacity to deliver solutions to companies in most financial service areas.

### MAKING OURSELVES CLIMATE NEUTRAL

Given our close connection to the small community of Åland, located among thousands of islands in the middle of the Baltic Sea, sustainability work has been a natural element of our core values for a long time. Together with our customers, we have created products and services that both increase awareness and support concrete sustainability projects. Sustainability issues are an integral part of our usual operational management, where the Board of Directors, the Executive Team and all our employees have their role. Each quarter we transparently report our carbon footprint from business travel as well as electricity and paper consumption.

In 2019 the Bank of Åland signed the United Nations Principles for Responsible Banking. Our starting point is the materiality analysis that we conduct on the basis of the UN's 17 sustainable development goals. Here we analyse all of our operations and see where our impact is positive and where it is negative. Then we set clear development targets and follow them up on a regular basis. Our long-term objective is to become a climate neutral group.

## A job at the Bank gave Eli hope for the future

**Eli Ghaderpour grew up in Tehran, Iran – a city of millions – and arrived in Åland with a university degree in economics. It was a difficult adjustment, but when she landed a job at the Bank of Åland, her situation changed. “I’m so happy there, and now it feels meaningful to stay in Åland,” she says.**

Eli Ghaderpour, 31, has worked since January 2020 as a portfolio administrator with the Business Support – Capital Market department at the Bank’s head office in Mariehamn. She remembers very well when she first came in contact with the Bank. At the time, she was a student in a Swedish for Immigrants (SFI) course.

“We went on a study visit to the Bank of Åland. They treated us to coffee and pastries and gave us an introduction that I understood a fraction of. But I was courageous and asked in halting Swedish whether there was any chance for us to get jobs at the Bank,” Eli explains.

### Hope awakened

The reply filled her with hope. “Yes indeed, it depends entirely on your experience and the job you’re applying for.” Eli was ready to fight. She wanted so badly to land a job at the Bank of Åland in particular. She already spoke three languages – Persia, Kurdish and Turkish – and realised that she had to learn Swedish really well. She also had her economics degree evaluated. She had studied for more than six years at Urmia University in Iran, and her degree was approved as being equivalent to a Finnish bachelor’s degree in economics and business administration.

When a job as a portfolio administrator was advertised in December 2019, Eli applied for it. She had been unemployed for several weeks after a holiday job behind the meat counter at

a grocery store. She waited nervously for a week or so before being invited to the Bank for an interview.

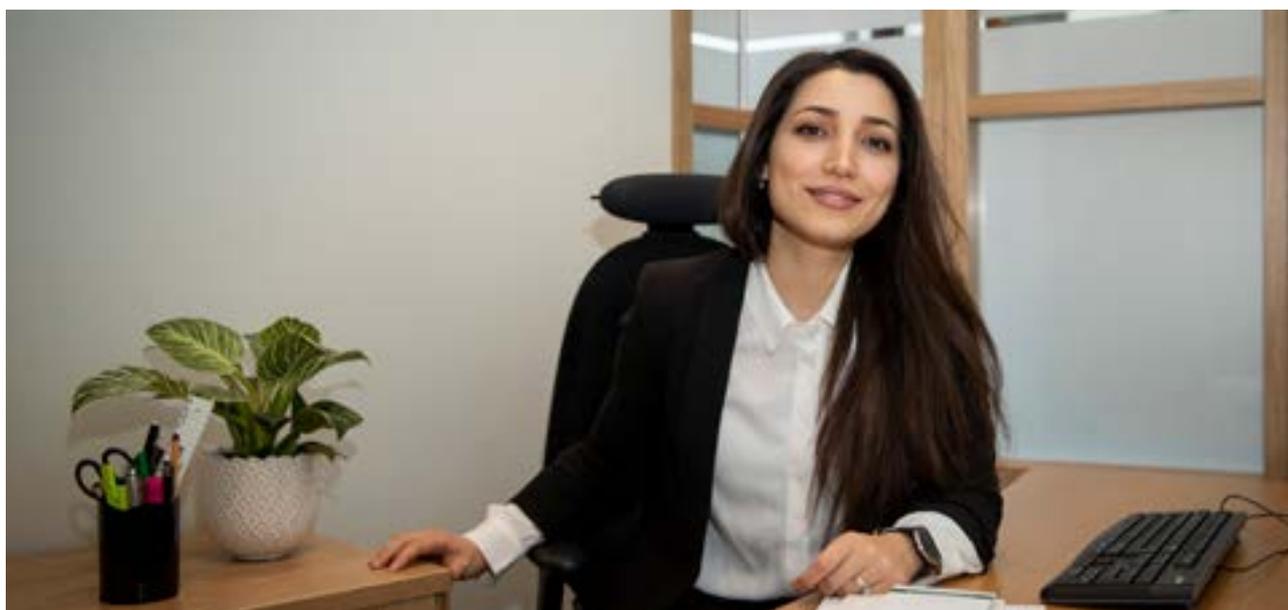

### A new life

Later she got a phone call, saying “The job is yours.” This marked the beginning of a new life in Åland.

“In Iran, I’d worked as an accountant at a large sweets company, and the tasks performed by a portfolio administrator were completely new to me. But I’m so motivated and want to take on my responsibilities and do my very best all the time. I learn new things every day, and I’m incredibly grateful to my supervisor and my colleagues. They help me and answer all my questions. Now, after more than a year in my position, I’m beginning to feel comfortable,” she says.

People might wonder: How did Eli end up in Åland? The answer is simple: love. She met her husband, Karo Amin – who was born in Iraqi Kurdistan – when he was on a visit to Iran. He had worked in Åland for many years and wanted to continue living here.

“Of course it’s a major adjustment, arriving in Mariehamn from a huge city like Tehran with a vibrant atmosphere – getting used to silence and empty streets. But after I landed my job at the Bank of Åland, which means so much to me, Åland feels more and more like our real home. Now we’ve also started to build our own house in Mariehamn,” she says.

Photographer: Therese Andersson

## Collaboration benefits Baltic Sea

The Bank of Åland has supported the important work of various environmental organisations for more than 20 years. Through the Baltic Sea Project, the Bank has funded projects that promote a healthier Baltic Sea since 2014. Funding is divided into five different categories – digital innovations, concrete kilograms, engaging projects, local water protection projects as well as children’s and youth projects.

In 2020, the Baltic Sea Project strengthened its cooperation with Finland’s largest Baltic Sea actors by funding their projects and efforts to promote the well-being of the Baltic Sea.

Among the recipients were a number of major actors around the Baltic Sea such as the Baltic Sea Action Group, the John Nurminen Foundation, the Keep the Archipelago Tidy Association, WWF Finland and Race for the Baltic. In 2020 the Bank of Åland initiated long-term collaboration with the John Nurminen Foundation, becoming its main sponsor and providing EUR 80,000 in funding. In 2019 the Bank joined forces with the Baltic Sea Action Group to launch the Living Baltic Sea project to promote greater marine biodiversity. In 2020 the Bank expanded this collaboration and provided EUR 80,000 in funding.

## Largest amount to Åland

Emmaus Åland was granted two years of funding, totalling EUR 120,000 euros. This was the largest single funding decision in 2020. It will enable Emmaus Åland to pursue its project illustrating the water cycle and how it affects us and our natural surroundings.

To strengthen the ReGeneration 2030 movement, whose members are youth and young adults in the Nordic and Baltic Sea regions, EUR 50,000 in funding was provided in order to establish a foundation. Its objective is to create a sustainable society in line with the UN sustainable development goals.

In prior years, funding from the Bank of Åland’s Baltic Sea project enabled various startup companies to launch and expand their business.

Among applications were a variety of proposals and solutions to improve the health of the Baltic Sea. As in prior years, reducing plastic waste and recycling waste and other materials were recurring themes.

“I’m really pleased that we again received numerous applications for innovations aimed at improving the state of the Baltic Sea,” says Anne-Maria Salenius, head of the Bank’s Finnish mainland operations and chairperson of the Baltic Sea Project jury.

## Our contribution to the UN sustainable development goals

**In recent years, the 17 United Nations sustainable development goals have been a source of guidance in our sustainability work. As part of our materiality analysis, in 2019 we included for the first time all 169 targets that are associated with the UN's global goals.**

In 2020, we carried out a more in-depth analysis based on these targets in our materiality analysis, which means that for the first time we can report our operations based on them. We use the materiality analysis to examine our operations from four perspectives: our responsibility as a lender, investments, the environment and social issues.

With the insights and lessons learned from our 2019 work, the materiality analysis for 2020 was more comprehensive than before. For this reason, our reporting of the Group's operations is now directly linked to the UN's global goals and their related targets.

Our commitment and our efforts focus on four of the global goals:

- Sustainable energy for all
- Life below water
- Climate action
- Decent work and economic growth

Our ambition is to define further long-term objectives in these areas during 2021.

The purpose of the Bank's materiality analysis is to identify areas for short- and long-term sustainable development. The analysis is based on the requirements or needs of our identified stakeholder categories plus other business intelligence and identified areas where the Bank's operations have a positive or negative impact based on the UN global goals.

The number of stakeholders is growing rapidly. This is due to several reasons. First, there is increasing awareness and interest in sustainability issues, and second, there is growing concern about climate change. Meanwhile public authorities, the media and others are showing a greater sense of commitment. In addition, our ever-broadening stakeholder categories include customers, employees, shareholders, competitors, resellers, suppliers, recruitment candidates, business partners and society at large (citizens, interest groups, political leaders).

Contact with the above stakeholders takes place continuously and through many different channels. Dialogues are initiated both by the Bank of Åland and by the stakeholders. The common denominator is that people expect transparency, credibility and more information than a few years ago.

Our materiality analysis for 2020 made it clear that other UN goals besides the four mentioned above are also important to us and our stakeholders. Our development plans thus also include these goals.

Analysing one's operations from a global sustainability perspective can be challenging. But at the same time, the insights that this work provides are an important factor that drives sustainability issues forward. One example of a challenge is the two UN goals "No poverty" and "Zero hunger", which we have discussed extensively. Although on an emotional level these goals feel extremely important, we are forced to realise – and to admit – that we are not currently contributing to them. On the other hand, we are convinced that in the long run we will be able to pull our weight in terms of furthering those goals.

In the following pages, we provide an overview of our sustainability efforts and how we connect them to the UN goals. Sustainability is a natural element of our operations, and this year we have integrated our sustainability reporting into the existing chapters of our Annual Report.

## 7 AFFORDABLE AND CLEAN ENERGY

### Targets

#### 7.2 Increase the share of renewable energy in the world

By 2030, increase substantially the share of renewable energy in the global energy mix.

#### 7.3 Double the increase in energy efficiency

By 2030, double the global rate of improvement in energy efficiency.

#### 7.a Promote access to research, technology and investments in clean energy

By 2030, enhance international cooperation to promote access to clean energy research and technology, including renewable energy, energy efficiency and advanced and cleaner fossil-fuel technology, and promote investment in energy infrastructure and clean energy technology.

## Affordable and clean energy

Our ambition is to raise awareness about our carbon dioxide emissions. We shall continuously reduce these emissions, among other things through sustainable consumption, production and energy use. We offer solutions to our customers that contribute to climate transition through continuous development of a sustainable product range.

### WE PROVIDE GREEN INVESTMENT PRODUCTS

We offer our customers mutual funds that invest in wind power.

### WE INVEST IN WIND FARMS

By investing in wind farm projects, we help increase the share of renewable energy in the Nordic and Baltic countries.

### AT LEAST 90% FROM RENEWABLE SOURCES

We maximise the use of renewable energy in the Group, including our own solar energy production and purchased renewable energy (read more on page 39).

Target for  
2021:  
90%

### SUSTAINABLE ENERGY USE

90% of all energy via renewable sources ("green" energy)

Photographer: Anton Sucksdorff

# Decent work and economic growth

Our operations are continuously growing. We are a sizeable employer in the Åland community, thus contributing jobs and tax revenues to the community. As an employer, the Bank maintains decent working conditions based on collective-bargaining agreements and current regulations. We work actively to promote social sustainability, encompassing inclusion, equal worth, sound values and a strong commitment to the community, as well as following regulations and requirements to help combat corruption, money laundering and other criminal activities.

## RESPONSIBLE LENDING

To us, it is important to ensure that a customer has sufficient repayment capacity and that a loan meets the customer's needs. We endeavour to integrate sustainability risk into our risk assessment when approving new loans.

## INTEGRATION AND DIVERSITY

We welcome work and language trainees and contribute to employment, Integration and diversity (read more on page 8)

## EQUAL PAY FOR EQUAL WORK

We apply a salary model and carry out a yearly salary survey that ensures equal pay for equal work.

## BUSINESS PARTNERSHIPS

In collaboration with business partners in the fintech sector, we achieve financial efficiency and technological innovation. By working with partners that share our values, we contribute to sustainable development (read more on page 22).

## LOCAL AND GLOBAL COMMITMENT

We are a proactive member of the business community and have a strong social commitment, especially in Åland. We participate in various networks and share our expertise and experience when asked to do so.

## 8 DECENT WORK AND ECONOMIC GROWTH

### 8.1 Sustainable economic growth

Sustain per capita economic growth in accordance with national circumstances and, in particular, at least 7 per cent gross domestic product growth per annum in the least developed countries.

### 8.2 Diversify, innovate and upgrade for economic productivity

Achieve higher levels of economic productivity through diversification, technological upgrading and innovation, including through a focus on high value added and labour-intensive sectors.

### 8.3 Promote policies to support job creation and growing enterprises

Promote development-oriented policies that support productive activities, decent job creation, entrepreneurship, creativity and innovation, and encourage the formalisation and growth of micro, small and medium sized enterprises, including through access to financial services.

### 8.5 Full employment and decent work with equal pay

By 2030, achieve full and productive employment and decent work for all women and men, including for young people and persons with disabilities, and equal pay for work of equal value.

### 8.8 Protect labour rights and promote safe working environments

Protect labour rights and promote safe and secure working environments for all workers, including migrant workers, in particular women migrants and those in precarious employment.

### 8.10 Universal access to banking, insurance and financial services

Strengthen the capacity of domestic financial institutions to encourage and expand access to banking, insurance and financial services for all

# 13 CLIMATE ACTION

## 13.1 Strengthen resilience and adaptive capacity to climate-related disasters

Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters in all countries.

## 13.2 Integrate climate change measures into policies and planning

Integrate climate change measures into national policies, strategies and planning.

## 13.3 Build knowledge and capacity to meet climate change

Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning.

# Climate action

We endeavour to continuously reduce our carbon dioxide emissions by means of sustainable consumption and production, as well as sustainable energy use and business travel and a range of products that aim at reducing carbon dioxide emissions. We enable our customers to increase their environmental awareness via the Åland Index and via our business partner Doconomy.

## SUSTAINABLE INVESTMENTS

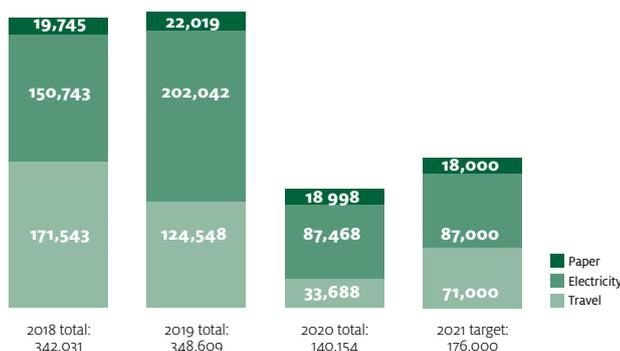

Our investment process includes analyses from the global index supplier MSCI. We monitor company data related to such matters as the environment, social responsibility, corporate governance, sustainability risks and combating climate change. This gives us a clearer overall picture of each company that is analysed. We offer our customers Nordic Swan Eco-labelled funds with the ambition of expanding our product range further. We measure the carbon dioxide intensity of our mutual funds (read more on page 18).

## REDUCED CARBON DIOXIDE EMISSIONS

We transparently report our carbon footprint from business travel, electricity and paper consumption each quarter. Our footprint shrank by a full 60 per cent during 2020 thanks to proactive decisions, but also because the coronavirus pandemic made many business trips impossible. Our long-term objective is to become completely climate neutral (see chart below).

Prioritisation in the Bank's transport work:

## ÅLAND INDEX

The Åland Index is one of our most important tools for raising awareness among our customers and employees about their own carbon footprint. Thanks to the index and our work to ensure a healthier Baltic Sea, our customers' awareness has increased. In our yearly survey of Premium and Private Banking customers, 67 per cent said they were familiar with the Åland Index and 23 per cent said it had affected their consumption habits. A growing number of organisations worldwide are starting to use the Åland Index. In the next three years, 3 billion people are expected to be offered this opportunity (read more on page 22).

## Doconomy

92,000,000

Bank customers worldwide can monitor the carbon footprint of their card purchases via Åland Index Solutions.

# Life below water

Through the Baltic Sea Project and the Baltic Sea Account, we and our customers work together to help reduce pollution in the Baltic Sea. Various stakeholders are offered the opportunity to receive funding to implement their ideas for achieving a cleaner Baltic Sea.

We have been doing this since 1997. Our environmental work is based on our geographic location in the middle of the Baltic Sea.

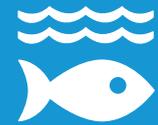

## THE BALTIC SEA PROJECT

Via the Baltic Sea Project, we distribute at least EUR 500,000 yearly to projects that promote a cleaner Baltic Sea. We regularly discuss the Baltic Sea Project and the Baltic Sea Account with our stakeholders and invite them to join our efforts (read more on page 9).

ÖSTERSJÖPROJEKTET  
BALTICSEAPROJECT  
ITÄMERIPROJEKTI 

**€ 2,800,000**  
funding good ideas for the  
environment since 1997.

## 14 LIFE BELOW WATER

### 14.1 Reduce marine pollution

By 2025, prevent and significantly reduce marine pollution of all kinds, in particular from land-based activities, including marine debris and nutrient pollution.

### 14.2 Protect and restore ecosystems

By 2020, sustainably manage and protect marine and coastal ecosystems to avoid significant adverse impacts, including by strengthening their resilience, and take action for their restoration in order to achieve healthy and productive oceans.

### 14.3 Reduce ocean acidification

Minimise and address the impacts of ocean acidification, including through enhanced scientific cooperation at all levels.

### 14.5 Conserve coastal and marine areas

By 2020, conserve at least 10 per cent of coastal and marine areas, consistent with national and international law and based on the best available scientific information.

### HEALTH AND WELL-BEING

Ensure healthy lives and promote well-being for all at all ages

We strive to maintain a good physical and psychological work environment, as well as a high level of commitment among all employees. In 2020, employee commitment was 77 on a scale of 0–100. This is a decrease from the previous year, when it was 78, but we still see this as a positive confirmation that we have managed to maintain a high level despite the coronavirus pandemic. Our long-term target is a commitment index above 80.

As for the psychological work environment, we have zero tolerance for discrimination, harassment and bullying. Through dialogue, education, awareness, clear guidelines and resolute action, our goal is openness and a safe environment for all.

### CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all

The world’s water resources are rapidly shrinking. This is why we want to increase awareness within the Group by means of efficient water use. We need to review our methods for measuring and analysing water consumption, which will also include a more detailed follow-up.

Thirty years ago the Bank of Åland was a co-founder of the Stockholm Water Prize, which is awarded by Stockholm International Water Institute (SIWI). We still contribute funding for this annual prize.

We have informally eco-labelled (“kranmärkt”) the water taps in our offices, which means that we only serve non-bottled water.

### QUALITY EDUCATION

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

We create conditions that enable our customers to study by offering them student loans as well as affordable and specially tailored banking services for students.

The Bank of Åland donates scholarship money to the Åland schools each year and we also offer internships and language training (read more on page 42).

### INDUSTRY, INNOVATION AND INFRASTRUCTURE

Build resilient infrastructure, promote inclusive and sustainable industrialisation and foster innovation

We support local entrepreneurship in Åland by providing funding guaranteed by the European Investment Fund (EIF). Our ambition is to contribute to greater awareness of sustainability issues among our corporate customers. This is done primarily through a dialogue about a company’s sustainability plans at the time of lending.

### GENDER EQUALITY

Achieve gender equality and empower all women and girls

We contribute by judging all customers and their repayment ability on the same basis. In the Group’s gender equality work, we aim at achieving at least 40/60 gender balance when filling job openings. At team and department levels, as well as in certain positions, there may still be imbalances.

We make a conscious effort to ensure that all employees enjoy equal rights and opportunities with regard to compensation and professional development. Our salary model and annual salary survey aim at ensuring equal pay for equal work.

### REDUCED INEQUALITY

Reduce inequality within and among countries

All employees must enjoy the same rights regarding professional development.

As for the psychological work environment, we have zero tolerance for discrimination, harassment and bullying. Through dialogue, education, awareness, clear guidelines and resolute action, our goal is openness and a safe environment for all.

We judge all customers and their repayment ability on the same basis. Our salary model and annual salary survey aim at ensuring equal pay for equal work.

## SUSTAINABLE CITIES AND COMMUNITIES

**Make cities and human settlements inclusive, safe, resilient and sustainable**

Through the Bank's two real estate mutual funds – Bostadsfonden and Tomtfonden – we contribute to urban infrastructure, while generating jobs.

In the premises where we work, we are expanding waste recycling and are thereby helping to reduce our environmental impact. Our employees are encouraged to use fossil fuel-free modes of transport or use public transport.

## LIFE ON LAND

**Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss**

Through the Åland Index, we are increasing awareness among our employees and customers about their personal carbon footprint. At the same time, we are working to reduce the Bank's carbon dioxide emissions. Our employees are trained and engaged in sustainability and environmental work, among other things through local keep-nature-clean-projects.

## RESPONSIBLE CONSUMPTION AND PRODUCTION

**Ensure sustainable consumption and production patterns**

We communicate openly and transparently about our investments. Sustainability data from index provider MSCI are included in our investment management. We take responsibility for our investments and influence by voting at corporate annual meetings and participating in nomination committee work. We continuously train our employees about sustainability issues, including responsible lending and responsible investments.

We provide financing to local producers and enterprises, while excluding financing for companies in the weapons trade and customers associated with a high risk of illegal financial flows.

## PEACE, JUSTICE AND STRONG INSTITUTIONS

**Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels**

We maintain high ethical standards and follow both regulations and policy documents on ethical conduct as well as identifying and managing conflicts of interest. Through educational efforts and technical development, we help combat corruption, money laundering and other criminal activities.

Our corporate culture is characterised by openness to different opinions. There is a high level of commitment within our organisation and we are continuing our efforts to improve it.

## PARTNERSHIPS FOR THE GOALS

By connecting our operations to the UN's sustainable development goals and by being transparent, we are helping make these goals known to our stakeholders.

Thanks to several business partnerships, we are able to contribute to national and global awareness of sustainable development.

We have adopted the UN principles for responsible banking and responsible investment.

## Strong growth due to high level of trust

Photographer: Viktor Fremming

Magnus Johansson, Director of the Sweden Business Area; Mikael Mörn, Director of the Åland Business Area; and Anne-Maria Salonius, Director of the Finnish Mainland Business Area.

**The Private Banking business segment encompasses Private Banking operations in Åland, on the Finnish mainland and in Sweden as well as asset management (Ålandsbanken Fondbolag Ab, Ålandsbanken Fonder Ab, Ålandsbanken Fonder II Ab and Ålandsbanken Fonder III Ab).**

Our Private Banking offering is one of the cornerstones of the Bank's business operations. Private Banking is where the Bank of Åland has its largest market share both on the Finnish mainland and in Sweden.

Net operating profit from Private Banking in 2020 amounted to EUR 29.3 M, which was equivalent to 74 per cent of the Bank's total net operating profit. Return on allocated equity was 24.2 per cent. Actively managed assets rose by 17 per cent.

Private Banking continued to attract new customers in all three geographic home markets. During 2020 a number of new members were added to the team in order to meet heavy demand and be able to serve customers in the best way. There are many indications that recruitments will continue during 2021.

Due to the coronavirus pandemic, most customer meetings and customer events have taken place in digital formats, but the Bank's customer surveys show that customers continue to appreciate us greatly, especially due to the Bank's expertise and personalised service as well as high ethical standards and sustainability work.

### ASSET MANAGEMENT

Ålandsbanken Fondbolag manages the Bank of Åland's mutual funds and, as an intra-Group service, delivers all material supporting the Bank's asset management

services to customers: from overall market outlook reports and asset allocation recommendations to model portfolios for individual securities.

The final outcome of our management of most Bank of Åland mutual funds and asset management mandates for the full year 2020 was in line with or above our expectations. This outcome was supported by the strong recovery of the stock market.

The corporate bond market was worst affected by the coronavirus pandemic and experienced a crisis during March and April. Liquidity practically disappeared from the corporate bond market, which also affected the performance of the Bank of Åland's fixed income funds. Yet our customers did not panic in this weak market situation, as did various other fund management companies and banks, which in some cases were forced to halt fund redemptions in order to secure their fund management. We interpret the healthy calm of our own customers as a result of good advisory services when they made their investments. Our customers have been aware of the risk level and potential returns on their investments. By the end of 2020, the Bank of Åland's fixed income funds had recovered in valuation terms to pre-crisis levels and had also attracted a large proportion of new assets under management by investors who saw an opportunity to take advantage of the recovery in the fixed income market. It is especially gratifying that the Ålandsbanken Green Bond ESG fund grew by EUR 40 M in new capital during the year.

After last spring's initial coronavirus crisis, stock markets in particular entered a strong recovery phase. In light of this, the timing of our launch of the new Ålandsbanken Nordiska Småbolag equity fund – specialising in small and medium sized enterprises (SMEs) – was very successful. The fund has provided very strong returns from the start, both in absolute and relative terms. It attracted a total of EUR 46 M in investments during 2020 and also helped to further raise the profile of Ålandsbanken Fondbolag as a Nordic equities manager.

Other equity funds and equity management mandates performed largely in line with the markets during 2020.

Among equity funds, we can be pleased about receiving another Nordic Swan

Ecolabel. The global equity fund Ålandsbanken Global Aktie was awarded this label in October for its sustainable investment strategy. Among other things, the Nordic Swan Ecolabel requires a fund not to invest in fossil fuel-related operations. The global equity fund, with managed assets of more than EUR 1 billion, is the Bank's largest equity fund and one of the largest in Finland. The reason why this became our first fossil-free fund is that there is a broad spectrum of attractive companies that can replace investments in companies with traditional fossil energy operations. The narrower the market, the harder it is to find good replacements for companies that are no longer potential investments. However, we plan to expand the number of fossil-free alternatives. Our Nordisk Småbolag fund, specialising in Nordic SMEs, is also fossil fuel-free in nature.

Our housing mutual funds continued their solid performance during 2020. Ålandsbanken Bostadsfond carried out several successful property divestments that resulted in strong returns to fund investors.

Ålandsbanken Tomtfond, which specialises in housing sites, continued to perform as expected. Activity in the housing site market increased during 2020. The fund identified a larger number of attractive investment opportunities than in prior years, which allowed it to bring in more capital. During the year, nearly EUR 70 M in new capital flowed into the fund.

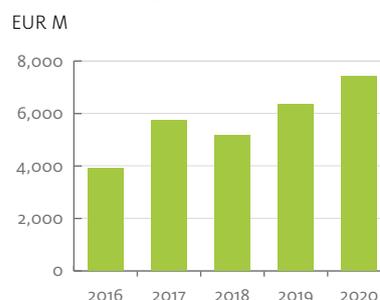

During the summer and autumn, asset management staff devoted significant efforts to acquiring a permit for the new Ålandsbanken Vindkraft Specialplaceringsfond. Investing in wind power via an open special placement fund with trading opportunities twice a year is new to investors in the Finnish mutual fund market. The fund attracted heavy interest. During its launch in November and December, the fund attracted EUR 60 M in capital. Late in 2020 the fund bought its first wind farm.

Today the wind power fund appears to have solid growth prospects. Wind power is the cheapest way to produce electricity, and the business is profitable without government subsidies. Meanwhile global climate goals are becoming stricter, requiring reduced emissions from fossil fuel energy production. Combined with very rapid

developments in turbine technology for wind power production in recent years, this gives the fund good potential.

According to the mutual fund report published in December 2020 by the trade organisation Finance Finland, net flows of new capital into Finnish mutual funds totalled EUR 1.2 billion during the year. This implies that the net inflows of EUR 215 M into the Bank of Åland's mutual funds during 2020 represented a market share of about 18 per cent, compared to the Bank's share of total Finnish mutual fund market assets, which was less than 3 per cent.

Actively managed assets

## More customers have financial investment potential

**All individual and corporate customers who are not Private Banking customers are reported in the Premium Banking business segment. The Bank's Corporate Services unit in Åland is also part of this segment.**

During 2020 the Premium Banking concept continued its focus on asset management business, mainly for customers in the upper segment of its target group who have large investable resources. Growth in actively managed assets was again very high. Deposits also continued to grow. Even though the Bank of Åland chose not to participate in price competition in the home mortgage market, but instead to concentrate on providing personalised service and advice, lending volume also increased.

Net operating profit from Premium Banking totalled EUR 6.2 M in 2020. Earnings were lowered by large impairment loss provisions. Before write-downs, net operating profit increased by 8 per cent and totalled EUR 10.3 M.

Customer surveys continue to confirm that our customers appreciate the personalised service we provide. To a great extent, they are willing to recommend us to their friends.

During the year, we launched share trading via the Internet account in Sweden, which our customers had requested.

The number of Premium Banking customers is largest on the Finnish mainland.

Sustainability considerations follow us in everything we do. Among other things, we are ambitiously involved in both new sustainable mutual funds and our Baltic Sea Project. With our debit cards and Åland Index, we are raising awareness about sustainability issues. We encourage our employees to travel to and from their workplace in climate-smart ways, we avoid unnecessary paper consumption and we have expanded remote working opportunities.

During 2021 we will continue to work towards profitable growth. A special focus area will be investments on behalf of wealthy private individuals. One innovation in 2021 will be that, as the first bank in Finland, we will offer a share savings account with discretionary management, a product that provides a very good complement to our mutual fund offering

### THE ÅLAND CORPORATE SERVICES UNIT

The Bank of Åland's Corporate Services unit is the market leader in Åland and offers a wide range of services and products adapted for Åland-based companies. The target group is broad and includes small and medium sized businesses as well as large corporations with international operations. The number of corporate customers continued to grow during 2020 and the level of customer activity was high.

During 2020 the Corporate Services unit worked actively to offer Åland-based companies liquidity loans supported by the Åland provincial government to bridge over the negative impact of the coronavirus pandemic and related restrictions on their operations. The Åland business community is also being offered funding guaranteed by the European Investment Fund (EIF). With the help of EIF guarantees, the Bank's capital and credit risk expenses are decreasing. This, in turn, benefits companies. As a result, the Bank of Åland has been able to offer better funding conditions for small and medium sized companies, for example to expand their operations or make environmental or sustainability-related investments.

The ambition of the Corporate Services unit is to be in the forefront in supplying the Åland business community with capital to invest in our transformation to a more sustainable society.

During 2020 the Corporate Services unit continued its involvement in projects and working groups organised by the Åland Chamber of Commerce and the Åland provincial government. In this way, we want to contribute to a positive view of entrepreneurship and give business owners the opportunity to get started or expand their operations more easily with the help of effective tools.

## International partnerships provide economies of scale

Photographer: Kjell Söderlund

Sofie Holmström, Manager of the Partnerships Business Area.

**The Bank of Åland's external partnerships include collaboration with Swedish fintech companies, service deliveries in the payments field in Sweden and Finland and delivery of complete services to a new Swedish mortgage company. Increasing collaboration related to home mortgage loans in the Swedish market is showing growth, while partnerships related to sustainability and the Åland Index are having an impact on sustainability efforts worldwide.**

Partnerships are a success factor as digitisation generates a wave of innovation and tech start-ups in the financial services sector. The Bank of Åland was among the pioneers of this trend, having initiated its first fintech partnership as early as 2015 with the Swedish-based Dreams Nordic AB.

In 2020, external partnerships became a fully integrated element of the Bank of Åland's operations. During the year, collaboration with Dreams grew in terms of business volume for deposits and mutual

fund savings. The Bank's products and services are thus reaching more and more customers. Via its mobile app, Dreams offers a customer experience that focuses on financial well-being, using the Bank of Åland's services for account management, payments services, bank savings and mutual fund savings in the Swedish market. In the upcoming launch of Dreams elsewhere in Europe, the Bank of Åland will serve as a partner in payment services.

Dreams is also planning to broaden its

product range in Sweden during 2021 by launching a product that will help private individuals become debt-free more quickly and achieve balanced personal finances.

The Partnerships business area is also growing as a result of collaboration that is emerging in the Swedish home mortgage loan market. Together with ICA Bank, Ikano Bank and Söderberg & Partners, the Bank of Åland is developing the jointly owned mortgage company Borgo. All four co-owners in Borgo will distribute their own mortgage loans via the new company. The Bank of Åland will be responsible for service deliveries to Borgo in the lending field, payments and account management as well as accounting and treasury operations. During 2021 the Swedish Financial Supervisory Authority is expected to grant Borgo a permit as a credit market company and an issuer of covered bonds. Until permits are granted, the Bank of Åland has a distribution agreement with ICA Bank, under which ICA Bank is offering its mortgage loans through the Bank of Åland.

Sustainability permeates all of the Bank's partnerships in a natural way, since digital tools require neither paper products nor travel to personal meetings. Via its collaboration with the fintech company Doconomy, the Bank of Åland is helping to lead the banking world towards greater awareness and opportunities to track our environmental footprint. Doconomy was established in 2018 and launched its DO mobile banking service in 2019, enabling private individuals to easily track their climate impact and compensate for it, both via certified climate compensation and sustainable savings. In 2020 Doconomy expanded its product range by launching a credit card linked to its DO app, where customers see their carbon footprint from every card transaction. During 2021 the aim is to offer customers mutual fund savings with the help of a selection of sustainable investment products.

The Bank of Åland and Doconomy are co-owners of Åland Index Solutions, a company that delivers Doconomy's

product range to other companies. These products are based on the Åland Index, the Bank's climate impact calculation standard, and during 2020 Åland Index Solutions made a large-scale international breakthrough.

Thanks to Åland Index Solutions, climate-aware users in the United States, Germany, Italy and the Nordic countries can now measure their climate impact and change their consumption habits. During 2020 Doconomy expanded its partner banks from Bank of the West (a U.S.-based subsidiary of France's BNP Paribas) and the Nordic-based bank Nordea to also include Flowe, part of Italy's Banca Mediolanum. Late in 2020, Doconomy also announced partnerships with Germany's Oldenburgische Landesbank and Italy's Findomestic Banca, a unit of BNP Paribas. By the end of 2020, 92 million people had the option of accessing the Åland Index via banks all over the world. During 2021 additional market players are expected to embrace Doconomy's product range, and the target is to reach a billion people worldwide by the end of 2021.

During 2020 Doconomy added to its offering a method for calculating carbon dioxide emissions at the product level. The company's "2030 Calculator" enables manufacturers to easily calculate the cradle-to-gate carbon footprint of their products and display it to their customers. Thanks to the 2030 Calculator, consumers can make better-informed everyday choices, basing their purchasing decisions on comparing price, quality and carbon footprint.

Together with its information technology subsidiary Crosskey, the Bank of Åland also has partnerships with companies in paytech, the payments field in fintech. Based on its long-time presence in both the euro and SEK areas, the Bank of Åland can offer innovative payment services to many different players in the financial sector. The main markets are Sweden, Finland and the rest of the Single Euro Payments Area (SEPA).

## An important reason behind the Bank's success

Photographer: Viktor Fremling

Tove Erikslund, Chief Administrative Officer; Jan-Gunnar Eurell, Chief Financial Officer; and Juhana Rauthovi, Chief Risk & Compliance Officer.

### CFO Corporate Unit

*Chief Financial Officer Jan-Gunnar Eurell is in charge of the Treasury and Group Finance departments. The CFO Corporate Unit has more than 30 employees in Mariehamn, Helsinki and Stockholm.*

Treasury is responsible for optimising the Bank of Åland's portfolio and liquidity management. The department ensures that the Bank can meet its need for cost-effective refinancing in both the short and long term. Its responsibility for portfolio management

also includes managing the interest rate, foreign exchange and liquidity risks that the Bank's business operations transfer to Treasury via internal prices.

Treasury manages a portfolio of about EUR 1.3 billion, of which about EUR 1.0 billion is the Bank's liquidity reserve. About 10 per cent of the holdings of debt instruments in the Treasury portfolio consist of green bonds. Treasury manages capital market borrowing of about EUR 1.9 billion. Treasury operations are highly important to the Bank's earnings. Fortunately, the trend towards falling capital market funding costs continued during 2020.

The task of Group Finance is to deliver public information to the market and regulatory authorities, but also to develop and manage the Group's financial and business control. In addition, the department has Group-wide responsibility for the purchasing process, ownership of shared technical platforms and systems as well as workplaces and data warehousing.

The processes at Group Finance maintain high standards, with consolidated financial statements and internal financial control reports ready on the fifth banking day after each report period. Estimated customer

analysis and profitability reports are updated from the data warehouse. Work station equipment has gradually been modernised and rationalised, enabling the department to successfully manage the need for remote work during the coronavirus pandemic. A multi-year, systematic effort to streamline purchasing and supplier relationships has led to gradually lower expenses for purchased services. The last big piece of the puzzle for the department was to improve the efficiency of ledger systems, which it achieved during 2020.

During 2021 the CFO Corporate Unit will continue its efforts to streamline and raise the quality of its work processes. Service deliveries to the new Swedish mortgage company Borgo, which is an associated company, will have a major impact on the corporate unit.

An additional Tier 1 (AT1) capital issue during the first half of 2021 will further reinforce the Bank of Åland's already strong capital adequacy ratios. If possible, the Bank will issue its first green instruments during 2021.

Starting in 2020, the Bank of Åland integrated sustainability information into its interim reports. There are increasing demands for systematic reporting of various targets and key ratios in compliance with the United Nations declarations that the Bank of Åland has signed, for example the UN Principles for Responsible Banking. The Bank's ambition is to increasingly integrate sustainability as a natural element of its financial reporting.

#### CAO Corporate Unit

*Chief Administrative Officer Tove Erikslund is in charge of the following departments: Business Support, Business Support Capital Market, Customer Service @ Market Support, Business Development and Human Resources. The CAO Corporate Unit has about 120 employees in Mariehamn, Helsinki and Stockholm.*

The Business Support Capital Market and Business Support departments are the largest clients of the Bank's prioritised development projects. During 2020 the main focus continued to be development work based on regulatory requirements. About 40 per

cent of prioritised development investments are based on regulatory requirements.

Although the CAO Corporate Unit will continue to perform development work connected to regulatory requirements in 2021, the influx of new regulatory requirements is expected to decrease. Starting in 2022 this will lead to a welcome shift in development resources towards efficiency improvements, increased digitisation and the customer experience. Adjustments to regulations connected to the capital market were previously the biggest area. Today adjustments to regulations in the payments and credit areas are now also required to a greater extent.

During the year, efficiency improvement projects focused on reducing licensing expenses for IT systems, developing functionality that decreases administrative time for customer advisors and reducing internal paperwork at the Bank. To run efficient back office operations, it is increasingly important to develop common processes and systems for all business areas and different customer segments. IT development for the Bank's business partners and management of these services are creating new requirements.

During 2020 a change of systems for the management of customer documentation made it possible to achieve cost savings related to IT systems and a standardisation of the way customer documents are handled across different business areas. As part of the Bank's efficiency improvement work, the Bank placed Robotic Process Automation (RPA) technology in service; this will be one focus of future development work.

A large proportion of development work during 2020 was related to the Bank's investment in the Swedish mortgage company Borgo, where the Bank will supply its platform service.

In the digitisation field, a number of innovations and improvements were made in the Internet Office and the Mobile Bank. For example, share trading was launched in Swedish operations, both via the Internet Office and the Mobile Bank.

For all customers who use the Mobile Bank, the Bank added options for ordering a new debit card and for activating dark mode on their screen, which prolongs battery life on a mobile phone, for example.

The Internet Office and the Bank of Åland website have also been adapted to increase accessibility for customers with various special needs.

During 2020 the Bank's range of services expanded to include a share savings account for customers in Åland and on the Finnish mainland. Credit and debit cards were also delivered to Doconomy.

Development work related to anti-money laundering and combating the financing of terrorism (AML/CFT) is continuously under way, since the field is steadily growing and banks are required to meet ever-higher standards. Meanwhile the Bank's customer segments are expanding, among other things via our business partners. During 2020 the EU's Fifth Money Laundering Directive went into effect, and the Bank of Åland has adapted its processes accordingly.

The volume of cases handled by Customer Service continued to increase during 2020. Customers can contact the Bank via telephone, the Internet Office messaging service, email or online chat. One explanation for the increase in cases is the accessibility offered by the Mobile Bank. During 2020 the number of cases per month averaged about 13,700, compared to 12,500 in 2019. More and more customers are choosing to activate their e-ID, which makes it easier to identify themselves as well as log into the Internet Office and Mobile Bank.

The surveys that we continuously conduct show that Customer Service maintains high quality in its encounters with our customers. The surveys provide comparative background data on some 20 other banks in Finland and Sweden. The Bank of Åland's Net Promotor Score (NPS) of 49.2 represents an improvement over last year, when its NPS was 46.2. The banking sector's average was 31.4. General satisfaction with Customer Service was 88.5 per cent during the year, compared to 87.7 for the banking sector.

An updated visual concept for internal and external communication was developed during 2020 in collaboration with the Bank's business areas. The overall visual theme is the Bank's Åland origins.

For Human Resources, the focus during 2020 was on managing the coronavirus crisis. During some periods, a large proportion

of employees worked remotely. For those who were present at their regular work stations, the department worked to minimise infection risk. To monitor employee well-being, regular surveys were conducted. Index levels for job dedication and working environment remained at encouragingly high levels, despite the pandemic.

During 2020 the Bank of Åland placed in service a new e-course management platform, which improves our ability to measure training programmes at the Bank. During the year, 119 Group employees participated in the mandatory introductory training course for newly hired staff.

The CAO Corporate Unit works continuously to reduce printouts and physical mailings, but various regulatory requirements include increased reporting, which in turn contributes to increased paper consumption. Employees have a high level of awareness about sustainability issues – with an emphasis on environment, climate and social responsibility – and this ensures a strong sense of commitment, initiative-taking and openness.

## CRO Corporate Unit

*Chief Risk & Compliance Officer Juhana Rauthovi is in charge of the Risk Control, Compliance, Operational Risks & Security, Legal Affairs, Credit Scoring and Credit Processes departments. The corporate unit consists of about 60 people in Mariehamn, Helsinki and Stockholm.*

The Risk Office Corporate Unit is primarily entrusted with protecting the Bank of Åland's assets, earnings and brand by providing a framework for risk and credit management. Its purpose is to maintain a healthy risk culture that corresponds to the Bank's risk appetite and risk-bearing ability. Despite the coronavirus pandemic, the Bank of Åland's total risk level is low. This is a clear sign that the Bank's credit strategy has worked well, despite a stressed situation and an economic downturn.

The Risk Control department is responsible for independent oversight and reporting of the Bank's financial risks. The 2020 financial year was dominated by new regulatory requirements, and this will continue during 2021. During 2020, Risk Control worked with a new internal definition of default and applied for approval of this definition by the

Financial Supervisory Authority. It also implemented a new supporting factor for small and medium sized enterprises in order to help them during the coronavirus pandemic.

During the 2021 financial year, the department will continue with implementation of new regulatory requirements, including the EU "banking package" and the Basel IV regulation. The Bank's credit risk models will be adapted to the new definition of default, while being changed to better reflect risk in the Bank's loan portfolios. The department will continue to develop processes for the services that will be delivered to the new mortgage company.

Risk Control also works with the Bank's sustainability plan and strategy as they relate to responsible lending. This work has two aspects: both to preserve those parts of the Bank's lending that already have a positive impact on sustainable development and to design its lending to ensure that it has a positive impact on selected targets under the UN sustainable development goals.

The Compliance department is responsible for independent oversight and reporting of the Bank's compliance rules. It provides advisory services and back-up to the Executive Team and business operations, as well as training on how to manage compliance risks to ensure that banking operations can follow regulatory requirements, with a focus on the interests of customers. The main areas for the department's oversight and monitoring are market behaviour, customer protection issues and combating money laundering and financing of terrorism. During 2020 Compliance worked with such areas as conflicts of interest and ethics, new and amended regulation of outsourcing arrangements and measures to prevent money laundering and financing of terrorism.

Operational Risks & Security is an independent department that provides backup and advisory services and sets standards for operational risk management. The department focuses on promoting a healthy risk culture by increasing awareness of operational risk and personal information management. In practice, this has included providing support to operations through risk mapping and contingency planning, analysis and reporting of operational risks, updating of internal regulations, training, participation in project work and in further development of the Bank's new product approval (NPA)

process. The department also provides back-up in the further development of authorisation structures. It takes initiatives for regular continuity drills and security reviews.

The Legal Affairs department is responsible for meeting the needs of the Bank and the Group for legal expertise, since the Bank operates as a credit institution and issuer of securities. The department works continuously to provide backup for both business areas and corporate units in developing and supplying products and services to the Bank's customers. During 2020 the department worked with the implementation of new regulations, modifications due to changes in the business environment, legal issues related to the new mortgage company and the expansion of existing business partnerships.

The Credit Scoring department develops and carries out credit analyses and oversight in order to ensure good credit quality in the Bank's lending. Despite the coronavirus pandemic, the proportion of unsettled loans in the lending portfolio remained at about the same level during 2020. There is good potential to keep the proportion of unsettled loans at current levels, provided the economy remains stable and real estate and share prices are steady as the pandemic begins to fade.

The department actively participates in the work of deliveries related to the new mortgage partnership as well as deliveries required by the European Banking Authority (EBA) guidelines on loan origination and monitoring.

The Credit Processes department is responsible for developing the Bank's lending process and ensuring that it fulfils internal and external regulations. During 2020 its focus was on implementation of coming new regulations, for example the new definition of default that went into effect on January 1, 2021 and the EBA guidelines on loan origination and monitoring, which go into effect during 2021. The department has also worked with developing a home loan platform for the new jointly owned mortgage company Borgo. During 2020 the coronavirus pandemic also required quick adjustments to enable the Bank to provide support measures for its loan customers. During 2021 there will be a continued focus on effective, scalable processes related to new regulations and the mortgage partnership.

## Continued sustainable growth at Crosskey

**Crosskey had a successful year in 2020. Net operating profit amounted to EUR 3.1 M, which was 10 per cent better than in 2019.**

In September a new, well-respected customer – Sweden’s Länsförsäkringar Bank – signed a contract to adopt Crosskey’s capital market system and capital market services in the Swedish market. After implementation, Länsförsäkringar Bank will be one of Crosskey’s largest capital market customers.

Crosskey’s largest project during 2020 was the implementation and development of a new banking platform to ensure the Group’s deliveries to the new mortgage bank Borgo, which a joint mortgage project of ICA Bank, Ikano Bank, Söderberg & Partners and the Bank of Åland in Sweden. According to plans, the launch will occur in 2021.

Implementation of wealth manager Garantum’s new capital market system in Sweden continued during 2020, and the launch will occur in 2021.

During 2020 Crosskey launched its project for the Swedish savings bank card company Sparbankernas Kort. The new card platform enables Sparbankernas Kort’s affiliated savings banks to sign up new credit card customers through a completely digitised card application process.

As a consequence of the coronavirus pandemic, in March Crosskey rolled out support for large-scale remote work within the Bank of Åland Group. Crosskey’s IT delivery enabled a large number of employees to perform their work assignments remotely.

Among the ongoing technical improvement projects during 2020 were more cloud solutions for a number of Crosskey apps, as well as continued technology harmonisation.

During the fourth quarter of 2019 Crosskey bought the Finnish software company Model IT Oy. In 2020 integration of the new subsidiary occurred in stages. Several planned synergies have already materialised. The most visible is Crosskey’s move from Vantaa to Model IT’s office in Helsinki. During 2021 the intention is to merge Model IT with Crosskey.

From a sustainability perspective, during 2020 all Crosskey offices switched to green electricity. Crosskey’s computer centres are also 100 per cent powered by electricity from renewable sources. In Åland, Crosskey is participating in a large company-wide partnership aimed at turning Åland’s vision of being a completely sustainable community by 20151 into a reality. One milestone along this path will be to meet the United Nations Agenda 2030 with its 17 global sustainable development goals by 2030.

Employee satisfaction, as measured in our yearly employee survey, is an important metric for Crosskey’s efforts to achieve a sustainable human resource policy. During the spring of 2020, the employee satisfaction level climbed to the highest in company history. Satisfaction among Crosskey’s customers also rose to a record level, which is an important confirmation of the company’s efforts to build long-term, sustainable customer relationships.

Non-Group income, Crosskey

Thomas Lundberg, Managing Director at Crosskey Banking Solutions Ab Ltd.

## Macro situation and regulatory requirements

In many ways, 2020 was a special year. The SARS-cov-2 coronavirus – which causes the disease known as COVID-19 – has spread from country to country, with devastating effects on both public health and economic health. Many countries that managed to show a downward trend in the number of new infections this past summer were hit by a second wave during the autumn, causing them to face difficult choices regarding the reintroduction of social restrictions and prohibitions.

The coronavirus pandemic led to changes in official regulations. Banking customers were offered the possibility of postponing loan principal payments. Minimum requirements for the capital adequacy and liquidity of banks were revised. The ability of banks to pay dividends to their shareholders was curtailed. The Finnish Financial Supervision Authority (FIN-FSA) announced that the risk weight floor on mortgage loans that the FSA's Board introduced in Finland on June 27, 2017 – and that went into effect in 2018 – would disappear as of January 1, 2021.

Public officials launched both fiscal and monetary stimulus measures in an effort to soften the economic impact of the crisis. Concurrently, the world's central banks launched massive stimulus programmes to ensure market liquidity and stability, in order to help both businesses and employees.

On March 3 the US Federal Reserve (Fed) cut its key interest rate by 50 basis points to 1.00–1.25 per cent, which was the first time since the global financial crisis that the Fed acted outside of its regular policy meetings. Less than two weeks later, the Fed slashed its key rate by another 100 points to 0–0.25 per cent. As expected, at its December policy meeting the Fed left the key rate unchanged. Nor did it make any changes in the current pace and direction of its asset purchases.

Since early 2016 the European Central Bank (ECB) has kept its key rate at 0.00 per cent. At its latest interest rate policy meeting in December, it announced that the key rate will remain unchanged. Meanwhile the ECB is continuing with its stimulus programmes.

During the first quarter of 2020, Sweden's Riksbank hiked its most important key interest rate from –0.25 per cent to 0.00 per cent and has subsequently left this rate unchanged and repeated that it is expected to

remain at this level for the next few years. At its latest interest rate policy meeting, the Riksbank announced that its asset purchases are being extended and their limit is being expanded.

## BENCHMARK INTEREST RATES, AVERAGES, PER CENT

	2020	2019
Euribor 3 mo	–0.43	–0.36
Euribor 12 mo	–0.30	–0.22
Stibor 3 mo	0.08	–0.03

During the first quarter of 2020, share prices on the world's stock exchanges fell sharply as a reaction to the global pandemic, but during the year as a whole the Nasdaq Helsinki (OMXHPI) equity index rose by 10 per cent, while the Nasdaq Stockholm (OMXSPI) index rose by 13 per cent.

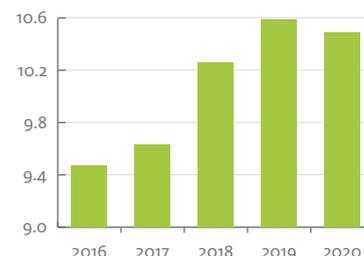

The average value of the Swedish krona (SEK) in relation to the euro (EUR) was 1 per cent higher during 2020 than in 2019 and 4 per cent stronger than at year-end 2019. When converting the income statement of the Bank of Åland's Swedish operations into euros, the average exchange rate for the period has been used, while the balance sheet has been converted at the exchange rate prevailing on the closing day of the report period.

## Important events

The global pandemic caused by the coronavirus has dramatically changed conditions for carrying out banking operations. The Bank of Åland's services are socially essential. The Bank has done its utmost to maintain high accessibility and to proactively contact customers. As far as possible, physical meetings with customers during 2020 were replaced by digital meetings. A majority of staff members worked remotely.

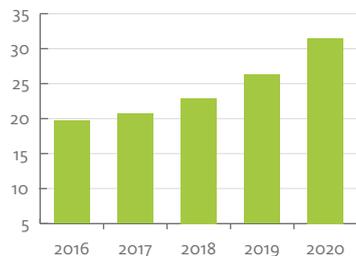

Customers are adversely affected by social lockdowns in all of our geographic markets, but the role of the Bank of Åland in local society is different in Åland from its role on the Finnish mainland and in Sweden. On the Finnish mainland and in Sweden, the Bank has a niche strategy targeted to individual customers with sound finances, wealthy families and entrepreneurs. In the Åland islands, the Bank of Åland is a bank for all residents and has both a market-dominating position and a desire to help develop the Åland of the future.

In Åland, the Bank is both able and willing to participate in operations aimed at supporting the business community. We are actively involved in various working groups and have designed concrete support programmes together with our Åland provincial government, the Finnish state-owned financing company Finnvera, local interest organisations and other banks with an Åland presence. Together we have created a liquidity loan programme, in which the Åland government and Finnvera are guaranteeing 80 per cent of the liquidity loans that need to be taken out. In addition, the Åland government is providing 20 per cent of the loan amount as a direct grant to the businesses that take out liquidity loans.

Together with its customers, the Bank of Åland is continuing its commitment to a cleaner Baltic Sea. This year the Baltic Sea Project contributed EUR 445,000 to several projects that promote the health of the Baltic Sea. Since 1997 the Bank of Åland has awarded EUR 2.7 M to various environmentally related projects.

In May the Bank of Åland launched a new equity fund called Ålandsbanken Nordiska Småbolag. The fund invests in Nordic small and medium sized enterprises that we classify as “quality companies” – firms with stable balance sheets, strong cash flows, high profitability and good growth potential. The fund complies with the Bank’s general rules and guidelines concerning responsible investments and is also completely free of weapon- and fossil fuel-related companies. The fund has attracted great interest.

In November the Bank of Åland further strengthened its position in sustainable investments by launching Finland’s first special placement fund for investing in wind power – Ålandsbanken Vindkraft (the Ålandsbanken Wind Power Fund). The fund invests in wind power projects that have all the required permits to begin construction, or in already active wind farms in Finland and other Nordic countries. By investing in wind power, the Bank’s customers can contribute to a climate-neutral society, while the fund is expected to generate attractive returns.

For the seventh consecutive year, the Bank of Åland (Ålandsbanken) Euro Bond Fund was named the best Nordic fund in its category and received the Refinitiv Lipper Nordics Fund Award. The Fund won the award for all management periods that were analysed: 3, 5 and 10 years. The Morningstar investment research

company, which compares fund data and funds in their respective classes, assigned the Bank of Åland Euro Bond Fund its highest rating – five stars – in all its review cycles. This demonstrates the Fund’s success in relation to its reference group and benchmark indices.

The Bank of Åland’s global equity fund Ålandsbanken Global Aktie became the second fund in the Bank’s asset management range to be granted the Nordic Swan Ecolabel. Together with the bond fund Ålandsbanken Green Bond ESG, which was granted the Nordic Swan Ecolabel in the autumn of 2019, the new equity fund is an important part of the Bank’s long-term commitment to sustainability. To earn the Nordic Swan Ecolabel, a fund must meet 25 mandatory requirements dealing with exclusions, inclusions, transparency and impacts.

The Annual General Meeting (AGM) on April 2, 2020 re-elected the Board of Directors consisting of Nils Lampi, Christoffer Taxell, Åsa Ceder, Anders Å. Karlsson, Ulrika Valassi and Anders Wiklöf. At the statutory meeting of the Board the same day, Nils Lampi was elected as Chairman and Christoffer Taxell as Deputy Chairman of the Board.

During the report period, the number of Series B shares outstanding increased by 34,556 as a result of the Bank’s obligations within the framework of its incentive and share savings programmes.

### Earnings

Net operating profit rose by EUR 6.5 M or 20 per cent to EUR 39.7 M (33.2). This was the highest profit in the Bank’s history.

Profit for the year attributable to shareholders increased by EUR 5.2 M or 20 per cent to EUR 31.5 M (26.3).

Return on equity after taxes (ROE) increased to 11.6 per cent (10.7).

Total income rose by EUR 16.2 M or 12 per cent to EUR 150.1 M (133.9).

Net interest income rose by EUR 5.0 M or 9 per cent to EUR 58.9 M (53.9). The increase came from higher lending volume and higher Swedish market interest rates. In addition, the costs of deposits and capital market borrowing fell.

Net commission income rose by EUR 8.3 M or 14 per cent to EUR 66.3 M (58.0), mainly due to higher income from the Bank’s asset management business.

Net income on financial items fell by EUR 2.1 M to EUR 1.8 M (3.9), mainly due to lower capital gains.

Information technology (IT) income rose by EUR 4.5 M or 25 per cent to EUR 21.9 M (17.5). Crosskey's new subsidiary Model IT is part of its operations this year. This was one explanation for the increase, alongside higher project income.

Total expenses increased by EUR 8.1 M or 8 per cent to EUR 105.6 M (97.5). About half of the increase in expenses was attributable to the subsidiary Crosskey and its acquisition Model IT. Another contributing factor was that the stability fee to Finland's Resolution Fund increased by EUR 0.8 M or 50 per cent to EUR 2.6 M (1.8).

Model-driven impairment losses on financial assets increased because of the expected effects of the coronavirus pandemic. During the first quarter of 2020, the Bank made a group provision of EUR 2.0 M related to heightened risk of losses in the corporate loan portfolio. During the fourth quarter, this group provision was absorbed into the model for expected losses and distributed at the loan level, with the largest share allocated to corporate loans. Total net impairment losses on financial assets increased by EUR 1.7 M to EUR 4.9 M (3.2), equivalent to a loan loss level of 0.11 (0.08) per cent.

Tax expense amounted to EUR 8.2 M (6.9), equivalent to an effective tax rate of 20.7 (20.7) per cent.

### Strategic business areas

The Group's EUR 6.5 M increase in net operating profit to EUR 39.7 M was allocated as follows:

- Private Banking +8.2 (higher income)

- Premium Banking –0.4 (higher impairment loss provisions)
- IT +0.2 (higher customer volume)
- Corporate units & eliminations –1.5

### Business volume

Actively managed assets on behalf of customers increased by EUR 1,093 M or 17 per cent compared to year-end 2019 and amounted to EUR 7,436 M (6,343). The increase was due to both positive net inflows and a positive market effect.

Deposits from the public rose by 7 per cent compared to year-end 2019 and amounted to EUR 3,605 M (3,368).

Lending to the public increased by 7 per cent compared to year-end 2019 and totalled EUR 4,378 M (4,110).

All business volumes represented the highest figure in the Bank of Åland's history.

### Balance sheet total and off-balance sheet obligations

During 2020, the Group's balance sheet increased by EUR 428 M or 8 per cent to EUR 6,035 M (5,507). The increase was primarily related to lending to the public. The increase in assets was funded mainly through increased deposits from the public. Off-balance sheet obligations rose by EUR 307 M or 69 per cent to EUR 751 M (444). The increase was mainly related to lines of credit.

### Credit quality

Lending to private individuals comprised 74 per cent of the loan portfolio. Home mortgage loans accounted for 76 per cent of this. Loans for the purchase of securities, with market-listed securities as collateral, comprised the second-largest type of lending to individuals. Historically, the Bank of Åland has not had any substantial loan losses on this type of lending. The corporate portfolio has a close affinity with the retail portfolio, since many of the companies are owned by customers who, as individuals, are also Private Banking customers.

The Bank of Åland is not yet seeing any increase in non-performing loans due to the coronavirus pandemic.

Model-driven impairment losses on financial assets in compliance with IFRS 9, in stages 1 and 2, increased sharply during 2020. So far it has not been necessary to utilise these provisions.

The Bank of Åland Group had EUR 11.9 M (12.4 on December 31, 2019) in impairment loss provisions, of which EUR 2.5 M (0.5) in Stage 1, EUR 1.0 M (0.9) in Stage 2 and EUR 8.3 M (11.1) in Stage 3.

Stage 3 loans increased during 2020 by EUR 4.4 M to EUR 37.9 M. Stage 3 loans as a share of gross lending to the public totalled 0.86 per cent (0.81). The level of provisions for Stage 3 loans amounted to 22 (33) per cent. Most of these loans have good collateral.

Actual loan losses (EUR 5.6 M) increased mainly because individual corporate loans that had been listed as impairment losses during previous financial years were classified as final losses during the first quarter of the financial year.

### Liquidity and borrowing

The Bank of Åland's liquidity reserve in the form of cash and deposits with the central bank, account balances and investments with other banks, liquid interest-bearing securities plus holdings of unencumbered covered bonds issued by the Bank amounted to EUR 1,175 M on December 31, 2020 (1,129 on December 31, 2019). This was equivalent to 19 (20) per cent of total assets and 27 (27) per cent of lending to the public.

In March EUR 100 M in non-covered bonds was repaid, and in May a further EUR 250 M in covered bonds. As a replacement for the capital market borrowing that was repaid,

the Bank of Åland took advantage of the funding programme that Sveriges Riksbank (Sweden's central bank) is offering, secured among other things by a new covered bond that was issued from the Swedish pool. On December 31, 2020, the average remaining maturity of bonds outstanding was about 2.5 (2.5) years.

On December 31, 2020, the Bank of Åland's core funding ratio, defined as lending to the public divided by deposits from the public – including certificates of deposit, index bonds and subordinated debentures issued to the public, as well as covered bonds issued – amounted to 96 (90) per cent.

The loan/deposit ratio amounted to 121 (122) per cent.

Of the Bank of Åland's external funding sources aside from equity capital, deposits from the public accounted for 64 (65) per cent and covered bonds issued accounted for 16 (22) per cent.

The liquidity coverage ratio (LCR) amounted to 158 (139) per cent. The net stable funding ratio (NSFR) amounted to 105 (115) per cent.

### Rating

The Bank of Åland had a credit rating from the Standard & Poor's Global Ratings agency of BBB/A-2 with a negative outlook for its long- and short-term borrowing. The outlook was downgraded from positive to negative in May 2020 based on the ratings agency's revision in its future economic outlook for the country of Finland as a consequence of the coronavirus pandemic. Covered bonds issued by the Bank of Åland have a credit rating of AAA with a stable outlook.

The Bank of Åland's outlook was changed from negative to positive in January 2021.

### Equity and capital adequacy

During the report period, equity capital changed in the amount of profit for the period, EUR 31.5 M; other comprehensive income, EUR 2.3 M; the issuance of new shares as part of the incentive programme, EUR 0.2 M; and EUR 0.0 M related to the share savings programme. On December 31, 2020, equity capital amounted to EUR 292.4 M (258.4 on December 31, 2019).

Other comprehensive income included re-measurements of defined-benefit pension plans by EUR -2.2 M after taxes, in compliance with IAS 19.

Common equity Tier 1 capital rose by EUR 27.0 M or 13 per cent during 2020 to EUR 238.5 M (211.5).

The risk exposure amount increased by 6 per cent during 2020 and totalled EUR 1,671 M (1,583). The risk exposure amount for credit risk rose by EUR 80 M or 6 per cent. The operational risk exposure amount, calculated using a three-year moving average of the Group's income, increased by EUR 7 M.

The common equity Tier 1 (CET1) capital ratio was increased to 14.3 (13.4) per cent. Since the Bank of Åland has no hybrid capital, its CET1 capital ratio is the same as its Tier 1 capital ratio.

Due to the coronavirus pandemic, regulatory authorities have introduced a number of mitigation measures in the calculation of capital adequacy. One of these is related to impairment losses in compliance with IFRS 9 for Stage 1 and Stage 2 loans. These losses may be added back to the capital base ("own funds") in their entirety during 2020–2021 and may then be phased out. This amount totalled EUR 0.5 M on December 31. There is also a mitigation measure for certain intangible assets that may also be added back to own funds. The amount totalled EUR 3.6 M on December 31, 2020. Another mitigation measure that has been introduced is a higher supporting factor for small and medium sized enterprises (SMEs), which means lower risk exposure amounts.

Excluding all these mitigation measures, the Bank's CET1 ratio would have amounted to 13.7 per cent.

The total capital ratio increased to 16.5 (15.8) per cent.

In addition to mitigation measures in the calculation of capital adequacy, mitigation measures in the calculation of the leverage ratio have been introduced. Exposures to central banks with relevance for the transmission of monetary policy are exempted. The Bank of Åland has taken this into account in its calculation of the leverage ratio, which amounted to 4.2 per cent on December 31, 2020. Excluding the mitigation measure, it would have amounted to 3.9 per cent.

In addition to the basic capital requirement, various buffer requirements apply. These are mainly imposed by national regulatory authorities. Due to the coronavirus pandemic, several of these buffer requirements have been lowered.

The capital conservation buffer requirement, 2.5 per cent of common equity Tier 1 capital, applies in all European Union countries. The countercyclical capital buffer requirement may vary between 0–2.5 per cent. For Finnish exposures, the requirement remains 0.0 per cent. For Swedish exposures, the requirement was lowered from 2.5 per cent to 0.0 per cent.

FIN-FSA has identified systemically important institutions in Finland and has imposed individual buffer requirements for them. The Bank of Åland is not included in the buffer requirements for systemically important institutions.

The systemic risk buffer of 1 per cent introduced by the Finnish FSA on July 1, 2019 due to Nordea's move of its head office from Sweden to Finland has now been lowered to 0.0 per cent.

The buffer requirement established by FIN-FSA related to Pillar 2 capital adequacy regulations, totalling 1.5 per cent of the Group's risk exposure amount (REA), still applies. This requirement is related to credit concentration risk (1.0 per cent of REA) and interest rate risk in the balance sheet (0.5 per cent of REA).

When all these buffer requirements are taken into account, the new minimum levels for the Bank of Åland are:

- Common equity Tier 1 capital ratio, 8.5 per cent
- Tier 1 capital ratio, 10.0 per cent
- Total capital ratio, 12.0 per cent

In relation to the above buffer requirements, the Bank of Åland has an ample capital surplus:

- Common equity Tier 1 capital ratio, +5.8 per cent
- Tier 1 capital ratio, +4.3 per cent
- Total capital ratio, +4.5 per cent

## Sustainability information

Between 2019 and 2020, the Bank of Åland's carbon dioxide emissions from electricity consumption, travel and paper print-outs decreased by 208 tonnes or 60 per cent to 140 tonnes. Purchases of more green electricity starting in late 2019 significantly lowered carbon dioxide emissions. As a consequence of the coronavirus pandemic, nearly all business travel was suspended, which also significantly decreased carbon dioxide emissions.

## Dividends for 2019 and 2020

The Board of Directors proposes that the Annual General Meeting approve payment of a regular dividend of EUR 1.00 per share for the 2020 financial year, equivalent to a total amount of EUR 15.6 M. The dividend is equivalent to a 50 per cent payout ratio.

On January 1, 2021 the Board of Directors of the Bank of Åland approved the distribution of a dividend totalling EUR 1 per share (a regular dividend of EUR 0.80 and a 100th anniversary dividend of EUR 0.20) for the 2019 financial year, in compliance with the authorisation that the Board received from the Bank's Annual General Meeting on April 2, 2020.

On December 18, 2020, FIN-FSA issued a new non-binding recommendation that – in practice – further extended its earlier limitation on dividends or share buy-backs until September 30, 2021. The Bank of Åland chose not to follow this recommendation.

Regulatory authorities have classified all banks in Finland, except the two largest, as "less significant institutions". This implies that the Bank of Åland and the other banks in this category are not expected to be rescued by the government in case of any future crisis. For more than a century the Bank of Åland has acted with a long-term perspective and responsibly, which we also intend to do in the future.

The regulatory recommendations challenge the prerequisites for long-term shareholders to invest in banks. For "less significant institutions", it is vital to have long-term shareholders and for them to be there if any future crisis should require their input.

For this reason, the Bank of Åland's Board believes that the long-term risks to the Bank may be larger if – based on our current level of earnings and risks – we choose to follow the regulatory recommendation than if we also begin to take the Bank's other important stakeholder groups into account.

One of these stakeholder groups is the Bank's approximately 5,300 shareholders in the Åland Islands, who own about 56 per cent of the Bank. In the Board's assessment, the Åland community has a substantially greater need for these dividends than the Bank of Åland has.

#### Important events after close of report period

On January 1, 2021 the Board of Directors of the Bank of Åland approved the distribution of a dividend totalling EUR 1 per share (a regular dividend of EUR 0.80 and a 100th anniversary dividend of EUR 0.20) for the 2019 financial year, in compliance with the authorisation that the Board received from the Bank's Annual General Meeting on April 2, 2020.

In January the Standard & Poor's Global Ratings agency changed the outlook for the Bank of Åland's credit rating from negative to positive. The outlook was upgraded based on the ratings agency's revision in its future economic outlook for the country of Finland and because the agency expects that the Bank of Åland's risk-adjusted capitalisation (RAC) will improve significantly over the next two years.

The Bank of Åland opened a new office in Oulu on the Finnish mainland.

#### Risks and uncertainties

The single largest risk and uncertainty factor right now is the impact of the global coronavirus pandemic.

The Bank of Åland's earnings are affected by external changes that the Company itself cannot control. Among other things, the Group's trend of earnings is affected by macroeconomic changes and changes in general interest rates, share prices and exchange rates, along with higher expenses

due to regulatory decisions and directives as well as the competitive situation.

The Group aims at achieving operations with reasonable and carefully considered risks. The Group is exposed to credit risk, liquidity risk, market risk, operational risk and business risk. The Bank does not engage in trading for its own account.

Since 2017 the Bank of Åland has had a pending case with the Swedish Tax Agency concerning value-added tax (VAT) for the financial year 2016. The Tax Agency has announced a decision on the matter, in which it states that the Bank of Åland must pay about EUR 0.5 M in VAT. The Bank of Åland does not agree with the Tax Agency's assessment and has appealed its decision to the Administrative Court. No provision has been made in the accounts for any expense.

#### Future outlook

The Bank of Åland expects its net operating profit in 2021 to be at about the same level as in 2020.

The Bank is especially dependent on the performance of the fixed income and stock markets. There are concerns about economic developments in a number of important markets. For this reason, there is some uncertainty about the Bank's current forecast.

#### Future capital adequacy

The approved dividend distribution for the 2019 financial year and the proposed dividend distribution for the 2020 financial year have already been subtracted from the Bank's common equity Tier 1 capital ratio on December 31, 2020. Implementation of dividend distribution will thus not affect the Bank's important capital adequacy ratios.

A previously planned capital market issue of additional Tier 1 (AT1) capital during the first half of 2021 will further strengthen the Bank of Åland's already strong capital adequacy ratios when it is implemented.

#### Long-term financial targets

During 2021 the Bank of Åland will review its long-term financial targets, which are currently:

- *Return on equity after taxes (ROE) shall exceed 10 per cent.*
- *The Bank's capital adequacy, primarily defined as the common equity Tier 1 capital ratio under the Basel regulations, shall clearly exceed all regulatory requirements.*
- *The payout ratio shall eventually amount to 50 per cent. The payout ratio target presupposes that the capital adequacy target can be maintained.*

The Bank of Åland has had these long-term financial targets since 2013, with only minor adjustments in their language.

One point to be proposed for approval by the Annual General Meeting on March 30, 2021 will be to authorise repurchases of Series B shares up to a maximum of 10 per cent of the total number of shares outstanding.

## FIVE-YEAR GROUP SUMMARY

# Facts on Bank of Åland shares

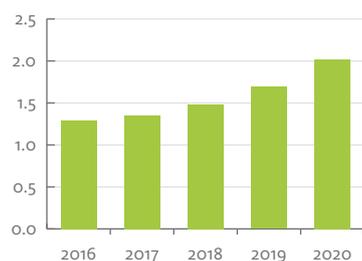

## Market capitalisation

EUR M

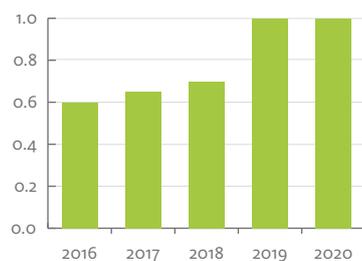

## Earnings per share

euros

## Dividend per share

euros

\* Proposed by the Board of Directors for approval by the Annual General Meeting.

## Share capital

The share capital of the Bank of Åland is EUR 42,029,289.89. The shares are divided into 6,476,138 Series A and 9,075,360 Series B shares. Each Series A share represents twenty (20) votes at shareholders' meetings and each Series B share one (1) vote. The Articles of Association stipulate that no representative at a General Meeting may vote for more than one fortieth of the number of shares represented at the Meeting.

In April 2019, the Annual General Meeting voted to authorise the Board to decide on the issuance of shares, option rights and other special rights entitling their holders to shares, as provided by the Finnish Companies Act, Chapter 10, Section 1. The authorisation concerns Series B shares. The total number of shares that may be issued with the support of the authorisation may not exceed 3,000,000 Series B shares. The authorisation covers one or more issues in exchange for payment or without payment and may also cover divestment of the Company's own shares. The authorisation replaces all of the Annual Meeting's earlier unutilised authorisations of shares, option rights and other special rights entitling their holders to shares. The Board's mandate is in force until April 3, 2024. So far 60,947 Series B shares (as of December 31, 2020) have been issued or divested as authorised, and consequently an additional 2,939,053 Series B shares may be issued or divested on the basis of the authorisation.

## Share savings programmes

The Group had two share savings programmes from 2015 and 2016 for its employees. These programmes are now closed. Based on these programmes, a total of 223,983 Series B shares were issued during the years 2015–2020, of which 23,591 were issued in 2020.

## Shares as part of variable compensation programmes

Newly issued or purchased Series B shares in the Bank are paid as part of the Bank of Åland's incentive programmes. In spring 2020, 10,965 newly issued Series B shares were disbursed. In March 2021, about 18,000 newly issued Series B shares will be disbursed. Another approximately 29,000 Series B shares will be disbursed as a delayed portion of incentive programmes during the years 2022–2024, provided that the criteria for disbursement are fulfilled. The number of shares is dependent on the share price on the disbursement date.

## Changes in share capital

Year	Share capital, EUR	Series A shares	Series B shares
2020	42,029,289.89	6,476,138	9,109,916
2019	42,029,289.89	6,476,138	9,075,360
2018	41,974,063.28	6,476,138	8,995,547
2017	41,949,003.76	6,476,138	8,959,175
2016	41,674,226.83	6,476,138	8,823,012

## Trading in the Bank's shares

During 2020, the volume of trading in the Bank's Series A shares on the Nasdaq Helsinki Oy (Helsinki Stock Exchange) was EUR 3.7 M. Their average price was EUR 18.71. The highest quotation per share was EUR 21.80, the lowest EUR 14.90. Trading in Series B shares totalled EUR 1.1 M at an average price of EUR 18.22. The highest quotation was EUR 21.20, the lowest EUR 13.55.

On December 31, 2020, the number of registered shareholders was 10,859 and they owned 14,237,907 shares. There were also a total of 1,312,147 shares registered in the names of nominees.

# Measuring our environmental impact

Our climate impact calculation is based on carbon dioxide emissions from the Group's energy and paper consumption as well as business travel. Our ambition is to expand our climate impact calculation to include more parameters.

We lowered our carbon dioxide emissions by 60 per cent, from nearly 350,000 kg to just over 140,000 kg in 2020. The biggest reason was a sharp decrease in carbon dioxide emissions generated by energy consumption and business travel.

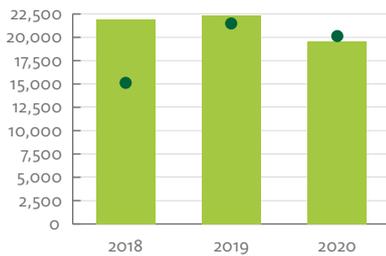

The coronavirus pandemic strongly affected our carbon dioxide emissions because business travel largely came to a halt in the second quarter.

Our long-term ambition is to exclusively use "green" electricity. During 2020 we negotiated further green energy contracts with electricity suppliers.

All paper that the Group uses today is eco-labelled. Our target is to decrease our paper consumption by 10 per cent yearly, which would reduce carbon dioxide emissions by about 2,000 kg.

## Paper consumption

Group paper consumption  
kg

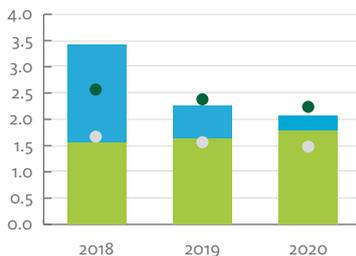

● Our target

Our target is an annual decrease of about 10 per cent, which we managed to achieve during 2020.

## Energy consumption

Group energy consumption  
GWh

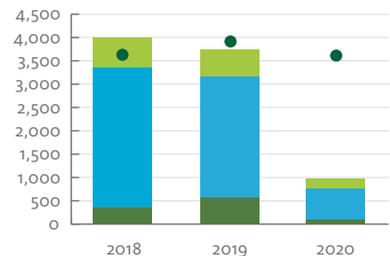

● GWh other ● GWh renewable  
● Our total target  
● Our green energy target

During 2020, total energy consumption fell from 2.24 GWh to 2.11 GWh. Of the energy consumed, 77 per cent was generated using renewal sources ("green energy"), which means that we achieved our 70 per cent target.

## Business travel

Number of business trips in the Group

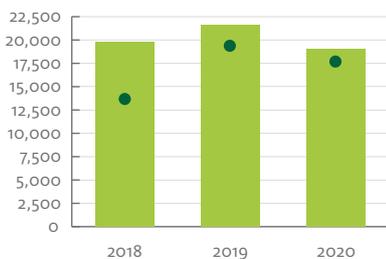

● Train ● Aircraft ● Ship  
● Our total target

The number of business trips during 2020 was greatly affected by the coronavirus pandemic, decreasing by 74 per cent compared to 2019. Our target for 2020 was to take 25 per cent of trips on modes of transport with lower carbon dioxide emissions than aircraft. More than 30 per cent of all trips used alternative modes of transport.

## Quantity of carbon dioxide emissions caused by paper consumption

CO<sub>2</sub> in kg

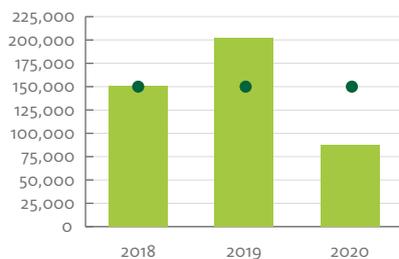

● Our total target

Decreased paper consumption during 2020 led to a carbon dioxide emissions reduction of about 2,600 kg, or 12 per cent, while the target was 10 per cent.

## Indirect carbon dioxide emissions from Group energy consumption

CO<sub>2</sub> in kg

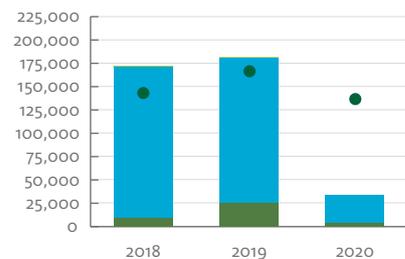

● Our target

Carbon dioxide emissions decreased from more than 200,000 kg to 87,468 kg, i.e. a sharp decline of 57 per cent. The reason behind this was that during all of 2020, we used green electricity produced from renewable sources, compared to 2019 when we transitioned to a larger share of green energy.

## Quantity of carbon dioxide emissions caused by travel

CO<sub>2</sub> in kg

● Train ● Aircraft ● Ship  
● Our total target

Due to the coronavirus pandemic, business travel virtually halted during the second quarter. This, in turn, was reflected by total carbon dioxide emissions, which decreased significantly in 2020. Emissions from all business travel fell from 124,548 kg to 33,688 kg, a 73 per cent decline.

## Information about employees

Employee mobility	2020	2019	2018

Part-time/full-time by gender		2020			2019			2018		
Gender		Part-time	Full-time	Total	Part-time	Full-time	Total	Part-time	Full-time	Total
Women		45	361	406	51	337	388	69	316	385
Men		39	428	467	35	393	428	30	363	393
<b>Total</b>		<b>84</b>	<b>789</b>	<b>873</b>	<b>86</b>	<b>730</b>	<b>816</b>	<b>99</b>	<b>679</b>	<b>778</b>

The number of jobs in the Group totalled 873 at the end of 2020, which was an increase of 57 during the year. Of these 873 employees, 792 (91 per cent) had permanent contracts and 81 (9 per cent) had temporary contracts. Women accounted for 46 per cent and men for 54 per cent of those with permanent contracts.

Women accounted for 54 per cent of all part-time jobs while men accounted for 46 per cent. Just over half the work force was stationed in Åland, while the Finnish mainland and Sweden each accounted for half of the remainder.

Healthy attendance and accidents			
	2020	2019	2018
Healthy attendance, %	93.6	93.6	94.1
Accidents	14	9	12

Healthy attendance means the percentage of unique individuals among all employees who did not have a continuous absence longer than two weeks due to illness.

## Information about diversity

“Senior executives” refers to the Group’s Executive Team plus the managing director and deputy managing director of subsidiaries. “Board” refers to all board members in each Group company. These figures were compiled on the last day of each respective year.

## The Bank of Åland's community involvement

Aside from paying income and value added taxes to the Finnish government, the Bank of Åland is a sizeable employer, especially in its Åland home market.

The Bank contributes to employment by providing more than 500 jobs in Åland, which makes us the second largest private employer in Åland.

By paying social security fees, the Bank of Åland helps strengthen social protection. In addition, the Bank pays fees to the government's stability fund, which helps maintain financial stability in Finland.

The Bank is deeply involved in the Åland community and contributes to it mainly by supporting culture, sports and studies. By doing so, we are helping to create meaningful leisure activities and a future for children and young people. The Bank considers it important to ensure that Åland is a vibrant community that people want to remain in, move to and return to.

Through the Bank's employees, we participate actively in numerous community functions that are important to Åland.

## Training programmes

In 2020 the Bank of Åland placed in service a completely new e-course management platform, which improves our ability to measure training programmes at the Bank.

During the year, 119 Group employees participated in the mandatory introductory training course for newly hired staff.

The total quantity of training provided during the year was 6,558 hours, counting both external and internal courses.

# Notes to the consolidated financial statements

(EUR K)

## G1. Corporate information

The Bank of Åland Plc (Ålandsbanken Abp) is a Finnish public company, organised in compliance with Finnish legislation and with its Head Office in Mariehamn. The Bank of Åland Plc is a commercial bank with a total of 10 offices. Through its subsidiary Crosskey Banking Solutions Ab Ltd, the Bank of Åland Group is also a supplier of modern banking computer systems for small and medium-sized banks.

The Head Office of the Parent Company has the following registered address:

Bank of Åland Plc  
Nygatan 2  
AX-22100 Mariehamn  
Åland, Finland

A copy of the consolidated financial statements can be obtained from the Head Office or from the Bank's website [www.alandbanken.fi](http://www.alandbanken.fi)

The shares of the Bank of Åland Plc are traded on the Nasdaq Helsinki Oy (Helsinki Stock Exchange).

The consolidated financial statements for the financial year ending on December 31, 2020 were approved by the Board of Directors on February 26, 2021 and will be submitted to the 2021 Annual General Meeting for adoption. The Annual General Meeting has the opportunity to adopt or abstain from adopting the financial statements.

## G2. Accounting principles

### 1. Basis for the report

The consolidated financial statements have been prepared in compliance with the International Financial Reporting Standards (IFRSs) that have been adopted by the European Union. In addition, when preparing the notes to the consolidated financial statements, Finnish company and accounting legislation has also been applied. The consolidated financial statements are presented in thousands of euros (EUR K) unless otherwise stated. The consolidated financial statements have been prepared according to original cost, if not otherwise stated in the accounting principles.

Tables show rounded-off figures on all individual lines, but this means that the rounded-off figures do not always add up to the correct total.

### 2. Changes in accounting principles

The essential accounting principles used in preparing the Interim Report are the same as those used in preparing the financial statements for the year ending December 31, 2019.

A number of changes in accounting rules that have been adopted starting in 2020 have had no major effect on the Group's financial position, earnings or disclosures.

### COMING REGULATORY CHANGES

A number of new standards and interpretations take effect for accounting years that begin after January 1, 2021. These coming regulatory changes are not expected to have any significant effect on the Group's financial position, earnings or disclosures.

### 3. Presentation of financial reports

Financial statements consist of a balance sheet, an income statement, a statement of comprehensive income, a statement of changes in equity capital, a cash flow statement and notes. Their purpose is to provide information about the position, financial performance and cash flows of a company that is useful in making economic decisions. Financial statements also present the results of the management team's administration of the resources entrusted to them.

The Group publishes an interim report for each quarter as well as a complete annual report.

### 4. Principles of consolidation

The consolidated financial statements are prepared in compliance with IFRS 10, "Consolidated financial statements" and encompass the Parent Company, the Bank of Åland Plc – including its Swedish branch, Ålandsbanken Abp (Finland), svensk filial – and all subsidiaries that the Parent Company controls. The Group controls a company when it is exposed to, or has rights to, variable returns from its holding in the company and has the ability to affect those returns through its influence on the company. When assessing whether a controlling interest exists, potential voting rights are considered as well as whether de facto control exists. The consolidation of subsidiaries occurs from the date when control is achieved to the divestment date.

In elimination, the acquisition method of accounting has been used. The acquisition method means that the payment which is transferred, the identifiable assets of the acquired company and liabilities assumed plus any non-controlling interests are carried at fair value on the acquisition date. Intangible assets that are not found in the balance sheet of the acquired company, for example patents, brand names or customer relationships, are identified and measured at the time of the acquisition. In case of an acquisition where the payment which is transferred, any non-controlling interests and the fair value of any previously owned portion exceeds the fair value of the acquired assets and the liabilities assumed, the difference is recognised either as goodwill or negative goodwill. If goodwill arises, it is tested at least in conjunction with the annual financial statements. If negative goodwill arises, it is recognised as income in its entirety at the time of the acquisition. For goodwill amounts in companies where the Group has a controlling influence, or in subsidiaries where it has significant holdings without decision-making rights, see Note G25.

Transaction expenditures – except for those attributable to the issuance of equity instruments or debt instruments – are recognised directly in the income statement. The portions of equity capital and profit for the accounting period in subsidiaries that are attributable to

non-controlling interests are split off and shown as separate items in the consolidated income statement and balance sheet. Losses attributable to non-controlling interests are allocated even in those cases where non-controlling interests will be negative.

Changes in percentages of ownership in a subsidiary where a controlling influence is retained are recognised as a transaction in equity capital. The difference between payment received and non-controlling interests' proportion of acquired net assets is recognised under "Retained earnings". Changes where a controlling influence ceases, gains or losses as well as items in other comprehensive income – except any re-measurements of defined benefit pension plans – are recognised in the income statement. Remaining holdings are carried at fair value and the change in value is recognised in the income statement.

The consolidated financial statements include those associated companies in which the Bank of Åland Group owns 20–50 per cent of the voting power or otherwise has significant influence. When consolidating associated companies, the equity method of accounting has been used. The equity method means that the carrying amount of the shares in the consolidated financial statements is equivalent to the Group's proportion of the associated company's equity capital and Group goodwill and any other remaining consolidated surplus and deficit values, adjusted for any impairment losses. The Group's proportion of the income in associated companies and any proportion of other comprehensive income are recognised on separate lines in the consolidated income statement and the consolidated statement of other comprehensive income, respectively. When the Group's proportion of an associated company's losses equals or exceeds its holding in the associated company, including any receivables without collateral, the Group recognises no further losses, unless the Group has assumed legal or informal obligations or made payments on behalf of the associated company.

Joint operations and joint ventures are collaborative arrangements in which the Bank of Åland and one or more business partners are entitled to all economic benefits related to an operation's assets and obligations for its liabilities. Mutual property and housing companies have been classified as joint operations. The Group recognises assets, liabilities, income and expenses based on its proportion of these. All intra-Group receivables, liabilities, income and expenses – including dividends and unrealised intra-Group profits – have been eliminated in the consolidated financial statements. Unrealised gains arising from transactions with associated companies are eliminated to an extent equivalent to the Group's proportion of ownership in the company, but only to the extent that there is no impairment.

## 5. Items in foreign currencies

The consolidated financial statements are prepared in euros (EUR), which is the reporting and functional currency of the Parent Company, Bank of Åland Plc. The functional currency of an operation is determined on the basis of the economic environment where the operation is carried out. The functional currency of the Group's operations outside Finland may diverge from the Group's reporting and functional currency. A foreign currency is defined as a currency other than the Group's functional currency. Income and expenses in foreign currencies are translated to the functional currency of Group companies and branches on the transaction date. Monetary assets and liabilities in foreign currencies are translated at the exchange rate prevailing on the closing day. Translation differences from equity instruments and debt instruments measured at fair value via other comprehensive income – as well as translation differences from hedging of net assets in foreign operations and fair value changes in related currency derivative instruments after taxes, to the extent that the hedge is effective – are recognised in "Other comprehensive income". Non-monetary items that are recognised at fair value are translated according to the exchange rate when fair value was established. Other non-monetary items have been translated at the exchange rate on the transaction date.

In the consolidated financial statements, the income statements, other comprehensive income items and cash flow statements of operations outside Finland are translated to euros according to the average exchange rates for the report period. The translation of balance sheet items to euros is performed using the exchange rates on the balance sheet date. The translation differences that arise when translating operations outside Finland are recognised separately in "Other comprehensive income" and are accumulated in a separate component in equity capital known as the translation reserve. When controlling interest ceases, the accumulated translation differences attributable to these operations are realised, at which time they are reclassified from the translation reserve in equity capital to the income statement.

## 6. Recognition of assets and liabilities in the balance sheet

The purchase and sale of shares, money and capital market instruments and derivatives in the spot market are recognised on the transaction date. Other financial assets and liabilities are normally recognised on the settlement date. Financial assets are removed from the balance sheet when the contractual rights to the cash flows that are attributable to the asset cease or when all risks and rewards associated with the asset are transferred to another party. A financial liability is removed from the balance sheet when the obligation ceases or is cancelled.

In case of a business acquisition, the acquired business is recognised in the consolidated accounts from the acquisition date. The acquisition date is the date when control over the acquired unit begins. The acquisition date may differ from the date when the transaction is legally confirmed. Assets and liabilities are removed from the balance sheet when controlling influence ceases.

Financial assets and liabilities are offset and recognised as a net amount or to simultaneously sell the asset and settle the liability. Further disclosures about offsetting of financial assets and liabilities are provided in Note G45.

The principles for recognition of assets and liabilities in the balance sheet are of special importance, for example, in the recognition of repurchase transactions, loans for the purchase of securities and leases. See the separate sections on these items below.

## 7. Classification of financial assets and liabilities

For purposes of measurement and recognition, in compliance with the provisions of IFRS 9, all financial assets and liabilities are classified in the following categories:

### FINANCIAL ASSETS

1. Amortised cost
  - Investments held to maturity
  - Loans and other receivables
  - Other financial assets and liabilities
2. Fair value via income statement ("profit and loss")
  - Held for trading
3. Fair value via other comprehensive income
  - Investments held to collect cash flows and available for sale
  - Equity instruments not held for trading

### FINANCIAL LIABILITIES

1. Amortised cost
2. Fair value via income statement ("profit and loss")
3. Derivative instruments not subject to hedge accounting

The allocation among the different categories is done on the basis of the Bank of Åland's business model for the various holdings and the qualities of the cash flows that the assets create. The choice of the Bank of Åland's business model reflects how groups of financial assets are jointly managed in order to achieve a certain purpose, for example to obtain cash flows and sell assets. Different groups of assets may have different business models. Classification in the balance sheet is independent of the measurement category. Different measurement principles may thus be applied to assets and liabilities that are recognised on the same line of the balance sheet. An allocation of the categories of financial assets and liabilities that are recognised in the balance sheet in terms of measurement category is provided in Note G16.

Most of the items in the consolidated balance sheet are financial instruments. A financial instrument is any form of contract that gives rise to a financial asset in one company and a financial liability or equity instrument in another company. Financial instruments are classified in the balance sheet on different lines depending on who the counterparty is, for example the public or a credit institution. If the financial instrument has no specific counterparty, or when it is quoted in a market, these financial instruments are classified in the balance sheet as various types of securities. Financial liabilities where the creditor has a lower priority than others are classified in the balance sheet as "Subordinated liabilities".

A derivative is a financial instrument characterised by changes in its value due to changes in such variables as exchange rates, interest rates or share prices in an underlying asset, while little or no initial net investment is required. The contract is settled at a future date. Derivatives are recognised on their own lines in the balance sheet, together with contractually accrued interest, either as an asset or a liability depending on whether the contract has a positive or negative fair value.

Financial assets are recognised in the balance sheet on the transaction date when the purchase contract is signed, aside from contracts in the "loan receivables" measurement category, which are recognised on the payment date. The derecognition of financial assets occurs when the right to receive cash flows has expired or has essentially been transferred to another party. Financial liabilities are derecognised from the balance sheet when the liability ends because the contract has been fulfilled or cancelled.

On the first recognition date, all financial assets and liabilities are recognised at fair value. For assets and liabilities at fair value via the income statement, transaction costs are directly recognised in the income statement on the acquisition date. For other financial instruments, transaction expenses according to the effective interest method are included in cost.

#### **FINANCIAL ASSETS AND LIABILITIES RECOGNISED AT AMORTISED COST**

Recognised in the category "Financial assets and liabilities recognised at amortised cost" are interest-bearing financial assets that the Group holds as part of a business model whose aim is to hold financial assets for the purpose of receiving contractual cash flows. On predetermined dates, the contractual terms for the financial asset give rise to cash flows that are only payments of capital amounts and interest on the capital amount outstanding. The decision to hold an investment to maturity is made on the purchase date. Investments recognised at amortised cost are impairment tested according to the model for expected loan losses.

Loans and accounts receivable are recognised at amortised cost, that is, the discounted present value of all future payments attributable to the instrument, where the discount rate consists of the effective interest rate of the asset on the purchase date. When interest income is calculated, the effective interest rate for the recognised gross amount of a financial asset is used, except for those financial

assets that have later been assigned poorer credit ratings. For these financial assets, the effective interest rate of the financial asset's amortised cost is used during subsequent report periods (minus credit reserves). Loans and receivables are impairment tested according to the model for expected loan losses. Loans and accounts receivable that are defined as belonging to Stage 3 undergo impairment testing regularly and individually for each receivable. Impairment losses are recognised in the balance sheet at their net amounts, after subtracting expected and actual loan losses. Lease liabilities are reported as financial liabilities that are recognised at amortised cost.

#### **FINANCIAL ASSETS AND LIABILITIES RECOGNISED AT FAIR VALUE VIA OTHER COMPREHENSIVE INCOME**

A debt instrument is measured at fair value via other comprehensive income if it meets both of the following conditions and is not identified as carried at fair value via the income statement: it is held according to a business model whose aim can be achieved both by receiving contractual cash flows and selling financial assets, and on predetermined dates its contractual terms give rise to cash flows that are only payments of capital amounts and interest on capital amounts outstanding. Recognised in this measurement category are debt instruments that are initially recognised at amortised cost in the balance sheet and are later measured at fair value. The change in value is recognised under other comprehensive income, minus deferred tax. Upon divestment or impairment loss, the portion of accumulated income previously recognised under other comprehensive income is transferred to the income statement. Impairment testing of financial assets in this measurement category is performed according to the model based on expected loan losses. Divestments are recognised under "Net income from financial assets measured via other comprehensive income" and impairment losses under "Net income from financial items". Interest attributable to this measurement category is recognised in the income statement under "Net interest income".

The Bank of Åland has made an irrevocable choice to recognise equity holdings in the measurement category "Financial assets recognised at fair value via other comprehensive income". This choice is made investment by investment. Equities are initially recognised at cost and are then measured at fair value. The change in value is recognised under other comprehensive income, minus deferred tax. Upon divestment or de-recognition from the balance sheet, the portion of accumulated income previously recognised under other comprehensive income, fair value reserve, is transferred to retained earnings. Dividends are recognised in the income statement.

#### **FINANCIAL ASSETS AND LIABILITIES RECOGNISED AT FAIR VALUE VIA THE INCOME STATEMENT**

All financial assets that are not classified as measured at amortised cost or fair value via other comprehensive income are measured at fair value via the income statement.

#### **FINANCIAL LIABILITIES**

Financial liabilities are classified as measured at amortised cost or fair value via the income statement. A financial liability is classified at fair value via the income statement if it is classified as a holding for trading purposes, as a derivative or has been identified as such on the first recognition date. Financial liabilities measured at fair value via the income statement are measured at fair value and net gains and losses, including interest expenses, are recognised in the income statement. Subsequent measurement of other financial liabilities occurs at amortised cost using the effective interest method. Interest expenses and exchange rate gains and losses are recognised in the income statement. Gains or losses upon de-recognition from the accounts are also recognised in the income statement.

## RECLASSIFICATION OF FINANCIAL INSTRUMENTS

The provisions of IFRS 9 only allow reclassification of certain financial assets and only when a change of business model occurs. Reclassification of financial liabilities is not allowed.

## EMBEDDED DERIVATIVES

An embedded derivative is a component of a combined financial instrument that also includes a host contract that is not a derivative, with the effect that some of the hybrid instrument's cash flows vary in a way similar to the cash flows from a stand-alone derivative.

An embedded derivative is separate from the host contract and is recognised separately among "Derivative instruments" in the balance sheet when its financial features are not closely related to those of the host contract, provided that the combined financial instrument is not recognised at fair value via the income statement.

## 8. Principles for recognising financial assets and liabilities at fair value

Fair value is defined as the price at which an asset could be sold or a liability transferred in a normal transaction between independent market players.

The fair value of financial instruments that are traded in an active market is equal to the current market price. Such a market is regarded as active when listed prices are easily and regularly available in a regulated market, trading location, reliable news service or the equivalent, and where the price information received can easily be verified through regularly occurring transactions. As a rule, the current market price is equivalent to the current purchase price of financial assets or the current sale price of financial liabilities. The current market price of groups of financial instruments that are managed on the basis of the Bank's net exposure to market risk equals the current market price that would be received or paid if the net position were divested.

In the case of financial assets for which reliable market price information is not available, fair value is determined with the help of valuation models. The valuation models that are used are based on incoming data that in all essential respects can be verified through market observations, for example market interest rates and share prices. As needed, an adjustment is made for other variables that a market player is expected to take into account in pricing.

The valuation techniques used are analysis of discounted cash flows, measurement with reference to financial instruments that are essentially similar and measurement with reference to recently completed transactions in the same financial instruments. When using measurement techniques, market quotations are used to the greatest possible extent, but in case this is not possible, estimates are required in order to obtain fair value.

Day 1 gains or losses, that is, differences between transaction price and value according to a measurement model that arise on the first recognition date, are recognised in the income statement only in cases where the measurement model is based only on observable market data. Otherwise the difference is accrued over the lifetime of the financial instrument.

## DEBT SECURITIES

Debt securities issued by sovereigns, as well as covered bonds and corporate bonds, are valued with the help of current market prices. In exceptional cases, corporate bonds may be measured using valuation techniques based on market yields for equivalent maturities, adjusting for credit and liquidity risk.

## EQUITY INSTRUMENTS

Shares listed in an active market are valued at market price. When measuring unlisted shares and participations, the choice of valuation

model is determined by what is deemed suitable for that particular instrument. Holdings in unlisted shares mainly consist of shares with a connection to the Bank's business, such as strategic partnerships and holdings in Åland companies. As a rule, such holdings are valued at the Bank's proportion of net asset value in the company, which is regarded as constituting a reasonable estimate of fair value. In companies that have recently carried out a new share issue without preferential rights based on previous holdings, each share is valued at this issue price, with a deduction for share illiquidity.

## DERIVATIVES

Derivatives that are traded in an active market are valued at market price. Most of the Group's derivative contracts, among them interest rate swaps and various types of linear currency derivatives, are measured using valuation models based on market interest rates and other market prices. Valuation of non-linear derivative contracts that are not actively traded is also based on a reasonable estimate of market-based incoming data, for example volatility.

## 9. Impairment losses on loans and accounts receivable

Impairment losses on loans and accounts receivable are determined according to a model based on "expected credit loss" (ECL). This is based on changes in the credit risk of financial assets and consists of a three-stage model. Stage 1 consists of exposures that are performing without significantly higher credit risk being regarded as having occurred. Those exposures that under-perform and are regarded as having a significant change in credit risk are placed in Stage 2. In addition, exposures that have been granted forbearance measures are always placed in Stage 2. Exposures in Stage 3 fulfil the Group's default definition, in which an exposure is regarded as in default when a payment related to a significant amount is more than 90 days late. Other situations where the Group regards a credit exposure as in default is when the Bank honours a bank guarantee, the counterparty files for bankruptcy or it applies for debt restructuring. In addition, the Group assesses whether a counterparty should be regarded for other reasons as incapable of paying, which always includes cases where the Bank expands its forbearance measures on behalf of the customer.

By definition, a loan loss provision for Stage 2 or Stage 3 is based on lifetime loan losses, but they differ since Stage 3 exposures always undergo an individual impairment test. For backward transitions to better stages, the Bank applies cooling off periods. For exposures in Stage 2 it applies a six month period and for loans in Stage 3 it applies a two month cooling off period. For exposures with forbearance, the Bank applies a cooling off period of 24 months before the exposure can revert to Stage 1, assuming that forbearance measures are no longer in place. The impairment loss model requires reporting of one year's expected loss from the initial date of recognition, and in case of a significant increase in credit risk, the impairment loss amount must be equivalent to the credit losses that are expected to arise during the remaining lifetime. A significant increase in credit risk is defined as a significant increase in the probability of a suspension of payment since the first reporting date. The Group assesses a significantly increased credit risk on the basis of a calculation of a relative change in probability of default (PD) for the remaining maturity of three times and an absolute change of at least 10 percentage points.

For all exposures, the Group applies a credit rating model for calculating expected loan losses. These calculations are based on internally developed models (probability of default = PD, loss given default = LGD and expected exposure at default = EAD), which take into account both historical data and probability-weighted forward-looking scenarios. A 12-month probability of default (PD) indicates the probability that a given commitment will default within 12 months, while a lifetime PD (for the remaining maturity) is equivalent to the probability that a given commitment will default during the entire remaining maturity of the financial asset. The PD model is based on

historical data, the conditions that exist on the reporting date and future economic conditions that affect credit risk. Loss given default (LGD) is stated per commitment and is an estimate of the expected loss that the Group will incur assuming that the commitment defaults. The Group's LGD model is based on historical data. Exposure at default ((EAD) refers to an estimated credit exposure at a future default date, taking into account expected changes in the credit exposure on the balance sheet date. The Group's EAD model takes into account such factors as current contractual terms, assumptions about the honouring of guarantees, expected utilisation of credit limits and irrevocable off-balance sheet obligations.

The level of provisions is based on a broad range of relevant information from incoming data, assumptions and assessments by the Executive Team. The following points may have an especially large influence on the level of provisions: establishment of a significant increase in credit risk, forecasts of future macroeconomic scenarios and calculation methodology for both the expected loan loss within the coming 12 months and expected lifetime loan losses.

The impairment model in compliance with IFRS 9 requires the Executive Team to make judgements and estimates and make assumptions, and it makes assumptions that affect the application of accounting principles. Model-driven impairment losses on financial instruments in compliance with IFRS 9 greatly increased due to the economic downturn. In the prevailing situation, with the ongoing coronavirus pandemic, the Bank of Åland also analysed selected economic sectors and types of loans that it believed would be affected most by the crisis. In the first quarter of 2020, the Executive Team concluded that a group provision should be made due to a heightened risk of losses, primarily in the corporate loan portfolio. Assumptions in the expected credit loss (ECL) model were updated during the fourth quarter, and the group provision was specified through assessments including sectoral and loan-specific circumstances. Customers who, under the prevailing circumstances, apply for postponement of loan principal payments are not automatically moved from Stage 1 to Stage 2, since the postponement of principal payments in itself does not represent a heightened risk of losses. For the Bank of Åland's part, the loan volume that has been granted postponement of principal payments amounts to EUR 180 M. This volume is recognised in Stage 1 if there are no other reasons besides the postponement of principal payments that justify another stage.

Provisions for loan losses on financial assets that are measured at amortised cost are made in the balance sheet as a reduction in the recognised gross carrying amount of the asset. Provisions for guarantees issued and unutilised credit lines are recognised as liabilities. Impairment losses on loans and accounts receivable as well as realised loan losses are recognised in the income statement under "Net impairment loss on financial assets". Repayments of previously realised loan losses and recoveries of probable loan losses are recognised as income under "Net impairment loss on financial assets".

## 10. Hedge accounting

### HEDGE ACCOUNTING AT FAIR VALUE

Hedge accounting at fair value can be applied to individual assets and liabilities as well as to portfolios of financial instruments in order to protect the Group from undesirable effects on income due to changes in the market prices of recognised assets or liabilities. When hedging fair value, both the hedging instrument – the derivative – and the hedged risk in the hedged instrument at fair value are recognised in the income statement under "Net gains and losses on financial items at fair value". One requirement to apply hedge accounting is that the hedge has been formally identified and documented. The hedge's effectiveness must be measurable in a reliable way and is expected to remain and prove to have been very effective in offsetting changes in value during the reported periods.

### CASH FLOW HEDGING

Cash flow hedging can be applied to individual assets and liabilities for the purpose of protecting the Group against undesirable effects on earnings due to changes in interest and exchange rates. Derivatives that comprise hedging instruments in cash flow hedging are recognised at fair value in the balance sheet. To the extent that the change in the value of the hedging instrument is effective, it is recognised in the hedging reserve under "Other comprehensive income". Any ineffective portion is recognised in the income statement under "Net gains and losses on financial items at fair value". The amount recognised in "Other comprehensive income" is transferred to the income statement upon the maturity of the issued debt security issued that has been hedged by cash flow hedging. One prerequisite for applying hedge accounting is that the hedge is formally identified and documented. Its effectiveness must be measurable in a reliable way and is expected to remain and prove to have been very effective in offsetting changes in value during the reported periods.

### HEDGING OF NET INVESTMENTS IN FOREIGN OPERATIONS

Hedges of net investments in foreign operations are applied to protect the Group from translation differences that arise when operations in a functional currency other than the presentation currency are translated. Derivatives that comprise hedging instruments in hedges of net investments in foreign operations are recognised in "Other comprehensive income".

Any ineffective portion is recognised in the income statement under "Net gains and losses on financial items at fair value". If a foreign operation is divested, the gain or loss that arises on the hedging instrument is reclassified from "Other comprehensive income" and recognised in the income statement. One prerequisite for applying hedge accounting is that the hedge is formally identified and documented. Its effectiveness must be measurable in a reliable way and is expected to remain and prove to have been very effective in offsetting changes in value during the reported periods.

## 11. Intangible assets

Intangible assets consist of IT systems produced for the Group's own use, externally procured systems, intangible assets from acquisitions of companies and acquired contracts.

### CAPITALISATION OF PRODUCTION FOR OWN USE

If the computer system that is produced will probably generate future income or reduce expenses to an extent that exceeds its investment costs, the development expenses for the computer system are capitalised. Computer systems developed in-house are capitalised at actual cost. Development expenses that are not expected to yield a significant economic benefit are recognised as an expense in the income statement. Expenses for preliminary studies and research are recognised as an expense in the income statement.

### AMORTISATION

Capitalised development expenses are normally amortised on a straight-line basis during 5–7 years. Amortisation begins when the computer system is ready for use.

Computer systems developed in-house.....	5–7 years
External computer systems .....	5–10 years
Acquired contract.....	10 years
Other intangible assets.....	3–5 years

### EXTERNALLY PROCURED SYSTEMS

External computer systems are recognised in the balance sheet at cost minus accumulated amortisation and impairment losses.

## ACQUIRED CONTRACTS

“Acquired contracts” refers to expenditures for rights to future cash flows and is recognised in the balance sheet at cost minus accumulated amortisation and impairment losses.

## OTHER INTANGIBLE ASSETS

Other intangible assets include acquired customer contracts.

## IMPAIRMENT LOSSES

Assets are reviewed yearly to determine if there is any indication of impairment. If such an indication arises, the recoverable amount is determined as the asset’s sale price or value in use, whichever is higher. Not yet completed development work is tested yearly for impairment, regardless of whether indications of loss of value have occurred. An impairment loss is recognised in the income statement if the carrying amount exceeds net realisable value. A previously recognised impairment loss is reversed only if a significant change has occurred in the valuation basis for impairment testing. The carrying amount after reversal may not exceed the carrying amount before the impairment loss.

## GOODWILL

Goodwill corresponds to the share of cost that exceeds the fair value of assets purchased and liabilities taken over. Goodwill is not amortised but is tested yearly – or more often if a need exists – for impairment by discounting expected future cash flows in cash-generating units. Impairment losses are recognised in the income statement. See Note G25 for Group goodwill amounts.

## 12. Tangible assets

### INVESTMENT PROPERTIES

Investment properties are held in order to earn rental income or value appreciation, or for both purposes. Investment properties consist of direct holdings as well as indirect holdings via property and housing companies. Investment properties are recognised separately according to the cost method in the balance sheet under tangible assets at cost less accumulated depreciation and impairment losses. In the income statement, “Net income from investment properties” is shown on a separate line under “Other income”. The properties have been appraised by a licensed estate agent.

### PROPERTIES FOR THE GROUP’S OWN USE

Properties for the Group’s own use consist of direct holdings as well as indirect holdings via property and housing companies. Properties for the Group’s own use are recognised in the balance sheet at cost less accumulated depreciation and impairment losses.

### OTHER TANGIBLE ASSETS

Other tangible assets consist of machinery and equipment, vehicles, renovations of rented premises and an art collection. Other tangible assets are carried in the balance sheet at cost minus accumulated depreciation and impairment losses. Any divestment gains/losses and disposals are recognised in income/expenses.

### RIGHT-OF-USE ASSETS

“Right-of-use assets” refers to rental contracts and leases where the Group is the lessee and which are recognised as tangible assets in compliance with IFRS 16. When it comes to properties for the Group’s own use, these right-of-use assets primarily consist of bank and office premises. When it comes to other tangible assets, they primarily consist of IT equipment and vehicles. The depreciation period is usually

a fixed period of between 1–9 years, with an average lease period of 4 years. For further information on lease management, see Point 14.

## DEPRECIATION

Depreciation or amortisation is based on the expected economic service life of the assets. All depreciation/amortisation is on a straight-line basis.

Buildings .....	40 years
Technical equipment in buildings .....	12 years
Renovation in rented customer premises .....	5 years
Renovation in other rented premises.....	10 years
Machinery and equipment .....	4–10 years
Other tangible assets .....	3–5 years
Right-of-use assets .....	1–9 years
Land is not depreciated.	

## IMPAIRMENT LOSSES

Assets are reviewed yearly to determine if there is any indication of impairment. If such an indication arises, the recoverable amount is determined as the asset’s sale price or value in use, whichever is higher. An impairment loss is recognised in the income statement if the carrying amount exceeds net realisable value. With the exception of goodwill, a previously recognised impairment loss is reversed only if a significant change has occurred in the valuation basis for impairment testing. The carrying amount after reversal may not exceed the carrying amount before the impairment loss.

## 13. Provisions

A provision is recognised when the Group has a present obligation as a result of a past event, when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and when a reliable estimate of the amount can be made. The provision is calculated at the present value of estimated outflow. Provisions are tested on each closing day and adjusted as needed, so that they correspond to the current estimate of the value of obligations.

Provisions are recognised for restructurings. Restructuring refers to extensive organisational changes, for example where employees receive severance pay for early termination or offices are closed. For a provision to be recognised, a restructuring plan must have been adopted and announced, so that it has created a well-grounded expectation among those affected that the company will implement the restructuring.

Provisions to the restructuring reserve related to other expenses are recognised in the balance sheet when the Group has adopted a detailed formal restructuring plan and the restructuring has either begun or been publicly announced.

Provisions related to litigation costs are recognised when the Group has identified the existing obligation and determined the probable outflow of resources that will be required in the event of a settlement.

Onerous contracts are recognised when the expected economic benefits received from a contract are lower than the unavoidable costs of meeting the obligations of the contract.

A contingent liability is recognised when there is a possible obligation as a result of past events and whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the control of the Group, or when there is an obligation that is not recognised as a liability or provision because it is unlikely that an outflow of resources will be required or it cannot be estimated in a sufficiently reliable way. A contingent liability is not recognised as a provision in the balance sheet. Instead disclosures on contingent liabilities are provided in the notes to the Group’s financial reports.

## 14. Leases

IFRS 16 removes the requirement that lessees must distinguish between finance and operating leases and requires lessees to report a “right-of-use” asset and a lease liability for most leases in the balance sheet. A single discount rate has been applied to a portfolio of leases with essentially similar characteristics. The Bank of Åland applies the exemptions that the standard allows regarding leases running for 12 months or less (short-term leases) and leases where the underlying asset is of low value. These leases are recognised as expenses in the income statement.

### LEASES WHERE THE BANK OF ÅLAND IS THE LESSEE

When entering into a contract, the Bank determines whether the contract is, or includes, a lease – which is defined as an agreement that, during a certain period, transfers to right to control the use of an identified asset, in exchange for compensation. Assets and liabilities that arise from leases are initially recognised at the present value of future lease payments, discounted by the incremental borrowing rate. The Bank reassesses whether a contract is, or includes, a lease only if the terms of the contract change. The Bank is exposed to possible future increases in variable lease payments based on an index or interest rate, which are not included in lease liability before they go into effect. When an adjustment in lease payments based on an index or an interest rate goes into effect, the lease liability is re-evaluated and adjusted in relation to right-of-use. Gains or losses attributable to changes in leases are recognised in the income statement.

When a contract goes into effect, right-of-use assets are recognised among tangible assets and the corresponding financial lease liability among other liabilities. Assets are recognised at the beginning of a lease at the amount corresponding to the fair value of the asset or the lower present value of minimum lease charges. The lease period is determined on the basis of the irrevocable lease period together with an assessment of both periods including the option of a lease extension (and the appropriateness of doing so) and an assessment of periods that include an option to terminate the lease if there is certainty that this option will not be used. Depreciation/amortisation is carried out on the basis of service life or the shorter lease period. Interest on for lease liabilities is recognised as an interest expense according to the effective interest method.

Impairment losses are recognised on the basis of individual judgements of the need.

### LEASES WHERE THE BANK OF ÅLAND IS THE LESSOR

When the Bank of Åland is the lessor, on the initial date of the lease it determines whether the lease shall be classified as a finance or operating lease. A finance lease transfers from the lessor to the lessee substantially all the economic risks and rewards incidental to ownership of an asset. As a lessor, the Bank of Åland’s leasing operations consist of finance leases and are recognised as loan receivables. The carrying amount is equivalent to the present value of future lease payments. The difference between future lease payments and the present value of future lease payments is unearned income. As a result, lease fees received are recognised both in the income statement as interest income and in the balance sheet as a principal payment.

Since lessors bear the economic risks and advantages, the lease is classified as an operating lease. The Bank of Åland recognises fees for operating leases as income on a straight-line basis over the lease period under “Other income”. See Note G10. The Bank of Åland classifies subleases on the basis of the right-of-use that arises from the main lease, not on the basis of the underlying asset.

## 15. Revenue

IFRS 15, “Revenue from contracts with customers”, means that the Group must recognise revenue in an amount that reflects the compensation that the Group expects to be entitled to receive in exchange for providing goods or services to a customer.

### NET INTEREST INCOME

Interest income and expenses on financial instruments are calculated according to the effective interest method. This method recognises the income and expenses of the instruments evenly in relation to amounts outstanding during the period until the maturity date. This calculation includes fees paid or received by the contractual parties that are part of effective interest, transaction costs and all other surpluses and deficits.

### NET COMMISSION INCOME

Income and expenses for various types of services are recognised in the income statement as “Commission income” and “Commission expenses”, respectively. Commission income is recognised when the service is performed, which occurs when control of the service is transferred to the customer and the Group fulfils its performance obligation. Reported as “Commission income” are brokerage commissions, various forms of asset management fees, payment intermediation commissions and debit card fees. Foreign exchange commissions connected to customers’ payments and securities trading are reported as payment intermediation commissions and securities commissions. Individual origination fees for loans and credit line commissions totalling substantial amounts are accrued over the life of the loan and are included in net interest income. No information is provided about remaining performance obligations that have an original expected maturity of no more than one year, or if the Bank of Åland is entitled to compensation from a customer in an amount directly equivalent to the value for the customer of the Bank’s performance that has been achieved to date, which is permitted according to IFRS 15. Commission expenses are transaction-dependent and are directly related to commission income. Income is invoiced regularly. For commissions that apply for several years, only the portion related to services the customer has received during the accounting period in question is recognised.

Commission income and expenses are recognised when the service is performed. For commissions that concern more than one year, only the portion related to the accounting period is recognised.

### NET INCOME FROM FINANCIAL ITEMS AT FAIR VALUE

Under “net income from financial items at fair value”, realised and unrealised gains and losses from financial instruments carried at fair value via the income statement (“profit and loss”) are recognised via the income statement, along with the ineffective portion in hedge accounting.

Recognised under “Net income from foreign exchange dealing” are gains and losses on exchange rate differences that arise from translation of assets and liabilities to euros.

Realised changes in the value of assets that are measured under other comprehensive income are recognised as “Net income from financial assets carried at fair value”. Unrealised changes in value from assets measured under other comprehensive income include expected credit losses and modification results.

## IT INCOME

The subsidiary Crosskey offers IT services that include design, implementation and support. Income is measured on the basis of the compensation specified in the contract with the customer. Systems sales with significant adaptations are administered as long-term projects. Contracts may include several different performance obligations, for example systems development and licences. If contracts include several performance obligations, the transaction price is allocated to each separate performance obligation based on their stand-alone sales prices. In cases where the sales price is not directly observable, the price is estimated based on expected cost plus a profit margin. Systems licence income from long-term projects is recognised as revenue based on degree of completion, when this can be reliably determined. The degree of completion is determined separately for each project as the share of work completed on the balance sheet date, compared to estimated total working hours for the project. Estimates concerning project income, expenses or degree of completion are revised if circumstances change. Increases and decreases in estimated income or expenses based on a changed assessment are recognised in the income statement during the period when the circumstances that led to the revision became known. If total expenditures will probably exceed total income for the project, the expected loss is immediately recognised as an expense. If the contract is cost-plus and based on price per hour, the income is recognised to the extent Crosskey is entitled to invoice the customer.

## OTHER INCOME

Dividends on shares and participations as well as dividends on assets measured at fair value via the income statement are among the items recognised as "Other operating income". Also recognised here are capital gains from the divestment of non-current assets and rental revenue from investment properties. Rental revenue is recognised on a straight-line basis in the income statement in accordance with the terms of the lease.

## 16. Employee benefits

### PENSION LIABILITIES

Post-retirement employee benefits consist of defined contribution and defined benefit plans. The plans recognised as defined contribution are those benefit plans under which the Group pays agreed fees to an external legal entity and then has no legal or informal obligation to pay additional fees if the legal entity lacks the assets to fulfil its obligation to the employee. Premiums paid to defined contribution plans are recognised continuously in the income statement as a staff cost. Other plans for post-employment benefits are recognised as defined benefit plans.

Pension coverage for employees in Finland has been arranged through the Finnish national pension system (a defined contribution plan). There is also an older system via a pension fund (Ålandsbanken Abps Pensionsstiftelse r.s., a so-called A Fund defined benefit plan), which has been closed since 1991. Pension coverage for employees in Sweden follows the so-called BTP1 plan, which is defined contribution. A few previously agreed defined benefit BTP2 plans still exist.

A defined benefit pension solution pays a pension based on salary and length of employment, which means that the employer bears essentially all risks in fulfilling the pension obligation. For a majority of its defined benefit pension plans, the Group has set aside managed assets in pension funds or various kinds. Plan assets minus plan obligations in defined benefit pension plans are recognised in the balance sheet as a net asset. Actuarial gains and losses on pension obligations as well as returns that exceed the estimated returns on plan assets are recognised in "Other comprehensive income".

Recognised pension expense related to defined benefit plans consists of the net amount of the following items, which are all included in staff costs:

- Pension rights earned during the year, that is, the year's portion of the estimated final total pension disbursement. The calculation of pension rights earned is based on an estimated final salary and is subject to actuarial assumptions.
- Interest expense for the year, since the present value of the pension liability has increased as the period until its disbursement has decreased. To calculate the year's interest expense, the Bank uses the current swap interest rate (interest rate on January 1) for a maturity equivalent to the remaining time until disbursement of the pension liability.
- Estimated return (interest rate) on plan assets. Interest on plan assets is recognised in the income statement by applying the same interest rate used when setting the year's interest expense.
- The calculation of expenses and obligations related to the Group's defined benefit plans involve a number of judgements and assumptions that may have a significant effect on the amounts recognised.

Changes or curtailments in a defined benefit plan are recognised at the earlier of the following dates: when the change or curtailment in the plan occurs or when the company recognises related restructuring expenses and severance pay. Changes/curtailments are recognised directly in profit for the year.

## 17. Share-based payment

In its compensation policy document, the Group has made it possible for portions of its compensation to employees to be settled through its own shares, which are recognised as share-based payment. The fair value of the shares is calculated on the distribution date and allocated over the vesting period, while the corresponding increase in equity capital is recognised. The expense is based on the fair value of the shares on the distribution date. The fair value of the shares is calculated on the distribution date on the basis of their quoted market price. An assessment of how many shares employees will earn is carried out when calculating the recognised expense of share-based payment in accordance with the terms and conditions in the Group's compensation policy (for example continued employment). At the end of each report period, the Executive Team re-assesses its judgements about how many shares will be earned.

## 18. Income tax

Income tax in the income statement includes current taxes for the Group based on taxable income for the year, together with tax adjustments for prior years plus changes in deferred (imputed) taxes. Tax expense is recognised in the income statement as an expense, except for items recognised in other comprehensive income, in which case the tax effect is also recognised as part of other comprehensive income. A deferred tax asset or liability has been established for temporary differences between the value of assets and liabilities for tax purposes and their carrying amount, by using tax rates applicable to future periods. Deferred tax liabilities and tax assets are calculated according to the tax rates expected to apply when the tax materialises (a law has been adopted but has not yet gone into effect). A deferred tax asset is recognised to the extent it is probable that future taxable income will arise against which the temporary difference can be utilised.

## 19. Non-current assets held for sale and discontinued operations

A non-current asset or a disposal group is classified as held for sale if its carrying amount will be largely recovered through a sale and not through use. The asset or disposal group must be available for immediate sale in its present condition and based on normal conditions. It must be highly probable that the sale will occur. A completed sale is expected to be recognised within one year. An independent business unit or a significant operation within a geographic area, or a subsidiary acquired exclusively with a view to resale, are also recognised as discontinued operations.

Non-current assets or disposal groups held for sale are presented on a separate line in the balance sheet and are measured at the lower of carrying amount and fair value less expected costs to sell. Liabilities that are related to these non-current assets are also presented on a separate line in the balance sheet. There were no non-current assets held for sale at the end of 2018 or 2019.

## 20. Operating segments

The Group reports operating segments in compliance with IFRS 8, which means that the segment report reflects the information that the Group's Executive Team receives. The Managing Director of the Group has been identified as the chief operating decision maker. The Group reports its various business areas as operating segments. A business area is a group of departments and companies that provide products or services that have risks and rewards that diverge from other business areas. Intra-Group transactions take place at market prices.

## 21. Cash and cash equivalents

"Cash and cash equivalents" refers to cash and deposits in the Finnish and Swedish central banks that may be used freely. "Deposits" refers to funds that are available at any time. This means that all cash and cash equivalents are immediately usable. Cash and cash equivalents in the cash flow statement are defined in compliance with IAS 7 and do not coincide with what the Group regards as cash and cash equivalents.

## 22. Significant judgements and estimation uncertainty

Preparation of financial statements in compliance with IFRSs requires the Executive Team to make judgements and estimates that affect the application of accounting principles and the recognised amounts of assets and liabilities, income and expenses as well as disclosures about commitments. Although these judgements and estimates are based on the best knowledge of the Executive Team about current events and measures at the time of the judgement, the actual outcome may diverge from these judgements and estimates. Significant accounting judgements that were made when applying the Group's accounting principles were primarily related to impairment losses on loans and receivables. The sources of uncertainty which may lead to substantial adjustments in the following year's financial reports are described below.

### MEASUREMENT OF LOANS AND ACCOUNTS RECEIVABLE

Loans and accounts receivable that are defined as belonging in Stage 3 undergo impairment testing regularly and individually for each receivable. Exposures that are subject to individual testing are identified on the basis of background data covering customers with defaulting commitments or commitments that will probably default during a given quarter. If necessary, the receivable is written down

to its estimated recoverable value. This estimated recoverable value is based on an assessment of the counterparty's financial repayment ability and assumptions about the sale value of any collateral.

For those concentrations that do not need an impairment loss, according to an individual assessment, impairment losses are recognised using a model based on expected credit loss (ECL). The model, which consists of three stages, focuses on changes in the credit risk of financial assets. An assessment by the Executive Team may be required, especially concerning information that affects the calculation of expected loan losses such as earlier events, current circumstances and reasonable, verifiable forecasts of future economic conditions that may affect future expected cash flows. For further information, see Note G13.

### ACTUARIAL CALCULATIONS OF PENSION OBLIGATIONS

Future pension liability is calculated using actuarial models. As a basis for the calculation, there are estimates of the discount rate (swap rate with maturity equivalent to the expected life of the pension liability), pay increase (expected future increase for pensions), inflation, employee turnover and expected return on assets. For further information, see Note G42.

### FINANCIAL INSTRUMENTS CARRIED AT FAIR VALUE

To determine the fair value of financial instruments, judgements are made that may have a significant impact on the recognised amounts. The judgements referred to include the choice of measurement techniques, judgements on whether markets are active and on what market parameters can be observed. When employing measurement techniques, market quotations are used to the greatest possible extent, but in case this is not possible the Executive Team is required to make estimates in order to determine fair value.

If the fair value of financial instruments cannot be obtained from quotations in an active market, they are calculated with the aid of various measurement techniques, including mathematical models. The Executive Team assesses what market quotations are most suitable and what mathematical models shall be applied in the Group. For further information, see Note G17.

### APPRAISAL OF INVESTMENT PROPERTIES AND PROPERTIES FOR OWN USE

The Executive Team carries out a yearly review of the values of investment properties and properties for the Group's own use to determine whether there is any indication of impairment. If such an indication occurs, the recoverable amount is determined as the higher of the sales price and the value in use of the asset. An impairment loss is then recognised in the income statement if the carrying amount exceeds the recoverable amount. Estimates of the values of the assets are made by independent outside appraisers. For further information, see Note G26.

### LEASES

In assessing the present value of right-to-use assets and the related lease liability, estimates are made about determining the lease period and choice of discount rate. When the length of the lease is determined, the Executive Team takes into account all available information that provides an economic incentive to take advantage of an extension option or not to take advantage of an option to terminate the lease.

#### **MEASUREMENT OF DEFERRED TAX**

A deferred tax asset is recognised for identified taxable losses to the extent that it is probable that future taxable income will arise. The Executive Team regularly assesses when deferred tax should be recognised in the consolidated financial statements, based on expected future earnings performance. On every closing day, an assessment is made as to whether recognising a deferred tax is justified, based on the size of expected future taxable income. For further information, see Note G27.

#### **SHARE-BASED PAYMENT**

When calculating the recognised expense of share-based payment in accordance with the Group's compensation policy, the Executive Team estimates how many shares will be allocated to employees. The expense is based on the fair value of the shares at the moment they are distributed. For further information, see Note G11.

### 1. General

Exposure to risk is a natural element of a bank's operations. The Bank of Åland has a low risk profile, with a conservative attitude towards risk and with the aim that all risk shall derive from its normal business operations. Consequently its main risks consist of business risk, credit risk, liquidity risk, market risk and operational risk. The size of these risks is adapted to the risk-bearing ability of the Bank. This means that the Bank shall be able to cover losses related to these risks with its own funds (capital base) and earnings. The Bank of Åland carries out no trading operations. The Bank's low risk profile is reflected in its low losses related to financial and operational risks that have arisen over the years.

Internal controls, risks and risk management including information requirements according to the European Union's Capital Requirements Regulation, Chapter 8 (Pillar 3) at the Bank of Åland are described in greater detail in the Group's "Capital and risk management report", which is being published separately at the same time as this Annual Report.

### 2. Internal controls and risk management

#### 2.1 RISK ORGANISATION

The Board of Directors has overall responsibility for risk management and control. The Board defines the risk appetite of the Bank's operations and adopts yearly policy documents that specify the overall principles for risk management as well as restrictions in the form of limits that operations shall stay within. The Bank's compliance with risk management principles and its risk positions are monitored regularly. The Board also approves essential methods and models that are used to measure the Bank's risks. The Audit Committee of the Board of Directors assists the Board in handling its tasks related to oversight of risk management, methods and models for risk measurement, risk reporting and internal controls.

The Managing Director shall ensure that risk management complies with the principles and risk tolerances that the Board has approved. The Managing Director does this by setting guidelines based on the policy documents adopted by the Board. The Managing Director shall also ensure that business operations are adapted to the Bank's expertise and resources and that the Bank has sufficient resources and systems for oversight and monitoring.

The Board of Directors appoints the members of the Group-wide Executive Team. These members consist of the heads of the Bank's business areas and corporate units; they serve as advisors to the Managing Director. The Managing Director and the other members of the Executive Team regularly receive reports on the Bank's limit positions and risk indicators.

Matters related to certain types of financial risks are handled by committees consisting of Executive Team members and other persons appointed by the Managing Director.

ALCO – the Asset and Liability Committee – is a decision-making body reporting to the Managing Director that deals with issues concerning financial risks, liquidity, funding and capitalisation. The Credit Committee of the Executive Team makes lending decisions for the Bank on large loan commitments according to approved credit limits.

In order to create a strong risk culture that permeates the entire organisation, the risk organisation at the Bank is based on three lines of defence, which have a clear allocation of responsibility between risk-takers and oversight units:

The first line of defence consists of the Bank's business areas, subsidiaries and Treasury department plus related support units. They are each responsible for the risk that arises in their own day-to-day operations, which means that risk-taking occurs within established limits and that there are measurement and oversight processes.

The second line of defence consists of the independent Risk Control, Operational Risks and Security and Compliance departments, which all report to the Bank's Chief Risk Officer (CRO).

Risk Control is responsible for continuously identifying, measuring, analysing, overseeing and reporting the Bank's financial risks. This includes regular oversight to ensure that the Bank's operations remain within the established risk tolerances and regular reporting of the Bank's financial risks to the Executive Team, the Board and regulatory authorities. Risk Control is responsible for coordinating internal asset and liquidity evaluations and analyses the impact of stress tests on capital adequacy and liquidity positions. Risk Control is also responsible for coordinating and updating the Bank's recovery plan and for monitoring and reporting on the recovery plan's indicators.

The Operational Risks and Security department is responsible for analysing and reporting the Group's operational risks as well as information management, data protection and physical security.

The Compliance department is responsible for overseeing, controlling and ensuring that the Group maintains good regulatory compliance. The department identifies risks related to deficiencies in compliance, among other things by means of yearly risk analyses in the fields of customer protection, market behaviour, combating money laundering and the financing of terrorism, as well as permit and regulatory issues.

The second line of defence is responsible for promoting a sound risk culture by providing back-up to business operations in their introduction of processes for maintaining risk management that follows the principles adopted by the Board of Directors and the Managing Director.

The third line of defence consists of the Internal Audit department, which is directly subordinate to the Board of Directors. Internal Audit is entrusted with evaluating the Group's risk management through independent reviews of processes, models and systems. The department reports its observations to the Board.

#### 2.2 RISK MANAGEMENT MODEL

The purpose of the Bank's risk management model is to identify, measure, control and report risks in the Group. The model is designed to meet external regulatory requirements as well as internal requirements and needs, while living up to sound market practices.

The model consists of:

- Internal regulations, approved by the Board and the Managing Director, that establish allocation of responsibilities as well as principles and guidelines for management, measurement, control and reporting of the Group's risks.
- Clear, documented descriptions of processes.
- Systems for measuring, monitoring and controlling risks, adapted to the complexity and scale of operations.
- Resources and expertise adapted to operations.
- Regular reporting to the Board and the Executive Team
- Incident reporting.

The Bank's Asset and Liability Management (ALM) process is aimed at balancing the risks and the returns that arise in the Bank's operations in financial markets. A high risk may jeopardise future income, create a liquidity shortage and threaten the survival of the Bank. It is thus important that the Bank's risk exposure matches its risk appetite, as well as its capacity for managing unexpected losses due to interest rate changes or other external events that are detrimental to the Bank.

The ALM process includes analysis of the structure of interest rate refixing periods and maturities related to assets and liabilities, risk hedging strategies, capital planning, funding needs and stress tests. The process consists of both static and dynamic scenarios, predefined as well as specific to separate business decisions.

### 3. Capital management

The size of the Bank's capital requirement is stipulated in the European Union's Capital Requirements Regulation (CRR) and Capital Requirements Directive (CRD). The capital needs of banks are formulated in the regulations as capital requirements stating how much capital the banks need to maintain in relation to the risks found in their operations. These capital requirements are divided into Pillar 1 requirements, which are the same for all institutions, and Pillar 2 requirements, which are set individually for each institution by a regulatory authority.

According to the Pillar 1 requirements in Article 92 of the CRR, institutions must have a capital base ("own funds") that always fulfils the following requirements in relation to the risk exposure amount (REA):

- A common equity Tier 1 (CET1) capital ratio of at least 4.5 per cent
- A Tier 1 capital ratio of at least 6 per cent
- A total capital ratio of at least 8 per cent

The Pillar 2 capital requirements are calculated by evaluating other risks that are not covered by Pillar 1 regulations. In addition to these requirements, institutions must also maintain capital in the form of

combined buffer requirements against economic downturns.

These combined buffer requirements are established in the CRD.

Own funds are divided into two types: Tier 1 capital (T1) and supplementary capital (T2). Since the Bank has not issued any instruments in the "Additional Tier 1 capital" (AT1) category so far, its entire Tier 1 capital consists of common equity Tier 1 capital (CET1). Common equity Tier 1 capital comprises the most permanent form of capital and is equivalent to equity capital according to the balance sheet after certain statutory adjustments.

The Bank of Åland's capital requirement for credit risks is calculated according to the IRB approach in the Finnish retail lending portfolio. For the corporate exposure class, the Bank applies the fundamental internal ratings based (FIRB) approach. In Sweden and other countries, the capital requirement is calculated entirely using the standardised approach. For all other exposure categories, including equity exposures, the Bank uses the standardised approach to calculate the capital requirement for credit risk.

Table 3.1 shows the Group's capital adequacy calculation according to Pillar 1 at the end of 2020.

Table 3.1

Capital adequacy	2020	2019
EUR M		
Equity capital according to balance sheet	292.4	258.4
Foreseeable dividend	-31.2	-15.6
<b>Common equity Tier 1 capital before deductions</b>	<b>261.2</b>	<b>242.8</b>

Relief measures due to COVID-19	4.0	
<b>Common equity Tier 1 capital</b>	<b>238.5</b>	<b>211.5</b>
Supplementary capital instruments	37.0	36.2
Expected losses according to IRB approach beyond recognised losses (surpluses)	0.0	1.7
<b>Supplementary capital</b>	<b>37.0</b>	<b>37.9</b>
<b>Total own funds</b>	<b>275.5</b>	<b>249.4</b>
Capital requirements for credit risks according to IRB approach	39.8	40.8
Additional capital requirements for risk weight floor for mortgage loans	8.7	8.0
Capital requirements for credit risks according to standardised approach	67.0	60.2
Capital requirement for credit value adjustment risk	0.0	0.0
Capital requirement for operational risk	18.2	17.6
<b>Capital requirement</b>	<b>133.6</b>	<b>126.6</b>
Capital ratios, %		
Common equity Tier 1 capital ratio	14.3	13.4
Tier 1 capital ratio	14.3	13.4
<b>Total capital ratio</b>	<b>16.5</b>	<b>15.8</b>
Risk exposure amount	1,670.8	1,583.1
<i>of which % comprising credit risk</i>	86	86
<i>of which % comprising credit-worthiness adjustment risk</i>	0	0
<i>of which % comprising operational risk</i>	14	14
Requirements related to capital buffers, %		
Total common equity Tier 1 capital requirement including buffer requirement	8.5	10.7
<i>Of which common equity Tier 1 capital requirement under Pillar 1</i>	4.5	4.5
<i>Of which common equity Tier 1 capital requirement under Pillar 2</i>	1.5	1.5
<i>Of which capital conservation buffer requirement</i>	2.5	2.5
<i>Of which countercyclical capital buffer requirement</i>		1.2
<i>Of which systemic risk buffer requirement</i>		1.0
Common equity Tier 1 capital available to be used as a buffer	14.3	13.4

Table 3.2 below provides an overview of exposure amounts allocated by exposure classes.

Leverage is a measure of bank solvency aimed at avoiding excessive debt. The leverage ratio is calculated as the ratio of Tier 1 capital to a specially defined exposure metric that includes both assets and off-balance sheet items. Unlike the capital adequacy calculation, the exposures are not risk-weighted when calculating the ratio.

Taking into account relief measures due to the COVID-19 pandemic, which represent temporary exemptions for certain exposures to central banks from the total exposure metric, the Bank of Åland's leverage ratio amounted to 4.2 per cent at the end of 2020, compared to 3.7 per cent at the end of 2019. Without taking these relief measures into account, the leverage ratio at the end of 2020 would have been 3.9 per cent.

Table 3.2

Exposure and risk amounts allocated by exposure class

EUR M	Original exposure	(-) Value adjustments	Inflows via credit risk protection	(-) Outflows via credit risk protection	Exposure amount	Average risk weight, %	Risk exposure amount	Capital requirement

Table 3.3

Leverage ratio	2020	2019
EUR M		
Tier 1 capital	238.5	211.5
Total exposure metric	5,624.8	5,663.4
<i>of which balance sheet items</i>	5,466.7	5,581.4
<i>of which off-balance sheet items</i>	158.1	82.0
<b>Leverage ratio, %</b>	<b>4.2</b>	<b>3.7</b>

The leverage ratio is calculated according to the situation at year-end. Tier 1 capital includes profit for the period.

## 4. Credit risk

Credit risk refers to the risk of loss due to the inability of a counterparty to fulfil obligations towards the Group and the risk that the collateral provided for the exposure will not cover the Group's receivables. Counterparties in this respect are all legal entities and physical persons as well as the public sector. Credit exposure arises through receivables and investments, including off-balance sheet commitments.

Overall credit strategy is regulated in a credit policy document adopted by the Board of Directors. The level of acceptable credit risk is also established in a separate financial risk policy and in the individual business strategies of Group companies. Credit risk management is mainly based on formal credit or limit decisions. For credit risk in treasury operations and counterparty risk, specific counterparty limits are established and are applicable for a maximum of one year.

### 4.1 RISK MANAGEMENT

The Bank of Åland's internal risk models are used for calculating provisions for future expected credit losses (ECL) in compliance with the IFRS 9 regulation and for calculating regulatory capital requirements in the form of unexpected losses (UL) and expected losses (EL) for the Bank's IRB-approved exposures. The parameters for the last-mentioned purpose contain a higher degree of conservatism, since they include various safety margins and are supposed to encompass a whole economic cycle. Both risk classifications are based on statistics derived from the Bank's own internal data for estimating the probability of default (PD) and loss given default (LGD) for the Bank's loan customers. For those exposures where the Bank lacks its own loss data history, calculation of ECL employs market-based PD levels from an outside supplier.

The internal risk classification system is the most important cornerstone of the credit approval process and for pricing credit risks when granting new loans. The Bank also relies on the internal system for monthly risk monitoring, internal capital management, the calculation of risk-adjusted returns and reporting of credit risk to the Executive Team. The general risk management principles applied for managing risks that have a bearing on both ECL and capital requirements are the same in the Bank. Both ECL and regulatory capital requirements are included in the Bank's reporting to the Executive Team and the Board of Directors and have a strong connection to risk control in the Bank's risk management system. The Bank's operating units also monitor their credit risk based on these key figures on a monthly basis. The degree of loan loss provisions in relation to the volume of unsettled exposures is based on this reporting and is analysed.

### 4.2 MEASURING CREDIT RISK

According to the IFRS 9 regulation, credit risk exposures are divided into three stages. Stage 1 consists of exposures that are performing without any significant increase in credit risk regarded as having occurred. Exposures that are underperforming and are regarded as having undergone a significant change in credit risk are placed in Stage 2. A significant increase in credit risk is regarded as having occurred if the lifetime PD of the exposure has increased at least 3 times compared to initial lifetime PD and the absolute change is at least 10 percentage points. The Bank applies the presumption of 30 days' delay as a back-stop, in keeping with the IFRS 9 regulation. Exposures with amounts that are delayed more than 90 days, or that meet the Bank's definition of default in other respects, are moved to Stage 3.

An exposure that is deemed to be included in forbearance measures is moved to Stage 2, since the credit risk has increased significantly since initial recognition. Expanded forbearance measures imply that the exposure is becoming unsettled, and it is thus recognised as in Stage 3.

For backward transitions to better stages, the Bank applies waiting periods. For exposures in Stage 2 with at least a 30-day delay, it applies a six month period and for loans in Stage 3 it applies a two month waiting period. For exposures with forbearance, the Bank applies a waiting period of 24 months before the exposure can revert to Stage 1, assuming that forbearance measures are no longer in place.

The model for calculating ECL is based on yearly future PD, LGD and EAD values as well as the discount rate of the loan. When estimating ECL, for each exposure the Bank calculates a 12-month ECL and a lifetime ECL that is applied when an exposure is deemed to have a significant increase in credit risk. The loan loss provision for Stages 2 and 3 are, by definition, based on lifetime ECL but diverge since certain Stage 3 exposures have individual impairment testing. In regulatory contexts, impairment amounts are regarded as specific credit risk adjustments.

The table below shows how large a percentage of exposures were found within each respective stage at the end of 2020. Exposures with lifetime PD of up to 10 per cent are viewed as "low risk", exposures from 10 up to and including 50 per cent as "medium risk" and exposures from 50 up to 100 per cent as "high risk". Defaulted exposures are always assigned a PD of 100 per cent.

#### 4.2.1 Collateral management and credit risk mitigation

Collateral eliminates or reduces the Bank's loss if the borrower cannot fulfil his or her payment obligations and the Bank terminates its loan to the customer. As a main rule, loans to private individuals and companies are thus made against collateral. This applies, for example, to home mortgage financing to private individuals, loans to real estate companies, loans to private individuals and companies for the purchase of securities as well as various other types of financing. Unsecured loans are primarily granted in the case of small loans to private individuals and only in exceptional cases to companies. In the latter case, as a rule special loan conditions are established that give the Bank greater rights of renegotiation or loan termination.

Under "lending to the public", a majority of all loans have been granted to private individuals and businesses with a home or other property as collateral. A large proportion of such lending also occurs in exchange for the pledging of financial collateral that is largely assigned a market value daily.

The Bank regularly monitors the market values of property and securities that serve as collateral for loans. A follow-up of the market value of residential property used as collateral is performed quarterly, and where a need is demonstrated the Bank engages an external appraiser for re-appraisals.

By applying conservative loan-to-value (LTV) ratios on collateral, the Bank makes allowances for a possible negative price trend for various forms of collateral, for example housing prices and market price changes for financial collateral. As a general rule, a loan may not exceed 70–85 per cent of the market value of residential property used as collateral. The LTV ratio on financial collateral is mainly determined on the basis of the liquidity and credit quality of the financial instrument.

Receivables which are reported in Stage 3 in compliance with IFRS 9 were at a higher level at the end of 2020 than at the beginning of the year. The recognised gross value of receivables reported in Stage 3 amounted to EUR 38.9 M. The corresponding figure on December 31, 2019 was EUR 33.5 M.

Table 4.2.1

Credit risk EUR M	2020				2019
	Stage 1	Stage 2	Stage 3	Total	Total

## 5. Liquidity risk

Liquidity risk refers to the risk of not being able to fulfil payment obligations on the maturity date due to a shortage of liquid assets, or that these obligations can only be fulfilled by obtaining the means of payment at a substantially higher cost or by selling positions at substantially lower market prices than expected.

### 5.1 RISK MANAGEMENT

In order to manage liquidity risks, the Bank has designed a framework consisting of a number of components:

- Observance of limits that ensure compliance with the Bank's risk appetite and risk tolerance.
- Continuous follow-up and analysis of the Bank's future liquidity needs, both short- and long-term.
- A well-diversified funding structure, both from the standpoint of financial instruments and maturity perspectives.
- A portfolio of home mortgage loans whose quality is of such a nature as to maintain the Bank's borrowing by means of covered bonds even in a stressed scenario.
- A well-developed investor base.
- A liquidity reserve with high-quality assets that safeguard access to liquidity during a lengthy period of limited access to capital market borrowing.

Based on the Bank's risk tolerance, the Board of Directors has established limits for the Bank's liquidity coverage ratio, survival horizon and how large the percentage of covered bonds issued may be in relation to the available collateral. Liquidity risk is managed by the Bank's Treasury unit, which is responsible for ensuring that risks meet the limits established by the Board of Directors.

### 5.1.1 Liquidity reserve

In order to decrease its liquidity risk, the Bank maintains a liquidity reserve containing high-quality assets that shall serve as an alternative source of liquidity at times of limited or non-existent opportunities to borrow money in the external capital market. The reserve may consist of cash, accounts with central banks or other well-reputed banks that have a good credit rating, deposits with short maturities, holdings of debt securities issued by the Bank and securities of such credit quality that they are eligible for refinancing with central banks. To safeguard the good quality of the Bank of Åland's liquidity reserve, these investments are regulated by the Board of Directors. The size of the liquidity reserve must be sufficient to maintain the targeted survival horizon as well as the liquidity coverage ratio.

### 5.1.2 Funding

Aside from equity capital, the Bank of Åland's funding sources consist mainly of deposits from the public, covered bonds and unsecured bonds, certificates of deposit and short- and long-term borrowing from credit institutions. At the end of 2020, deposits and covered bonds comprised more than 80 per cent of the funding structure.

The Bank's ambition is not to be dependent on funding sources for its lending other than customer deposits and covered bonds. Unsecured capital market funding may be used when the price situation in the market makes it appropriate.

Table 5.1.1

<b>Total</b>	<b>1,175</b>	<b>1,129</b>
<i>of which LCR-qualified</i>	1,118	1,014

## 5.2 MEASURING LIQUIDITY RISK

The balance sheet of the Bank and its maturity structure are an important parameter when calculating and analysing the Bank's liquidity risk. Based on the balance sheet, future cash flows are forecast. These are an important tool in managing and planning liquidity risks and borrowing requirements.

### 5.2.1 Liquidity coverage ratio, net stable funding ratio and core funding ratio

Regulatory authorities have adopted rules for liquidity risk that cover both short-term and structural liquidity under stressed conditions. The purpose of the liquidity coverage ratio (LCR) is to ensure that banks have enough liquid assets to deal with short-term liquidity stress. This means that banks must have liquid assets of very high quality equivalent to at least the net cash outflow for 30 days under stressed conditions, that is, at least 100 per cent.

The net stable funding ratio (NSFR), a structural liquidity metric, requires that banks have enough stable funding to cover their funding needs in a one-year perspective, both under normal and stressed conditions. In June 2021, a minimum NSFR requirement of 100 per cent is being introduced. At the end of 2020 the Bank's NSFR was 106 per cent, compared to 115 per cent at the end of 2019.

On December 31, 2020, the Bank of Åland's core funding ratio, defined as lending to the public divided by deposits from the public – including certificates of deposit, index bonds and subordinated debentures issued to the public, as well as covered bonds issued – amounted to 96 per cent, compared to 90 per cent at the end of 2019.

The loan/deposit ratio amounted to 122 (122) per cent at the end of 2020 was 121 per cent, compared to 122 per cent at the end of 2019.

## 5.3 ENCUMBERED ASSETS

Encumbered assets predominantly consist of home mortgage loans that are used as collateral for the Bank of Åland's covered bond issues outstanding. The size of encumbered assets for covered bonds is based on the level of over-collateralisation that the credit rating agency Standard & Poor's requires of the Bank of Åland to ensure that the bonds are assigned a credit rating of AAA. In addition to home mortgage loans, the Bank of Åland has provided collateral for its own liabilities, payment systems, brokerage operations and clearing in the form of government securities and bonds, mainly to central banks and credit institutions.

## 6. Market risk

Market risk is the risk that earnings, equity capital or value will decrease due to price changes and risk factors in financial markets. Market risk includes interest rate risk, foreign exchange risk and equity risk.

### 6.1 RISK MANAGEMENT

The Bank of Åland's Board of Directors decides on the Bank's risk appetite and establishes limits on interest rate risk, foreign exchange risk and equity risk. The Bank's market risks are low and primarily of a structural nature. They are managed by the Bank's Treasury unit. Positions are hedged when they enter the balance sheet and continuously in compliance with the principles established by the Bank's Board of Directors and the processes established by the Treasury unit.

### 6.2 INTEREST RATE RISK

Interest rate risk refers both to the risk of decreased net interest income (net interest income risk) and the risk of unfavourable changes in the value of the Bank's assets and liabilities when market interest rates change (value change risk). Interest rate risks arise mainly due to differences in the interest rate refixing periods and repricing dates between interest-bearing assets and liabilities.

Table 6.2.1 shows assets and liabilities that fall due for a new interest rate refixing during each respective time interval, assuming that demand deposits fall due on Day 1.

The Bank measures interest rate risk by means of sensitivity analyses of net interest income and the value of interest-bearing assets and liabilities in scenarios where the yield curve is stressed in various ways. Net interest income risk is measured as the sensitivity of net interest income during the next twelve months, assuming a constant balance sheet. Positions in the balance sheet undergo interest rate adjustments on their contractual or assumed interest rate adjustment dates. In the model, the interest rate refixing period of demand deposits is set at

one day. Value change risk is measured as the sensitivity of the estimated present value of all existing interest-bearing items. When calculating value change risk, the Bank uses two methods for the interest rate refixing period of demand deposits. In the first model, demand deposits are assigned a period of one day, while in the second model their refixing period is based on European Banking Authority (EBA) and Basel Committee regulations.

### 6.3 FOREIGN EXCHANGE RISK

Foreign exchange risk refers to the risk of unfavourable results due to changes in the exchange rates of currencies that the Bank is exposed to. The Bank's operations occur mainly in its two base currencies, euros and Swedish kronor. A limited proportion of its lending and deposits occurs in other currencies. The foreign exchange risk is primarily managed by means of matching, and if the potential foreign exchange risk remains at the end of day, the Bank adjusts it.

The Group's structural foreign exchange risk in Swedish kronor arises because its financial accounts are prepared in euros while the functional reporting currency of its Swedish branch is Swedish kronor. Structural exchange rate risk exposure consists of accrued profits/losses in the branch as well as the branch's endowment capital in Swedish kronor.

### 6.4 EQUITY RISK

Equity risk is the risk of decrease in value due to price changes in the stock market. Since the Bank does not carry out any trading in equities for its own account, equity risk is very limited.

The Bank is exposed to equity risk through its strategic investments and other holdings. The Bank's strategic and other equity holdings are managed, in light of their purpose and nature, through separate Board decisions for strategic holdings and decisions by the Managing Director for other equity holdings.

## 7. Operational risk

Operational risk refers to the risk of losses due to inappropriate or faulty internal processes, human errors, systemic errors or external events. Legal risks are included in operational risks. Operational risks occur in all operations. It is thus neither possible nor optimal to eliminate them entirely. The important thing is that risk-taking is deliberate and suitable actions are taken when the risks that are identified are too large. What risk level is considered optimal shall be established by the Board of Directors and constitutes the Bank's risk appetite.

### 7.1 RISK MANAGEMENT

The objective of operational risk management is to ensure that significant operational risks are identified and managed at a sufficient level in relation to the nature and the scope of the operations. Adequate procedures for computer protection and information security must be in place and be further developed based on the threat situation. The probability of significant unforeseen losses or threats to the Group's reputation must be minimised. The Executive Team and the Board of Directors must be informed regularly about the operational risks associated with Group operations. Adequate operational risk management is important to ensure trust in the Bank's operations, especially from a customer standpoint.

The Operational Risks & Security unit is responsible for "second line of defence" analyses of the Group's operational risks and for reporting these. The same is true of the Compliance department, which analyses risk from a compliance standpoint. The "third line of defence" also analyses the Group's risks, including operational risks. To obtain a completely current picture of the Group's risks, risk mapping and analyses from all three lines of defence must be coordinated. The Compliance and Operational Risk & Security units rely on risk analyses when developing focus areas for the work of the following year.

There are many ways to provide support to the Group's operations. Internal training courses are an important element of second defence line support for operational risk management. Processes that support a risk-based way of working as well as internal regulations and controls are other means of support and of raising awareness. The new products approval process (NPAP) is one of the key processes for promoting risk management as early as in the development phase. Internal regulations relating to the operational risk management and compliance with the

rules also serve as operational aids and directives. The Group has continuity plans for all business units, in order to maintain operations and limit interruptions, losses and damage in the event of various operational disruptions. At the Group level, insurance policies have been obtained to cover directors and officers, professional liability and crime. In addition to these insurance policies, Group companies have obtained company-specific insurance coverage.

Group operational risks are mapped yearly by first defence line operations through self-evaluation and other methods. Self-evaluations assess the probability and consequences of operational risks. Risks that are identified in the yearly self-evaluation and classified as risks at a high or unacceptable level must be managed without delay and be addressed as needed by the Group's Executive Team to ensure that sufficient steps are taken in order not to exceed the Group's risk appetite. Operational Risks & Security and Compliance analyse risks based, among other things, on the self-evaluations and risk mapping carried out in the organisation, and they monitor and report the results to the Executive Team. In addition, AML-CFT (Anti Money Laundering – Combating the Financing of Terrorism) risk analysis is performed within the bank at least once a year and reported to the Executive Team and the Board in a corresponding manner. The second defence line also carries out risk assessments, such as information security risk assessments, the Compliance department's yearly risk analysis in its field, and Operational Risks & Security's mapping of the Bank's operational risks. The most significant risks are referred to the Executive Team and the Board. During project work, NPAP is applied. Risk mapping is an important part of this process. The purpose of a comprehensive analysis that highlights a variety of risks is to avoid inadvertent risk-taking. Products and services that are new or have undergone significant changes must be secure and functional when they are put into use.

The Bank of Åland Group reports operating segments in compliance with IFRS 8, which means that operating segments reflect the information that the Group's Executive Team receives.

"Private Banking" encompasses Private Banking operations in Åland, on the Finnish mainland and in Sweden, as well as asset management (Ålandsbanken Fondbolag Ab, Ålandsbanken Fonder Ab, Ålandsfonder Ab II and Ålandsfonder Ab III). "Premium Banking" encompasses operations in all customer segments excluding Private banking in Åland, on the Finnish mainland and in Sweden, as well as asset management. "IT" encompasses the subsidiary Crosskey Banking Solutions Ab Ltd including Model IT Oy and S-Crosskey Ab. "Corporate and Other" encompasses all central corporate units in the Group, including Treasury and partnerships. Ab Compass Card Oy Ltd was part of "Corporate and Other" until the end of August 2019. Starting in September 2019, when Ab Compass Card Oy Ltd was merged with the Parent Company, the Bank of Åland's card business has been part of Private Banking and Premium Banking, while card business with partnerships is part of "Corporate and Other".

Interest margin			1.07			1.00	
Investment margin			1.03			0.98	

Interest from derivative instruments is recognised together with the item that they hedge within the framework of hedge accounting (fair value hedging and cash flow hedging). Interest margin is interest on interest-bearing assets divided by the average balance of assets, minus interest on interest-bearing liabilities divided by the average balance of liabilities. Average balance is calculated as the average of 13 end-of-month figures. Investment margin is net interest income divided by the average balance sheet total.

## CONDITIONS AND COMPENSATION

### General

The Bank's compensation system shall be compatible with the Group's corporate strategy, goals and values, as well as being compatible with and promoting good, effective risk management. The compensation system shall be constructed in such a way that it does not counteract the long-term interests of the Group. An analysis is carried out to determine how the compensation system affects the financial risks that the Bank is subjected to and the management of these risks. There shall be a suitable balance between fixed and variable compensation. The Group's total compensation for a single earning period shall not build up and reward risks that may jeopardise the long-term interests of the Group.

The Bank has an earnings-based compensation system including the Managing Director and the rest of the Executive Team. There are also separate earnings-based compensation systems for employees in the Group's business areas. Earnings-based compensation for a single individual may not exceed an amount equivalent to 12 monthly salaries per financial year.

### Board of Directors

The fees of the Board members are established by the General Meeting. During the period from the 2020 Annual General Meeting to the end of the 2021 Annual General Meeting, the members of the Board receive an annual fee as well as a fee for each Board and Committee meeting attended. The Chairman of the Board receives an annual fee of EUR 30,000, and the Deputy Chairman receives an annual fee of EUR 28,000. Other Board members each receive an annual fee of EUR 26,000. In addition, Board members are paid a meeting fee for each Board meeting they attend. The meeting fee amounts to EUR 1,000 for the Chairman and EUR 750 for other members per meeting attended. Each member of a Board committee is paid EUR 750 per committee meeting attended. The chairman of each respective committee receives a meeting fee of EUR 1,000 per committee meeting attended. The members of the Bank's Board of Directors are not included in share-based compensation systems.

### Managing Director

The Managing Director receives a monthly salary of EUR 28,000. He also receives free automobile benefits and is entitled to the employee benefits that are generally applicable at the Bank. During 2020, the Managing Director was paid compensation totalling EUR 450,188 including fringe benefits and variable compensation. Of the variable compensation paid in 2020, EUR 46,242 was paid in cash and EUR 40,726 in Bank shares, in compliance with external regulations.

The Managing Director's minimum retirement age is 65 and his maximum retirement age is 70. He will receive a pension in accordance with the Finnish national pension system. He is not entitled to a supplementary pension in addition to the statutory public pension. The notice period in case of resignation initiated by the Managing Director is nine (9) months. During this notice period, he will receive a regular monthly salary. According to his employment contract, the Managing Director is entitled to severance pay totalling nine (9) months' salary in case of dismissal by the Bank. Upon resignation, the Managing Director is not entitled to any other compensation.

### Senior executives

Compensation to other members of the Executive Team is paid as a fixed individual monthly salary plus generally applicable employment benefits at the Bank and the opportunity to receive variable compensation. The other members of the Executive Team are not covered by any supplementary pension arrangement. Due to a divergent pension system in Sweden, the Bank has obtained defined contribution-based supplementary pension insurance for members of the Executive Team residing in Sweden, with a retirement age of 65.

### Disclosures concerning earnings-based (variable) compensation and share-based compensation systems

Earnings-based compensation for risk-takers<sup>1</sup> is paid in its entirety when the compensation is set, if the actual compensation sum for a single individual amounts to a maximum of EUR 50,000. If the compensation exceeds EUR 50,000, disbursement of at least 40 per cent of earnings-based compensation shall be postponed by at least three years (vesting period). If the earnings-based compensation for an individual amounts to an especially large percentage of total fixed and earnings-based compensation, the disbursement of at least 60 per cent of the earnings-based compensation is postponed in a similar way. Since the Bank of Åland Plc is a listed company, at least 50 per cent of the earnings-based compensation is paid in the Bank's shares. Since Ålandsbanken Fondbolag Ab is a fund management company, at least 50 per cent of variable compensation to risk-takers must be paid in fund units. The allocated shares/fund units must be held for at least 12 months (deferral period) before the recipient of the compensation may have access to them. The disbursement may be further postponed in light of a comprehensive assessment based on the Group's economic cycle, the nature of its business operations and risks and the job duties and responsibilities of the individual. The Bank is entitled to abstain from disbursing postponed earnings-based compensation if the Group's financial position has substantially deteriorated.

### Share savings programmes

Since 2015 the Bank of Åland has had two ongoing share savings programmes that encompass all Group employees. The programmes consist of share-based payment that is delayed by 3 years. The share-based payment is allocated in the form of performance rights (future shares in the Bank of Åland Plc) for those participants who still have their share savings in a specially designated custody account at the close of the share savings programme. The objective of the programme is to further strengthen employee motivation, participation and long-term affinity with the Group by offering all employees the opportunity to obtain shares in the Bank on favourable terms. The first share savings programme, which began in 2015, was closed down during 2019. In March 2020 the Bank of Åland issued new Series B shares to fulfil its obligations as part of the first share savings programme that began in 2016. In conjunction with this, the share savings programme was closed down.

For information on the number of shares connected to variable compensation programmes, see the section entitled "Facts on Bank of Åland shares".

<sup>1</sup> "Risk-takers" in the Bank's compensation policy documents refers to staff members who are regarded as having a significant impact on the Bank's risk profile. The Bank has established qualitative and quantitative criteria for the purpose of identifying those employees who have a significant impact on the Bank's risk profile.

Receivables with forbearance measures								
Lending to the public								
<i>Receivables without past-due amounts and receivables with past-due amounts &lt;=30 days</i>				23,282				
<i>Receivables with past-due amounts &gt;30 days</i>				370				
<i>Defaulted receivables</i>				3,072				
<b>Gross carrying amount</b>				<b>26,724</b>				<b>25,188</b>

"Receivables with forbearance measures" refers to loan receivables for which the Bank has granted the borrower concessions because of his/her obviously worsened financial situation, in order to avoid problems with the borrower's repayment capacity and thereby maximise the repayment of the outstanding receivable. Concessions may include adjusted loan conditions, such as postponed principal repayments, a reduced interest margin or an extended repayment period, or refinancing, which may mean that a loan has been fully repaid close to its original due date and in connection with this has been replaced with a new loan. The carrying amount refers to gross exposures and includes not only restructured loans but also other loans in a customer entity.

G14. Income taxes	2020	2019
Income statement		
Taxes related to prior years	331	-113
Current taxes	6,519	4,332
Changes in deferred taxes	1,381	2,666
<b>Total</b>	<b>8,232</b>	<b>6,885</b>
Nominal tax rate in Finland, %	20.0	20.0
Non-taxable income/deductible expenses, %	0.0	0.3
Swedish tax rate, %	0.6	0.4
Taxes related to prior years, %	0.2	-0.3
Other, %	0.0	0.4
Effective tax rate, %	<b>20.7</b>	<b>20.7</b>
Other comprehensive income		
Changes in deferred taxes	-294	259
<b>Total</b>	<b>-294</b>	<b>259</b>

The tax rate in Sweden is 21.4 per cent.

G15. Earnings per share	2020	2019
<b>Profit for the period attributable to shareholders</b>	<b>31,486</b>	<b>26,310</b>
Average number of shares before dilution	15,579,412	15,523,141
Average dilution effect		23,845
Average number of shares after dilution	15,579,412	15,546,986
<b>Earnings per share, EUR</b>	<b>2,02</b>	<b>1,69</b>
<b>Earnings per share after dilution, EUR</b>	<b>2,02</b>	<b>1,69</b>

When calculating earnings per share, the average number of shares is calculated as a weighted average of shares outstanding during the period.

<b>Carrying amount on December 31</b>	<b>12,026</b>	<b>9,358</b>

No transfer between Level 1 and 2 has occurred.

Financial instruments for which there is price information that is easily available and that represent actual and frequently occurring transactions are measured at current market price. For financial assets, the current purchase price is used. For financial liabilities, the current sale price is used. The current market price of groups of financial instruments that are managed on the basis of the Bank's net exposure to market risk equals the current market price that would be received or paid if the net position were divested.

In the case of financial assets for which reliable market price information is not available, fair value is determined with the help of measurement models. Such models may, for example, be based on price comparisons, present value estimates or option valuation theory, depending on the nature of the instrument. The models use incoming data in the form of market prices and other variables that are deemed to influence pricing. The models and incoming data on which the measurements are based are validated regularly to ensure that they are consistent with market practices and generally accepted financial theory.

#### THE MEASUREMENT HIERARCHY

Financial instruments that are measured according to quoted prices in an active market for identical assets/liabilities are categorised as Level 1. Financial instruments that are measured using measure-

ment models that are, in all essential respects, based on market data are categorised as Level 2. Financial instruments that are measured with the help of models based on incoming data that cannot be verified with external market information are categorised in Level 3. These assets essentially consist of unlisted shares. Such equity capital holdings for which the Bank of Åland, on the initial recognition date or upon transition to IFRS 9, has made an irrevocable choice to recognise subsequent changes in fair value under other comprehensive income.

In the above tables, financial instruments measured at fair value have been classified with regard to how they have been measured and the degree of market data used in this measurement on closing day. If the classification on closing day has changed, compared to the classification at the end of the previous year, the instrument has been moved between the levels in the table. No instruments were moved between Levels 1 and 2. Changes in Level 3 are presented in a separate table.

G18. Assets and liabilities by currency	2020

"Other intangible assets" include acquired contracts.

Impairment testing for cash-generating Model IT operations was carried out. A sensitivity analysis was performed, in which the variables included in the value in use model were changed and the effect was analysed. For the projected cash flow, important factors are growth, profit margin and investments. The discount factor is another

important parameter for valuation. The profit margin assumed in the model is also at the level of the final 2020 outcome. A negative 1 per cent change in growth, the profitability trend and the discount factor did not result in any impairment losses.

<sup>1</sup> Attributable to the acquisition of Model IT.

<sup>2</sup> Adjustment for application of IFRS 16 refers to finance leases which, in compliance with IAS 17, "Leases", were recognised as part of "Other tangible assets" in 2018. The assets, consisting of IT equipment, were presented in 2018 as part of "Other tangible assets" and were reported separately starting in 2019 together with newly acquired "right-of-use" assets in compliance with IFRS 16.

<sup>2</sup> "Adjustment for application of IFRS 16" refers to finance leases which, in compliance with IAS 17, "Leases", were recognised as part of "Other tangible assets" in 2018. The assets, which consisted of IT equipment, were presented in 2018 as part of "Other tangible assets" and were recognised separately starting in 2019 together with added right-of-use assets in compliance with IFRS 16.

The table concerning right-of-use assets provides information about the leases where the Group is the lessee. The Group recognises right-of-use for properties for the Group's own use, primarily consisting of bank and office premises, and for other tangible assets primarily consisting of IT equipment and vehicles. The average lease period is 4 years. In some cases, especially for IT equipment, the Group has options to buy the leased assets at the end of the lease period. Some of the leases related to bank and office premises include both options to extend the leases and index clauses.

A maturity analysis of lease liabilities is presented in Note G33.

	2020	2019
Amounts recognised in the income statement		
Depreciation of right-to-use assets	-4,546	-3,609

<b>Provisions on December 31</b>	<b>0</b>	<b>409</b>	<b>0</b>	<b>409</b>	<b>0</b>	<b>38</b>	<b>0</b>	<b>38</b>

The provisions for restructuring reserves were related to both Finland and Sweden. These provisions included both staff costs and other expenses, but primarily consisted of staff costs. "Provision for off-balance sheet obligations" refers to expected credit losses related to guarantees issued and unutilised credit lines. "Other provisions" consist of severance pay.

Since 2017 the Bank of Åland has had an ongoing dispute with the Swedish Tax Agency regarding value-added tax (VAT) for the financial year 2016. The Agency announced a decision in the matter in which it believes that the Bank should pay about EUR 0.5 M in additional VAT. The Bank of Åland does not share the Agency's view and has appealed the decision to the Administrative Court. No provision for any expense has been made in the accounts.

<b>Total</b>	<b>36,974</b>	<b>36,913</b>	<b>36,974</b>	<b>36,187</b>	<b>36,100</b>	<b>36,187</b>

	Interest rate:	Repayment:
Debenture loan 1/2015	3.75% fixed interest	May 25, 2035
Debenture loan 1/2016	3.75% fixed interest	August 12, 2036
Debenture loan 1/2017	3.75% fixed interest	August 18, 2037
Debenture loan 1/2018	3-month Stibor +2.40%	May 15, 2038

The loans may be repurchased in advance, but this is possible only with the permission of the Finnish Financial Supervisory Authority. In case the Bank is dissolved, the loans are subordinate to the Bank's other obligations.

The debenture loans were issued with write-down clauses. In the event that the Bank of Åland's or the Group's common equity Tier 1 (CET1) capital ratio falls below 7 per cent, the loan principal is written down by 25 per cent (debenture loan 1/2015) or 50 per cent (debenture loans 1/2016, 1/2017 and 1/2018).

#### Items under "Equity capital"

"Share premium account" includes amounts that were paid at the time of new share issues for shares in addition to their nominal value before September 1, 2006.

"Reserve fund" includes components transferred from equity capital in compliance with the Articles of Association or a decision of a General Meeting.

The fair value fund includes accumulated net change in fair value of debt instruments and equity instruments carried at fair value via other comprehensive income, until the asset is derecognised from the balance sheet. For debt instruments, the realised gain from a divestment is shown in the income statement. When equity instruments are sold, the revaluation amount of the instrument is transferred to retained earnings without affecting either income or other comprehensive income.

"Translation differences" comprises all exchange rate differences that arise when translating financial reports from foreign operations that have drawn up their financial reports in a currency other than the currency in which the Group's financial reports are presented.

"Unrestricted equity capital fund" comprises amounts that were paid at the time of new share issues for shares in addition to their nominal value starting on September 1, 2006.

Changes in number of shares	2020		2019

<b>Number of shares on December 31</b>	<b>6,476,138</b>	<b>9,109,916</b>	<b>6,476,138</b>	<b>9,075,360</b>

See the "Facts on Bank of Åland shares" section for more detailed information.

## Other notes

### G38. Group structure

The Bank of Åland has two subsidiaries whose operations are connected in various ways to banking. The Bank holds a majority of the voting power in all subsidiaries.

Subsidiary	Registered office	Field of operations	Ownership, %
Ålandsbanken Fondbolag Ab	Finland/Mariehamn	Mutual fund management	100
Ålandsbanken Fonder Ab	Finland/Helsingfors	Mutual fund management	100
Ålandsbanken Fonder II Ab	Finland/Helsingfors	Mutual fund management	100
Ålandsbanken Fonder III Ab	Finland/Helsingfors	Mutual fund management	100
Crosskey Banking Solutions Ab Ltd	Finland/Mariehamn	Information technology	100
Model IT Oy	Finland/Helsingfors	Information technology	100
S-Crosskey Ab	Finland/Mariehamn	Information technology	60
Kiinteistö Oy Espoon Koivurinne	Finland/Espoo	Property management	100

The Bank of Åland has no holdings of structured entities. Ålandsbanken Fondbolag Ab manages mutual funds and alternate investment funds with a total value of EUR 3.4 billion.

#### Changes in Group structure

During 2020 Crosskey Banking Solutions Ab Ltd's wholly owned subsidiaries Promodus Oy and Puiretti Oy merged.

The associated company IISP Holdco AB expanded its ownership in Borgo AB to 100 per cent during the year.

Shares in associated companies and joint ventures	Registered office	Field of operations	Ownership, %
Mäklarhuset Åland Ab	Finland/Mariehamn	Estate agents	29
IISÅ Holdco AB	Sweden/Stockholm	Holding company	25
Borgo AB	Sweden/Stockholm	Home mortgage lending	100
Åland Index Solutions AB	Sweden/Stockholm	Intangible service	50

#### Holdings in real estate companies

The Group holds participations in one property for its own use and ten investment properties, of which some are consolidated as follows.

	Business identity code	Consolidation	Ownership, %
Properties for own use			
Fastighets Ab Godbycenter	0200423-2	Joint operation	11
Investment properties			
Fastighets Ab Nymars	0427316-1	Joint operation	30
Fastighets Ab Västernäs City	0524820-8	Joint operation	50
Fastighets Ab Horsklint	0771072-6	Equity method	20

Fastighets Ab Godbycenter, Fastighets Ab Nymars and Fastighets Ab Västernäs City are mutual associations and, in compliance with IFRS 11, have thus been reported as "joint operations".

G39. Actively managed assets	2020	2019
Mutual fund management	3,439,096	3,057,045
Discretionary asset management	2,013,950	1,827,925
Advisory asset management	1,983,141	1,457,677
<b>Total</b>	<b>7,436,187</b>	<b>6,342,648</b>
<i>of which own funds in discretionary and advisory asset management</i>	614,663	508,168

G40. Assets pledged	2020	2019
Collateral pledged for own liabilities		
Lending to credit institutions	13,689	10,242
Government securities and bonds	279,199	140,862
Lending to the public	1,547,808	1,583,625
Other	3,510	2,795
<b>Total assets pledged for own liabilities</b>	<b>1,844,206</b>	<b>1,737,524</b>

Assets pledged in the form of government securities and bonds were mainly provided as collateral to central banks. "Lending to the public" that was provided as collateral consisted of the registered collateral pool on behalf of holders of covered bonds. "Other assets pledged for own liabilities" refers mainly to endowment insurance.

Other assets pledged		
Government securities and bonds	19,446	33,977
Other	711	25,363
<b>Total other assets pledged</b>	<b>20,157</b>	<b>59,340</b>

Assets pledged in the form of government securities and bonds were mainly provided as collateral to central banks and credit institutions for payment systems, securities trading and clearing.

Assets were not pledged for the liabilities or commitments of others.

Except for loan receivables comprising the collateral pool for covered bonds, where legislation regulates minimum requirements for over-collateralisation, collateral that exceeds the nominal value of the liability is at the free disposal of the Bank.

G41. Off-balance sheet obligations	2020	2019
Guarantees	41,776	8,562
Unutilised overdraft limits	276,396	240,983

Other commitments	31,967	22,546
<b>Total</b>	<b>750,757</b>	<b>443,789</b>
<i>Provision for expected loss</i>	409	39

#### K42. Pension liabilities

Pension coverage for employees in Finland has been arranged partly through the Finnish national pension system (a defined contribution plan) and partly via the pension fund known as Ålandsbanken Abps Pensionsstiftelse (a defined benefit plan). Ålandsbanken Abps Pensionsstiftelse has been closed to new participants since June 30, 1991. Persons covered by this fund are entitled to retire at age 63–65 depending on their year of birth. The full retirement pension comprises 60 per cent of pensionable salary, which is calculated according to the same principles as in the national pension system. A family pension comprises 30–60 per cent depending on whether the surviving spouse is alone or has one or more children.

According to the Finnish collective bargaining agreement in the financial services sector, employees are partially entitled to pensions at a lower age than stipulated today by general legislation. The employer is required to provide vested pension benefits in the collective agreement for the financial services sector, which was confirmed during 2017 by a Labour Court ruling.

Pension coverage for employees in Sweden follows the so-called BTP multi-employer plan for banking employees and historically is largely defined benefit. Starting on May 1, 2013, new employees are covered by a new defined contribution supplementary pension plan known as BTP1. The BTP plan is secured through the insurance company SPP. In Sweden, the retirement pension is payable from age 65 and the guaranteed amount consists of 10 per cent of pensionable salary below 7.5 annually indexed "income base amounts" and 65 per cent of the portion of salary between 20 and 30 income base amounts. The guaranteed amount of a family pension is 32.5 per cent of the portion of salary between 7.5 and 20 income base amounts and 16.25 per cent of the portion of salary between 20 and 30 income base amounts.

The duration of defined benefit plans in Finland is 17 years and in Sweden 24 years.

	Outcome, 2020	Forecast, 2021
Future cash flows		
Benefits paid	66	58

	2020		2019	
	Finland, %	Sweden, %	Finland, %	Sweden, %
Assumptions				
Discount rate	0.40	1.25	0.80	1.80
Increase in salary expenses	1.20	3.00	1.30	3.00
Pension index increase	1.50	1.80	1.60	2.00

Sensitivity of defined benefit obligations to changes in significant assumptions

	Change in assumptions, %	Increase in assumption	Decrease in assumption
Sensitivity analysis, net present value of pension obligation: increase (+)/decrease (-)			
Discount rate	0.5	-3,026	3,486
Expected increase in salaries	0.5	250	-266
Expected increase in pensions	0.5	3,009	-2,659

The sensitivity analysis is based on a change in one assumption, while all other assumptions remain constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions, the same method is used as when calculating the pension liabilities recognised in the balance sheet. The sensitivity analysis for the defined benefit plan in Sweden has been calculated using a discount rate and an expected pay increase.

The Bank is exposed to a number of risks because of its defined benefit plans. The most significant risks are described below.

#### ASSET VOLATILITY

Pension liabilities are calculated with the help of a discount rate based on corporate bonds with good credit ratings. If plan assets generate returns worse than the discount rate, this will cause a deficit. Plan assets include a sizeable percentage of equities, which in the long term are expected to provide a higher return than the discount rate, while providing higher volatility and risk in the short term. Because of the long-term nature of pension liabilities, the Bank believes that a continued high percentage of equities is suitable for managing the plans in an effective way.

#### CHANGES IN BOND YIELDS

In case the yields on corporate bonds fall, this leads to an increase in pension obligations. Partly offsetting this is the fact that the value of the bonds that are included in plan assets will increase.

#### INFLATION RISK

Pension obligations are connected to inflation. Higher inflation will lead to increased pension obligations. Plan assets are not affected by inflation to any great extent, which means that if inflation increases, this will lead to an increased deficit in pension plans.

#### LIFE EXPECTANCY

Pension plans generate pensions that extend through the lifetimes of employees. This means that if life expectancy increases, pension obligations will increase.

G43. Lease liabilities	2020			2019		
Financial lease liabilities will be paid as follows:	Minimum rents	Interest	Present value	Minimum rents	Interest	Present value
Under 1 year	4,122	444	3,677	3,881	331	3,550
1-5 years	10,641	993	9,648	7,794	562	7,233
Over 5 years	530	12	518	1,035	40	996
<b>Total</b>	<b>15,293</b>	<b>1,450</b>	<b>13,843</b>	<b>12,711</b>	<b>932</b>	<b>11,779</b>

Leases that were classified under IAS 17 as right-of-use assets and lease liabilities were recognised on January 1, 2019 in the same amounts as under IAS 17 at the end of 2018.

The Bank of Åland Group consists of the parent company, the Bank of Åland Plc (Ålandsbanken Abp), the subsidiaries that are consolidated in the Group, associated companies, the Executive Team and other related companies. "Board and Executive Team" includes the Managing Director, individuals on the Board of Directors and other members of the Executive Team, as well as their close family members. "Related parties" includes companies or persons with significant influence. "Related companies" also refers to companies in which an individual belonging to the Executive Team or a close family member of such an individual has significant influence. "Related parties" include the pension fund Ålandsbanken Abp:s Pensionsstiftelse r.s.

Loans to employees are granted on commercial terms. "On commercial terms" means that loans, guarantees, collateral or financing occur on the same terms and according to the same assessments applied to the Bank of Åland's customers in general. The employee interest rate is used for loans to employees in Finnish operations. The employee interest rate is set by the Executive Team and amounted to 0.25 (0.25) per cent on December 31, 2020.

All transactions with related parties have occurred on commercial terms, aside from loans to the Executive Team, which in Finland have been granted at the employee interest rate.

For disclosures on salaries and fees paid to the Board of Directors and the Executive Team, see Note P33.

For disclosures on Group structure, see Note P39.

Compensation to senior executives	2020	2019
Salaries and other short-term compensation <sup>1</sup>	1,837	1,961
Share-based compensation	172	344
<b>Total</b>	<b>2,009</b>	<b>2,295</b>

"Senior executives" refers to the Executive Team including the Managing Director.

<sup>1</sup> Includes salary, benefits and variable compensation paid in cash.

G45. Offsetting of financial assets and liabilities	2020		2019	
	Assets	Liabilities	Assets	Liabilities
<b>Financial assets and liabilities that are subject to offsetting, netting agreements or similar agreements</b>				
Gross amount	24,620	55,961	21,240	51,215
Offset amounts				
<b>Total</b>	<b>24,620</b>	<b>55,961</b>	<b>21,240</b>	<b>51,215</b>
<b>Related amounts not offset</b>				
Financial instruments, netting agreements	-9,374	-9,374	-7,790	-7,790
Financial instruments, collateral		-40,348		-13,850
Cash, collateral	-4,570	-170	-1,980	-25,907
<b>Total amounts not offset</b>	<b>-13,944</b>	<b>-49,892</b>	<b>-9,770</b>	<b>-47,547</b>
<b>Net amount</b>	<b>10,676</b>	<b>6,069</b>	<b>11,470</b>	<b>3,668</b>

The tables report financial instruments that were offset in the balance sheet in compliance with IAS 32 and those that were covered by legally binding master netting agreements or similar agreements not qualified for netting. The financial instruments consisted of derivatives, repurchase agreements (repos) and reverse repos, securities deposits and securities loans. Collateral consisted of financial instruments or cash received or paid for transactions covered by legally binding netting agreements or similar agreements, which allow netting of obligations to counterparties in case of default. The value of the collateral was limited to the related amount recognised in the balance sheet, so the excess value of collateral is not included. Amounts not offset in the balance sheet are presented as a reduction in the carrying amount of financial assets or liabilities in order to recognise the net exposure of the asset and liability.

#### G46. Important events after the close of the accounting period

On January 1, 2021 the Board of Directors of the Bank of Åland approved the distribution of a dividend totalling EUR 1 per share (a regular dividend of EUR 0.80 and a 100th anniversary dividend of EUR 0.20) for the 2019 financial year, in compliance with the authorisation that the Board received from the Bank's Annual General Meeting on April 2, 2020.

In January the Standard & Poor's Global Ratings agency changed the outlook for the Bank of Åland's credit rating from negative to posi-

tive. The outlook was upgraded based on the ratings agency's revision in its future economic outlook for the country of Finland and because the agency expects that the Bank of Åland's risk-adjusted capitalisation (RAC) will improve significantly over the next two years.

# Notes to the Parent Company financial statements

(EUR K)

## P1. Parent Company accounting principles

The financial statements of the Bank of Åland Plc have been drawn up in accordance with the Finnish Credit Institutions Act, the Ministry of Finance ordinance on annual accounts and consolidated annual accounts of financial institutions and securities companies and the regulations of the Financial Supervisory Authority. The financial statements of the Bank of Åland Plc have been prepared in compliance with Finnish accounting standards (FAS). The Parent Company's financial statements are presented in thousands of euros (EUR K), unless otherwise stated.

### Goodwill

Goodwill is amortised over 10 years.

### Appropriations

Voluntary provisions that the Bank of Åland has made based on Section 46 of the Finnish Business Income Tax Act are recognised under "Appropriations".

Otherwise, please see the consolidated accounting principles.

## Notes to the income statement

P2. Net interest income	2020	2019
Lending to credit institutions	810	1,180
Lending to the public	65,575	60,757
Debt securities	385	601
Derivative instruments	1,309	995
Other interest income	7	30
<b>Total interest income</b>	<b>68,086</b>	<b>63,562</b>
<i>of which interest according to the effective interest method<sup>1</sup></i>	67,687	63,309
Liabilities to credit institutions	621	817
Deposits from the public	2,756	3,724
Debt securities	2,331	3,000
Subordinated liabilities	1,148	1,259
Derivative instruments	1,740	1,196
Other interest expenses	23	17
<b>Total interest expenses</b>	<b>8,619</b>	<b>10,013</b>
<i>of which interest according to the effective interest method<sup>1</sup></i>	8,364	
<b>Net interest income</b>	<b>59,468</b>	<b>53,549</b>

Interest income received from Group companies was EUR 72 K (167).

Interest expenses paid to Group companies was EUR 0 K (0).

Interest from derivative instruments is recognised together with the item that they hedge within the framework of hedge accounting (fair value hedge and cash flow hedge) and the fair value option.

<sup>1</sup>Negative interest income from investments is recognised as interest expenses, while negative interest received for liabilities is recognised as interest income.

<b>Provisions on December 31</b>	<b>0</b>	<b>410</b>	<b>0</b>	<b>410</b>	<b>0</b>	<b>39</b>	<b>0</b>	<b>39</b>

The provisions for restructuring reserves were related to both Finland and Sweden. These provisions included both staff costs and other expenses, but primarily consisted of staff costs. "Provision for off-balance sheet obligations" refers to expected credit losses related to guarantees issued and unutilised credit lines. "Other provisions" consist of severance pay.

Since 2017 the Bank of Åland has had an ongoing dispute with the Swedish Tax Agency regarding value-added tax (VAT) for the financial year 2016. The Agency announced a decision in the matter in which it believes that the Bank should pay additional VAT. The Bank of Åland does not share the Agency's view and has appealed the decision to the Administrative Court. No provision for any expense has been made in the accounts.

	Interest rate:	Repayment:
Debenture loan 1/2015	3.75 % fixed interest	May 25, 2035
Debenture loan 1/2016	3.75 % fixed interest	August 12, 2036
Debenture loan 1/2017	3.75 % fixed interest	August 18, 2037
Debenture loan 1/2018	3-month Stibor +2.40 %	May 15, 2038

The loans may be repurchased in advance, but this is possible only with the permission of the Finnish Financial Supervisory Authority. In case the Bank is dissolved, the loans are subordinate to the Bank's other obligations.

The debenture loans were issued with write-down clauses. In the event that the Bank of Åland's or the Group's common equity Tier 1 (CET1) capital ratio falls below 7 per cent, the loan principal is written down by 25 per cent (debenture loan 1/2015) or 50 per cent (debenture loans 1/2016, 1/2017 and 1/2018).

## Notes concerning staff, Board of Directors and Executive Team

P33. Salaries/fees paid to the Board of Directors and Executive Team	2020	2019
Lampi, Nils	62	58
Taxell, Christoffer	49	44
Ceder, Åsa	50	47
Karlsson, Anders Å	50	47
Persson, Göran <sup>1</sup>		11
Valassi, Ulrika	53	49
Wiklöf, Anders	40	40
Board members	304	296
Managing Director	450	504
Other members of the Executive Team	1,559	1,791

The amount includes the value of fringe benefits. There are no pension obligations to the members of the Board of Directors. The pension benefits of the Managing Director are based on customary terms of employment.

<sup>1</sup> Resigned as Board member of his own volition on April 29, 2019. The 2020 Annual General Meeting fixed the number of Board members at six.

## P34. Private shareholdings of the Board of Directors and the Executive Team in Bank of Åland Plc

See the Board of Directors and Executive Team sections.

## P35. Financial transactions with related parties

See Note G44 in the notes to the consolidated financial statements.

## Notes concerning assets pledged and contingent liabilities

P36. Assets pledged	2020	2019
Assets pledged for own liabilities		
Lending to credit institutions	13,689	10,242
Government securities and bonds	279,199	140,862
Lending to the public	1,547,808	1,583,625
Other	3,510	2,795
<b>Total assets pledged for own liabilities</b>	<b>1,844,206</b>	<b>1,737,524</b>

Assets pledged in the form of government securities and bonds were mainly provided as collateral to central banks. "Lending to the public" that was provided as collateral consisted of the registered collateral pool on behalf of holders of covered bonds. "Other assets pledged for own liabilities" refers mainly to endowment insurance.

Other assets pledged		
Government securities and bonds	19,446	33,977
Other	711	25,363
<b>Total other assets pledged</b>	<b>20,157</b>	<b>59,340</b>

Assets pledged in the form of government securities and bonds were mainly provided as collateral to central banks and credit institutions for payment systems, securities trading and clearing.

Assets were not pledged for the liabilities or commitments of others.

Except for loan receivables comprising the collateral pool for covered bonds, where legislation regulates minimum requirements for over-collateralisation, collateral that exceeds the nominal value of the liability are at the free disposal of the Bank.

P37. Off-balance sheet obligations	2020	2019
Guarantees	44,032	10,555
Unutilised overdraft limits	283,018	247,409
Unutilised credit card limits	85,559	79,274
Unutilised credit lines	315,059	92,425
Other commitments	31,967	22,546
<b>Total</b>	<b>759,636</b>	<b>452,209</b>
<i>Provision for expected loss</i>	409	39
Guarantees for subsidiaries	2,257	1,993
Unutilised overdraft limits for subsidiaries	6,623	8,066
Unutilised credit facilities for subsidiaries	0	0

P38. Rental obligations	2020	2019
Rental payments due		
Under 1 year	2,882	2,297
More than 1 and less than 5 years	7,920	1,398
More than 5 years	1,662	
<b>Total</b>	<b>12,464</b>	<b>3,695</b>

Rental obligations were equivalent to the rental expenses that would arise upon termination of all rental agreements.

## Auditors' Report

*This document is an English translation of the auditors' report in the Swedish language. Only the auditors' report in the Swedish language is legally binding.*

### Opinion

We have audited the financial statements of Bank of Åland Plc (business identity code 0145019-3) for the year ended December 31, 2020. The financial statements comprise the consolidated balance sheet, income statement, statement of comprehensive income, statement of changes in equity capital, cash flow statement and notes, including a summary of significant accounting policies, as well as the parent company's balance sheet, income statement, statement of changes in equity capital, cash flow statement and notes.

In our opinion

- the consolidated financial statements give a true and fair view of the Group's financial position, financial performance and cash flows in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU
- the financial statements give a true and fair view of the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements.

Our opinion is consistent with the additional report submitted to the Audit Committee.

### Basis for Opinion

We conducted our audit in accordance with good auditing practice in Finland. Our responsibilities under good auditing practice, are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report.

We are independent of the parent company and of the Group companies in accordance with the ethical requirements that are applicable in Finland and are relevant to our audit, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and understanding, the non-audit services that we have provided to the parent company and Group companies are in compliance with laws and regulations applicable in Finland regarding these services, and we have not provided any prohibited non-audit services referred to in Article 5(1) of regulation (EU) 537/2014. The non-audit services that we have provided have been disclosed in note G 12 to the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Materiality

The scope of our audit was influenced by our application of materiality. The materiality is determined based on our professional judgement and is used to determine the nature, timing and extent of our audit procedures and to evaluate the effect of identified misstatements on the financial statements as a whole. The level of materiality we set is based on our assessment of the magnitude of misstatements that, individually or in aggregate, could reasonably

be expected to have influence on the economic decisions of the users of the financial statements. We have also taken into account misstatements and/or possible misstatements that in our opinion are material for qualitative reasons for the users of the financial statements.

### Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. The significant risks of material misstatement referred to in the EU Regulation No 537/2014 point (c) of Article 10(2) are included in the description of key audit matters below.

We have also addressed the risk of management override of internal controls. This includes consideration of whether there was any evidence of management bias that represented a risk of material misstatement due to fraud.

#### Key audit matters

Key audit matters	How these matters were addressed in the audit
Valuation of lending to the public and public sector entities (Accounting Principles and Notes G3, G13, G21, P9, P15)	

- Lending to the public amounted to EUR 4,378 M as at December 31, 2020. This comprises approximately 73 per cent of the Bank of Åland's total assets.
- IFRS 9 Financial Instruments standard is applied in the calculation of expected credit losses. Calculation of expected credit losses involves assumptions, estimates and management judgment. For example, in respect of the probability and amount of the expected credit losses as well as determining the significant increases in credit risk.
- In the financial year 2020, the coronavirus pandemic has impacted the operating environment, credit risk level and components of accounting for expected credit losses of Bank of Åland.
- Due to the significance of the carrying amount involved, complexity of the accounting methods used for measurement purposes and management judgement involved, lending to the public is addressed as a key audit matter.
- We have reviewed and assessed the principles and controls applied for lending regarding approval, recognition and monitoring of loans and receivables. In addition, we have assessed the credit risk monitoring and impairment recognition principles applied. We utilised data analysis in our audit focusing on the lending process and loans.
- We assessed the models and the key assumptions for calculating expected credit losses as well as tested the controls related to the calculation process for expected credit losses. Our audit procedures included an analysis of the most significant individual impairments recognised during the financial period.

- We considered the impacts of the COVID-19 pandemic on the credit risk position and the accounting for expected credit losses. The main areas were parameters for macroeconomic assumptions as well as changes in repayment terms.
- Our IFRS and financial instruments specialists were involved in the audit.
- Furthermore, we considered the appropriateness of the notes provided by the Bank of Åland in respect of loans and other receivables and expected credit losses.

#### Net commission income and IT income (Accounting Principles and Notes G8 and P3)

- The assets managed by the Bank of Åland entitles to fee and commission income on the grounds of the agreements entered into with customers and the cooperation parties. The Group also derives IT income based on customer agreements. Commissions and IT income are a significant item in the Group's income statement.
- The calculation of commissions and IT income comprises manual phases and the determination of the commission amount and revenue recognition may involve management judgement.
- Due to the significance of the income amount and the judgement involved, net commission and IT income are considered a key audit matter.
- We assessed the methods used by the Bank of Åland for calculation of mutual fund and asset management commissions and IT income.
- Our review regarding the accounting of mutual fund and asset management commissions and IT income focused on controls in the billing and fee calculation processes. Our audit procedures involved an assessment of the functionality and effectiveness of these controls.
- Our audit procedures included testing of commission calculations on a sample basis, as well as an assessment of the underlying related agreements and fund statutes where fees have been defined. We utilised data analysis in our analysis of the charged fees.

#### Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

The Board of Directors and the Managing Director are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, and of financial statements that give a true and fair view in accordance with the laws and regulations governing the preparation of financial statements in Finland and comply with statutory requirements. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and the Managing Director are responsible for assessing the parent company's and the Group's ability to continue as going concern, disclosing, as applicable, matters relating to going concern and using

the going concern basis of accounting. The financial statements are prepared using the going concern basis of accounting unless there is an intention to liquidate the parent company or the Group or cease operations, or there is no realistic alternative but to do so.

#### Auditor's Responsibilities for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance on whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with good auditing practice will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with good auditing practice, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the parent company's or the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the parent company's or the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the parent company or the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events so that the financial statements give a true and fair view.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

#### *Other Reporting Requirements*

##### Information on our audit engagement

We were appointed as auditors by the Annual General Meeting in 2013, and our appointment represents a total period of uninterrupted engagement of 8 years.

#### Other Information

The Board of Directors and the Managing Director are responsible for the other information. The other information comprises the report of the Board of Directors and the information included in the Annual Report. We have obtained the report of the Board of Directors and the Annual Report prior to the date of this auditors' report. Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. With respect to the report of the Board of Directors, our responsibility also includes considering whether the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

In our opinion, the information in the report of the Board of Directors is consistent with the information in the financial statements and the report of the Board of Directors has been prepared in accordance with the applicable laws and regulations.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

# Corporate Governance Statement

## Corporate Governance Statement

The Corporate Governance Statement is being issued in conjunction with the Report of the Directors for 2020.

### Finnish Corporate Governance Code

The Finnish Corporate Governance Code ("the Code"), which is available on the website [www.cgfinland.fi](http://www.cgfinland.fi), is intended to be followed by companies listed on the Nasdaq OMX Helsinki ("Helsinki Stock Exchange"). The current Code went into effect on January 1, 2020 and replaced the previous Finnish Corporate Governance Code from 2015. The Code is applied according to the "comply or explain" principle, which means that departures from its recommendations must be disclosed and explained. A company is regarded as complying with the Code even if it departs from an individual recommendation, provided that it discloses and explains the departure.

The Bank of Åland Plc ("the Bank"), which is listed on the Helsinki Stock Exchange, is a public company domiciled in Mariehamn, Finland. The Bank is subject to the Finnish Companies Act and the Bank's Articles of Association as well as applying the Code. The Corporate Governance Statement has been prepared in compliance with the Code's reporting instructions and according to the Finnish Securities Market Act, Chapter 7, Section 7. In applying the Code, the Bank departs from Recommendation 15, "Appointment of members to committees", since the Bank's Compensation Committee includes one co-opted member who is not a member of the Bank's Board of Directors. The co-opted member is also Chairman of the Committee. The purpose of this departure is to broaden the Compensation Committee's experience and expertise base on compensation matters. The need for outside expertise is assessed separately before each appointment date.

### Board of Directors

#### COMPOSITION OF THE BOARD

The members of the Board of Directors are elected by the shareholders at the Annual General Meeting (AGM). The Board's term of office ends at the closing of the next AGM after the election. The Board shall consist of at least five and at most eight members. During 2020, the Board consisted of six members. The Managing Director may not be a member of the Board.

#### PRESENTATION OF BOARD MEMBERS AND THEIR SHAREHOLDINGS IN THE BANK

##### Composition of the Board, 2020

Name, main occupation and education	Year of birth Board members since what year Place of residence	Board members' shareholdings in the Bank on December 31, 2020 (direct ownership or via companies which the Board member controls). There are no shareholdings in other Bank of Åland Group companies.

#### THE BOARD'S ASSESSMENT OF THE INDEPENDENCE OF ITS MEMBERS IN RELATION TO THE BANK AND MAJOR SHAREHOLDERS

In the assessment of the Board of Directors, the Chairman of the Board and all other Board members are independent of the Bank.

Christoffer Taxell, Anders Å Karlsson and Ulrika Valassi are also independent in relation to major shareholders. Nils Lampi, Chairman of the Board, is deemed to be dependent in relation to a major shareholder since he is CEO of Wiklöf Holding, which is a major shareholder in the Bank. Anders Wiklöf is regarded as dependent in relation to a major shareholder due to his direct and indirect shareholding in the Bank.

#### THE WORK OF THE BOARD

The Board of Directors oversees the administration of the Bank's affairs and is responsible for ensuring that its operations are appropriately organised. The Board is also responsible for overall policy and strategy issues and for ensuring that risk oversight is sufficient and that management systems are working. The duties of the Board also include appointing and, if necessary, dismissing the Managing Director, his deputy and other members of the Executive Team, as well as deciding their salary benefits and other employment conditions. The Board shall constitute a quorum when more than half its members are present.

The Board has established Group-wide internal Rules of Procedure for its work. These Rules of Procedure, which are evaluated annually and revised as needed, mainly regulate the division of labour between the Board, the Managing Director and other members of the Executive Team. The Board

of Directors, which meets after being convened by the Chairman of the Board, regularly discusses the economic situation in the financial markets.

Supported by the Managing Director's recurrent reports on operational activities, the Board monitors the strategy, financial outcomes and overall long-term objectives of the Bank's operations. Beyond this, the Board deals with other matters raised in compliance with the Annual Accounts Act, the Articles of Association and other regulations that affect the Bank's operations and administration, as well as matters referred by individual Board members and by the Executive Team.

#### EVALUATION OF THE WORK OF THE BOARD

The Board of Directors conducts a yearly internal evaluation of its performance and its work. The evaluation includes a questionnaire in which each Board member assesses the work of the Board during the year. The Chairman of the Board also has individual conversations with each Board member. Led by the Chairman of the Board, the evaluation is also discussed and dealt with at a subsequent Board meeting, and decisions are made on actions to be taken as a result of the evaluation.

#### BOARD MEETINGS

During 2020, the Board held 21 (19) meetings. The Board members' average attendance was 98 (97) per cent. During 2020, each Board member attended Board and committee meetings as follows:

#### Attendance at Board meetings, 2020

Board member	Board meetings
	Total number: 21
Nils Lampi	20/21
Christoffer Taxell	21/21
Åsa Ceder	21/21
Anders Å Karlsson	21/21
Ulrika Valassi	21/21
Anders Wiklöf	20/21

#### DIVERSITY PRINCIPLES

The Bank of Åland seeks a good balance in the allocation of Board members, with an equal allocation between the genders. Both genders shall thus be represented in the proposal that is presented on the occasion of each nomination as a new Board member.

## The committees of the Board

### NOMINATION COMMITTEE

The main duty of the Nomination Committee is to prepare proposals before the AGM regarding the election of Board members as well as proposals concerning fees to the Chairman and other Board members.

Rules on how the Nomination Committee is appointed were established by the 2015 AGM. The Nomination Committee consists of four members: the Chairman of the Board and representatives of the three largest shareholders in the Bank in terms of voting power on November 1 of each year. If the Chairman of the Board represents any of the above shareholders, or in case a shareholder abstains from participating in the Nomination Committee, the right of membership is transferred to the next largest shareholder. The representative of the largest shareholder in terms of voting power is Chairman of the Nomination Committee.

The Nomination Committee consists of Nils Lampi, Chairman of the Board; Board member Anders Wiklöf, by virtue of direct and indirect personal shareholdings; Stefan Björkman, representing the insurance company Alandia Försäkring; and Georg Ehrnrooth, representing Fennogens Investments S.A. Anders Wiklöf is Chairman of the Nomination Committee.

During 2020 the Nomination Committee met 2 (2) times. The average attendance of Committee members was 100 (100) per cent.

#### Attendance at Nomination Committee meetings, 2020

Member	Nomination Committee meetings Total number: 2
Anders Wiklöf, <i>Chairman of the Committee</i>	2/2
Nils Lampi	2/2
Stefan Björkman	2/2
Georg Ehrnrooth	2/2

### AUDIT COMMITTEE

The Board of Directors, which appoints the members of the Audit Committee, has established its duties in Rules of Procedure. The Audit Committee assists the Board, among other things, in fulfilling its duties in overseeing the internal control and risk management systems, reporting, the audit process and observance of laws and regulation. In addition, before the AGM the Audit Committee prepares proposals for the election of auditors and their fees. The Chairman of the Audit Committee reports regularly to the Board about the work and observations of the Committee.

The Audit Committee consists of Nils Lampi, Chairman of the Board; and Board members Åsa Ceder, Anders Å Karlsson and Ulrika Valassi, Chairman of the Audit Committee. During 2020 the Audit Committee met 11 (9) times.

The average attendance of Committee members was 100 (100) per cent.

#### Attendance at Audit Committee meetings, 2020

Member	Audit Committee meetings Total number:11
Ulrika Valassi, <i>Chairman of the Committee</i>	11/11
Åsa Ceder	11/11
Anders Å Karlsson	11/11
Nils Lampi	11/11

### COMPENSATION COMMITTEE

The duties of the Compensation Committee are to prepare key compensation-related decisions and evaluate the Bank's compensation policy and the principles for variable compensation. The Compensation Committee decides on measures for monitoring the application of the principles for the compensation system and assesses its suitability and effect on the Group's risks and risk management.

The Compensation Committee consists of Nils Lampi, Chairman of the Board; Board member Christoffer Taxell and former Board member Agneta Karlsson as a co-opted member and Chairman of the Committee.

During 2020 the Compensation Committee met 6 (3) times. The average attendance of Committee members was 100 (100) per cent.

#### Attendance at Compensation Committee meetings, 2020

Member	Audit Committee meetings Total number: 6
Agneta Karlsson, <i>Chairman of the Committee</i>	6/6
Nils Lampi	6/6
Christoffer Taxell	6/6

## Managing Director

The Managing Director of the Bank is Peter Wiklöf, Master of Laws (born 1966). The Managing Director's shareholdings in the Bank can be seen in the table to the right.

Among other things, the Managing Director is responsible for the day-to-day administration of the Bank and for ensuring that this is managed in compliance with law, the Articles of Association, other regulations and the instructions and directions of the Board. In addition, the Managing Director is responsible for ensuring that the decisions of the Board are implemented.

The Managing Director reports regularly to the Board. The Managing Director is appointed and dismissed by the Board of Directors. His employment conditions are established in a written contract that is approved by the Board.

## The Group's Executive Team – other members

The Board appoints the other members of the Group-wide Executive Team. The other members of the Executive Team advise the Managing Director, and the Executive Team deals with all major Bank-wide issues. The Executive Team consists of the heads of the Bank's business areas and corporate units.

Their shareholdings in the Bank can be seen in the table to the right.

During 2020 the Executive Team met on 12 (11) occasions.

## EVALUATION OF THE WORK OF THE MANAGING DIRECTOR AND THE EXECUTIVE TEAM

The Board of Directors, led by the Chairman of the Board, evaluates the work of the Managing Director and the rest of the Executive Team yearly. The Managing Director and other members of the Executive Team do not attend this evaluation.

## Internal controls and risk management systems related to the financial reporting process

### GENERAL

Internal controls and risk management in the financial reporting process are an integral element of operational systems and daily routines. To achieve this integration, the Group employs clear and easily accessible internal instructions. In developing new systems, products, services and/or routines, internal controls are taken into account. The organisation has clearly defined responsibilities and powers as well as clear reporting mechanisms.

### FINANCIAL REPORTING PROCESS

The fundamental principles of internal controls in the financial reporting process are a clear allocation of roles as well as instructions and an understanding of how financial results are achieved.

The Group's reporting is compiled centrally by Group Finance. This department is responsible for the consolidated accounts and the consolidated financial statements, accounting principles, policy documents and instructions, financial control systems, tax analysis, reporting to regulatory authorities and publication of financial information. The respective subsidiaries are responsible for ensuring that their accounts meet the Group's standards, and they report monthly to their company's management and Group Finance.

The Internal Auditing Department assists the external auditors with the examination of financial information in accordance with an audit plan drawn up in advance. Internal Auditing is an independent unit and works on behalf of the Board of Directors.

External auditors examine the Group's interim reports, half-year financial report, Annual Report and Corporate Governance Statement and submit an auditors' report to the Audit Committee and to the Group's Board of Directors.

The Group's Executive Team deals with the Group's internal financial reporting every month and with the interim reports, half-year financial report or the Annual Report every quarter.

The Audit Committee assists the Board in its continuous monitoring work by examining the quarterly financial reports, the half-year financial report and the annual financial statements, as well as dealing with the observations of the external and internal auditors.

The Board of Directors deals with quarterly reports, the half-year financial report and the year-end report and receives the Group's internal financial reporting every month. The Board also examines the auditors' reports, audit plans and conclusions of the external auditors concerning interim reports, the half-year financial report and the Annual Report. The Board meets with the external auditors at least quarterly.

### RISK MANAGEMENT

The Group's ambition is to pursue its operations with reasonable and carefully considered risks. Its profitability directly depends on the ability of the organisation to identify, manage and price risks. The purpose of risk management is to reduce the probability of unforeseen losses and/or threats to the Group's reputation as well as contribute to higher profitability and shareholder value.

The Group is exposed to credit risk, counterparty risk, market risk, liquidity risk, operational risk and business risk. The latter is a consequence of the Group's strategy, competitiveness, ability to adapt to customer expectations, unfavourable business decisions and the environment and market the Group works in. Business risk is managed in conjunction with strategic planning. Credit risk, which is the Group's most significant risk, encompasses receivables from private individuals, companies, institutions and the public sector. These receivables mainly consist of loans, overdraft facilities and guarantees issued by the Bank.

The Board of Directors has overall responsibility for governance and monitoring, that is, for ensuring that risk management is sufficient and for establishing systems and regulations for monitoring and limiting the Bank's risk exposure. The Audit Committee assists the Board in handling these oversight tasks in internal control systems, risk management and reporting. The Managing Director oversees and supervises business operations in accordance with

the Board's instructions, is responsible for day-to-day administration and for ensuring that the members of the Board receive sufficient information regularly about the Group's risk positions and the regulations that affect its operations.

The Bank works according to an allocation of responsibility in which each part of its business operations bears responsibility for its business and for managing its risks. The Risk Office Corporate Unit is responsible for independent risk monitoring (financial risks) and operational risks (among other things compliance with regulations). This includes identifying, measuring, analysing and reporting all of the Group's significant risks as well as examining the loan matters presented to the Credit Committee of the Executive Team. The Risk Office is also responsible for informational and corporate security in the Group. The corporate unit also ensures that risks and risk management live up to the Bank's risk appetite and risk tolerance and that the management of the Bank regularly receives reports and analyses on the current situation. The Risk Office is audited by the Internal Auditing Department, which evaluates risk management both in terms of sufficiency and compliance. In addition to the regulations and instructions of the Finnish Financial Supervisory Authority and legislation, the main foundations of the Group's risk management are numerous directives and regulations at the European Union level. For more detailed information on the Group's risk management, capital management and capital adequacy, see the "Capital and risk management report" for 2020.

### LENDING STRUCTURE

At the Bank, the Private Banking and Premium Banking units in Åland, on the Finnish mainland and in Sweden bear responsibility for lending via mandates. Those employees who work with lending have personal loan granting limits for the customers that they are responsible for. In Åland there is also a corporate lending unit. Customer and loan responsibility rests with the management of each respective unit along with those responsible for customers according to the above-mentioned structure. If decisions

regarding larger loans are needed, there is a Credit Committee for operations in Finland and one for operations in Sweden. In addition, there is a Credit Committee of the Executive Team for credit matters that cannot be decided by the country-specific units due to their size. The largest commitments are decided by the Bank's Board of Directors. The Bank's pool of home mortgage loans in Sweden will grow further via business partnerships that comply with carefully defined credit quality criteria.

#### COMPLIANCE

Monitoring and assessment of the Bank's compliance with regulations is managed by the Group's Compliance department, with a focus on customer protection, behaviour in the market, combating money laundering and the financing of terrorism as well as permitting and regulatory matters. The Compliance department regularly reports its observations to the Bank's Executive Team and Board of Directors.

#### Internal Auditing

The Internal Auditing department is an independent department that reports directly to the Board of Directors.

The purpose of internal auditing work is to provide the Board and the Executive Team with objective and independent assessments of operational activities, operational business and management processes and the Group's risk management, governance and controls. Internal Auditing reports regularly to the Board, the Audit Committee and the Executive Team. The Board adopts a yearly plan for internal auditing work.

#### Special decision making procedure concerning related party transactions

Decisions on loans to related parties who are entitled to the employee interest rate are made by the Bank's Board of Directors.

#### Insider administration

In their capacities as an investment firm and a fund management company, respectively, the Bank of Åland and its subsidiary Ålands-

banken Fondbolag maintain insider registers in compliance with the Act on Investment Services or the Act on Mutual Funds.

In its capacity as a listed company, the Bank only maintains project-specific insider lists. These project-specific insider lists are established immediately when information that the Bank deems insider information arises. Persons included on project-specific insider lists are prohibited from trading in the Bank's financial instruments as long as they are included on such a list.

The Bank does not maintain any permanent insider list, or any list of persons who participate in the preparation of interim reports and annual accounts. Persons discharging managerial responsibilities at the Bank and persons closely associated with them are obligated to immediately report their transactions in the Bank's financial instruments. The Bank publishes stock exchange releases on these transactions.

In accordance with the EU's Market Abuse Regulation and the insider regulations of the Nasdaq Helsinki Oy (the Helsinki Stock Exchange), the Bank of Åland Group has introduced a trading restriction, under which persons in management positions as well as all Group employees may not trade in the Bank's financial instruments during a 30-day period before and including the publication date of the Bank's financial reports. The trading restriction also includes minors for whom persons in management positions or Group employees are guardians, as well as organisations in which people in management positions or Group employees have a controlling influence.

The Bank observes a silent period of at least 14 days prior to the publication of an interim report, half-year financial report or year-end report.

For employees who participate in providing investment services, the Bank also applies Group-wide trading restrictions that are based on the trading rules established by such professional organisations as Finance Finland, the Swedish Securities Dealers Association and the Swedish Investment Fund Association.

The Bank's Legal Affairs department regularly monitors information reported to the insider register and insider lists,

as well as information about people in management positions and their related parties. The Bank's Compliance department regularly monitors employee compliance with the trade restrictions in force.

#### Regulations for related party transactions

The Bank has established internal regulations for identification and decision making concerning transactions with related parties. The internal regulations govern such matters as identification, reporting and oversight of related party transactions as well as the decision making process and management of conflicts of interest.

#### Auditors

According to its Articles of Association, the Bank shall have at least three auditors and the necessary number of deputies for them. An auditor is appointed yearly at the Annual General Meeting (AGM) for the period up to the end of the next Annual General Meeting.

The latest AGM in 2020 elected Marcus Tötterman, Fredrik Westerholm and Jessica Björkgren. The CGR-affiliated firm of KPMG Oy Ab was re-elected as deputy auditor.

During 2020, Group companies paid a total of EUR 379,936 (406,839) including value-added tax for auditing fees. In addition, they paid EUR 149,758 (109,428) including VAT for consulting assignments performed by KPMG Oy Ab.

#### Compensation to the Board, Managing Director and other Executive Team members

The Bank's compensation statement, including its compensation report for 2020, has been published in Swedish and Finnish on the Bank's website, [www.alandsbanken.fi](http://www.alandsbanken.fi)

## Board of Directors

**Nils Lampi**

# Definitions

## **ACTIVELY MANAGED ASSETS**

Managed assets in the Bank's own mutual funds plus securities custodial accounts with discretionary and advisory asset management agreements.

## **ALTERNATIVE PERFORMANCE MEASURES**

Alternative performance measures are financial metrics of historical or future earnings developments, financial position or cash flow that have not been defined in applicable accounting regulations (IFRSs) or capital requirements regulations (CRD/CRR).

The Bank of Åland uses alternative performance measures when they are relevant in order to monitor and describe the Bank's financial situation, to facilitate comparability between periods and to provide additional usable information to the readers of its financial reports.

These measures are not necessarily comparable to similar financial metrics that are presented by other companies.

## **CAPITAL COVER RATIO**

Own funds divided by risk exposure amount.

## **COMMON EQUITY TIER 1 (CET1) CAPITAL**

Equity capital excluding proposed dividend, deferred tax and intangible assets and certain other adjustments according to the European Union's Capital Requirements Regulation No. 575/2013 (CRR).

## **COMMON EQUITY TIER 1 (CET1) CAPITAL RATIO**

Common equity Tier 1 (CET1) capital divided by risk exposure amount. Replaces "core Tier 1 capital" concept.

## **CORE FUNDING RATIO**

Lending to the public divided by deposits including certificates of deposit, index bonds and debentures issued to the public plus covered bonds issued.

## **EARNINGS PER SHARE**

Shareholders' portion of earnings for the period divided by average number of shares.

## **EQUITY/ASSETS RATIO**

Equity capital as a percentage of balance sheet total.

## **EQUITY CAPITAL PER SHARE**

Shareholders' portion of equity capital divided by number of shares less own shares on closing day.

## **EXPECTED CREDIT LOSS (ECL)**

The present value of expected future credit (loan) losses on financial assets. ECL is a product of PD, LGD and exposure at default.

## **EXPENSE/INCOME RATIO**

Total expenses divided by total income.

## **GROSS EQUITY/ASSETS RATIO**

Tier 1 capital divided by balance sheet total plus certain off-balance sheet items recalculated using conversion factors defined in the standardised approach.

## **GROSS LENDING TO THE PUBLIC IN STAGE 3, %**

Gross lending to the public in Stage 3, divided by lending to the public before provisions for impairment losses.

## **INVESTMENT MARGIN**

Net interest income as percentage of average\* balance sheet total.

## **LEVEL OF PROVISIONS FOR LENDING TO THE PUBLIC IN STAGE 3**

Provisions for impairment losses in Stage 3 as a percentage of gross lending to the public in Stage 3.

## **LIQUIDITY COVERAGE RATIO (LCR)**

High-quality liquid assets as a percentage of estimated net liquidity outflow during a 30-day period.

## **LOAN/DEPOSIT RATIO**

Lending to the public divided by deposits from the public.

## **LOAN LOSS LEVEL**

Net impairment losses on loan portfolio and other commitments in lending to the public divided by lending to the public at the beginning of the period.

## **LOSS GIVEN DEFAULT (LGD)**

LGD specifies the percentage of loss in an exposure, in the event of a default.

## **NET STABLE FUNDING RATIO (NSFR)**

Available stable funding as a percentage of necessary stable funding.

## **OWN FUNDS (REPLACES CAPITAL BASE CONCEPT)**

Total of Tier 1 capital and Tier 2 (supplementary) capital.

## **PAYOUT RATIO**

Dividend per share as a percentage of earnings per share.

## **PROBABILITY OF DEFAULT (PD)**

The probability that a counterparty or a contract will default within 12 months.

## **RETURN ON EQUITY AFTER TAXES (ROE)**

Profit for the report period attributable to shareholders divided by average shareholders' portion of equity capital.

## **RISK EXPOSURE AMOUNT**

Assets and off-balance sheet commitments, risk-weighted according to capital adequacy regulations for credit risk and market risk. Operational risks are calculated and expressed as risk exposure.

## **TIER 1 CAPITAL**

Common equity Tier 1 (CET1) capital including certain loss-absorbing subordinated debentures ("additional Tier 1 capital").

## **TIER 2 (SUPPLEMENTARY) CAPITAL**

Mainly subordinated debentures that do not meet requirements to be included as additional Tier 1 capital.

\* Average of 13 end-of-month figures.
